#### Notice :

All functionality, features, specifications and other product information provided in this document including, but not limited to, the benefits, design, pricing, components, performance, availability, and capabilities of the product are subject to change without notice or obligation. Samsung reserves the right to make changes to this document and the product described herein, at anytime, without obligation on Samsung to provide notification of such change.

---

# 1. Safety Precautions

---

## 1-1. Repair Precaution

- Repair in Shield Box, during detailed tuning. Take specially care of tuning or test, because specipicty of cellular phone is sensitive for surrounding interference(RF noise).
- Be careful to use a kind of magnetic object or tool, because performance of parts is damaged by the influence of magnetic force.
- Surely use a standard screwdriver when you disassemble this product, otherwise screw will be worn away.
- Use a thicken twisted wire when you measure level.  
A thicken twisted wire has low resistance, therefore error of measurement is few.
- Repair after separate Test Pack and Set because for short danger (for example an overcurrent and furious flames of parts etc) when you repair board in condition of connecting Test Pack and tuning on.
- Take specially care of soldering, because Land of PCB is small and weak in heat.
- Surely tune on/off while using AC power plug, because a repair of battery charger is dangerous when tuning ON/OFF PBA and Connector after disassembling charger.
- Don't use as you pleases after change other material than replacement registered on SEC System. Otherwise engineer in charge isn't charged with problem that you don't keep this rules.

## 1-2. ESD(Electrostatically Sensitive Devices) Precaution

Several semiconductor may be damaged easily by static electricity. Such parts are called by ESD (Electrostatically Sensitive Devices), for example IC,BGA chip etc. Read Precaution below.

You can prevent from ESD damage by static electricity.

- Remove static electricity remained your body before you touch semiconductor or parts with semiconductor. There are ways that you touch an earthed place or wear static electricity prevention string on wrist.
- Use earthed soldering steel when you connect or disconnect ESD.
- Use soldering removing tool to break static electricity. , otherwise ESD will be damaged by static electricity.
- Don't unpack until you set up ESD on product. Because most of ESD are packed by box and aluminum plate to have conductive power,they are prevented from static electricity.
- You must maintain electric contact between ESD and place due to be set up until ESD is connected completely to the proper place or a circuit board.

---

## 2. Specification

---

### 2-1. GSM General Specification

	GSM 850	EGSM 900	DCS1800	PCS1900
Freq. Band[MHz] Uplink/Downlink	824~849 869~894	880~915 925~960	1710~1785 1805~1880	1850~1910 1930~1990
ARFCN range	128~25	0~124 & 975~1023	512~885	512~810

### 3. Operation Instruction and Installation

---

#### Main Function

- Dual SIM Function
- 2G Quad band (GSM850/EGSM900/DCS1800/PCS1900)
- BT 2.1 + EDR
- USB 2.0
- WAP 2.0, JAVA
- MMS, SMS
- Camera : 2MP (HNT/SF)
- LCD : 2.2" QVGA
- Battery : 1000mAh
- Size : 14×48×13.6 mm (mm)
- MicroSD Card Support
- FM Radio Support

---

## 6. Level 1 Repair

---

### 6-1. Software Download

#### 6-1-1. Pre-requisite for Download

- Download Program (there are 2 ways to download.)
  - [Flash loader 7.4.7\\_SSG\\_v0.1\\_Lite.exe](#) : [Flash loader 7.4.7\\_SSG\\_v0.1\\_Lite](#)
- USB Driver
  - [Samsung USB Modem driver](#)
- GT-C3222 Mobile Device
- Data Cable
- JIG BOX (GH99-36900B)
- RF Test Cable (GH39-00985A)
- JIG Cable (GH39-01290A)
- Adapter (GH99-38251A)
- Binary files
- ActiveSync Setting
- Driver Installation.

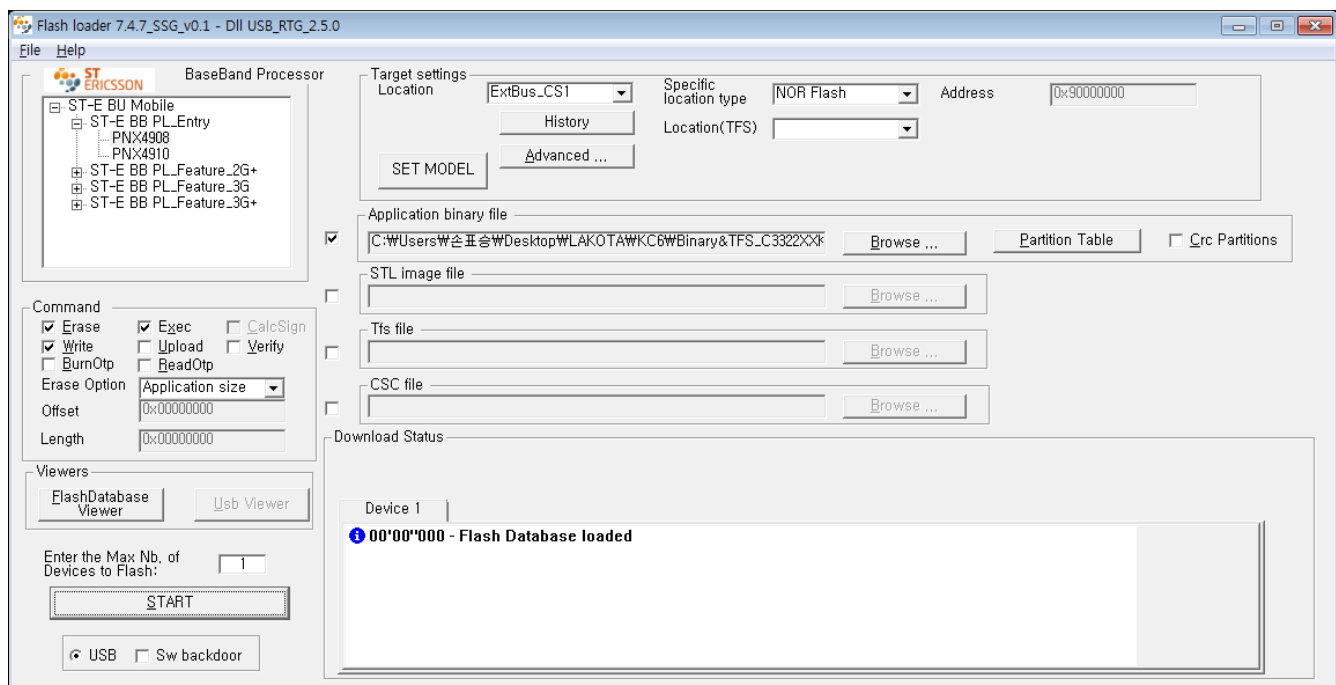

## 6-1-2. Driver Installation

- Make sure that you install the driver for a phone.
- You have to install the driver of Samsung USB Modem of downloading a phone image
- **Restart your host PC after you install the phone driver.**

## 6-1-3. S/W Download Process

### 1) Execute the downloader

Execute the 'Flash loader 7.4.7\_SSG\_v0.1\_Lite.exe' program.

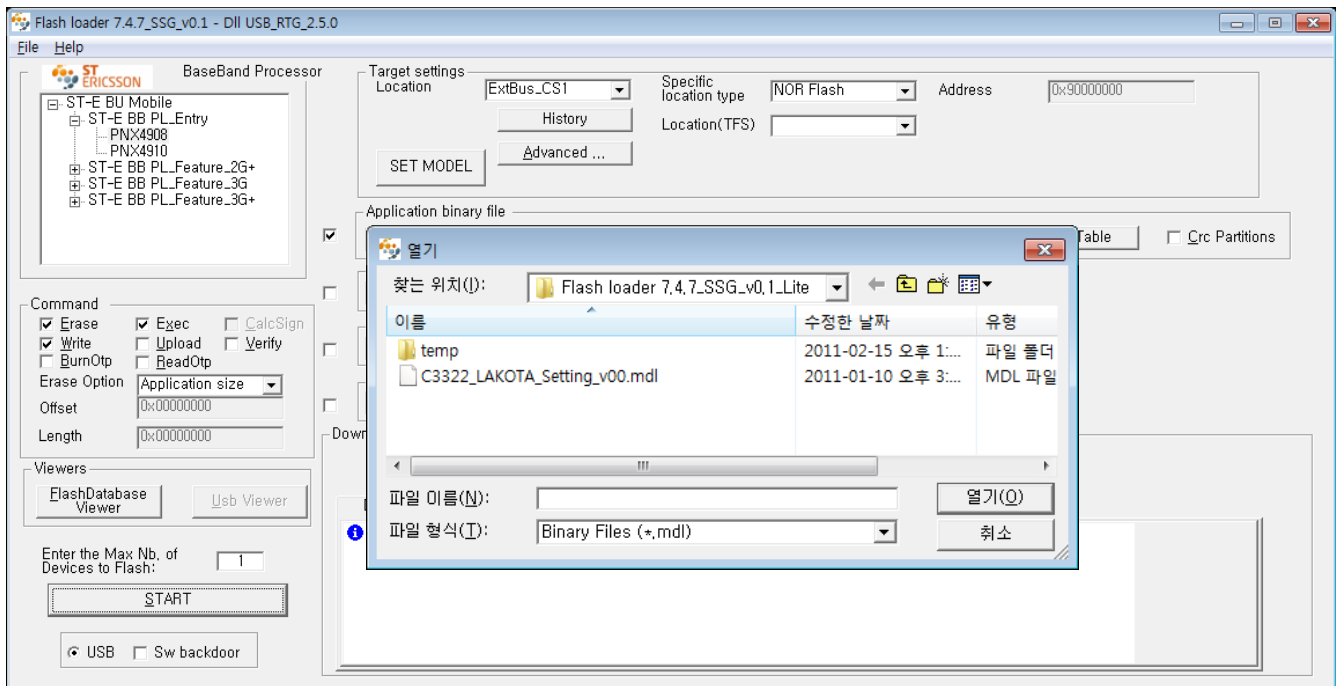

(Notice : Flash loader supports only Single-CSC.)

## 2) Set Model

Click "SET MODEL", and you can select appropriate model.

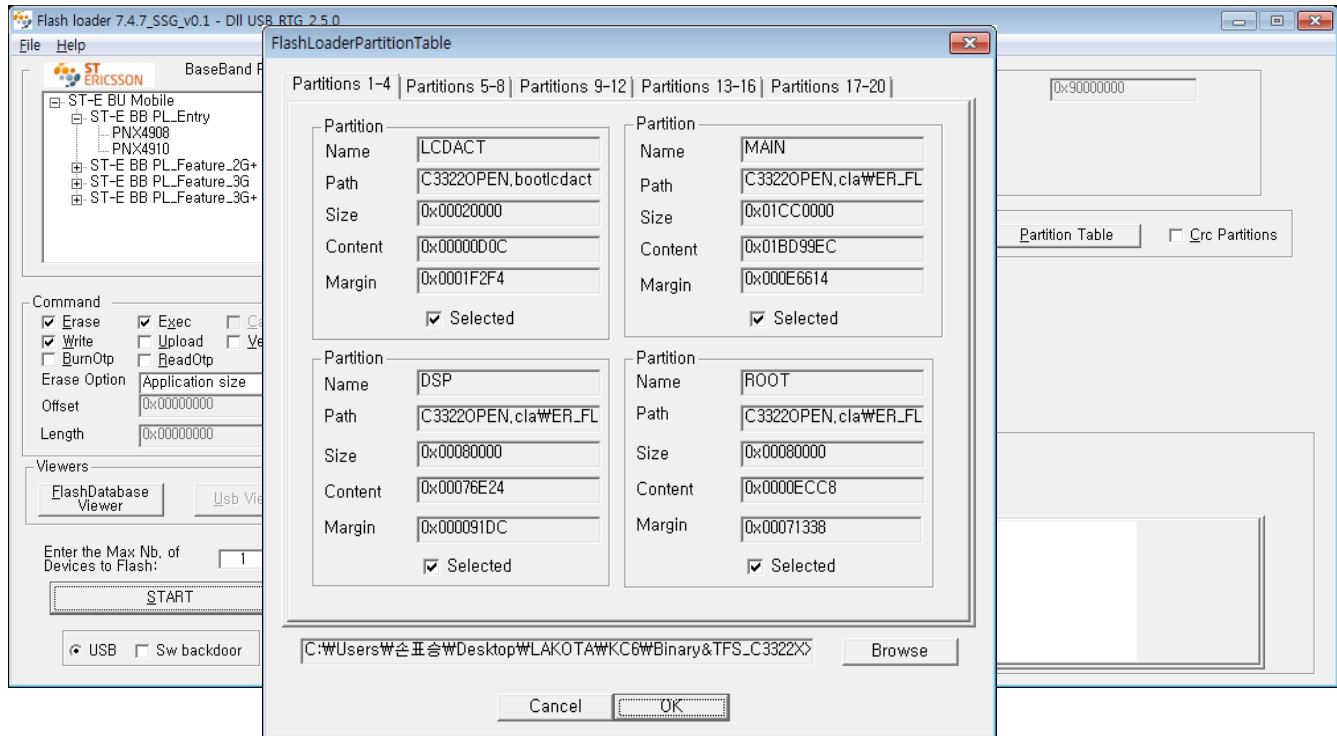

You should choice "C3322\_LAKOTA\_Setting\_v00.mdl" for further advance.

### 3) Select the binary, TFS, and CSC files

Click "Partition Table", and you can select a certain binary.

With browsing files, you can choice appropriate Flash-loader partition table all at once.

After that, you should activate TFS, CSC.

Also you can select the TFS files, and CSC files.

(Notice : The buttons of TFS and CSC need to be activated not only after phone image is added first)

#### 4) Select the download mode

Click "START" to ready to download binary.

(Notice : In this step, the mobile device actually don't download the binary yet.)

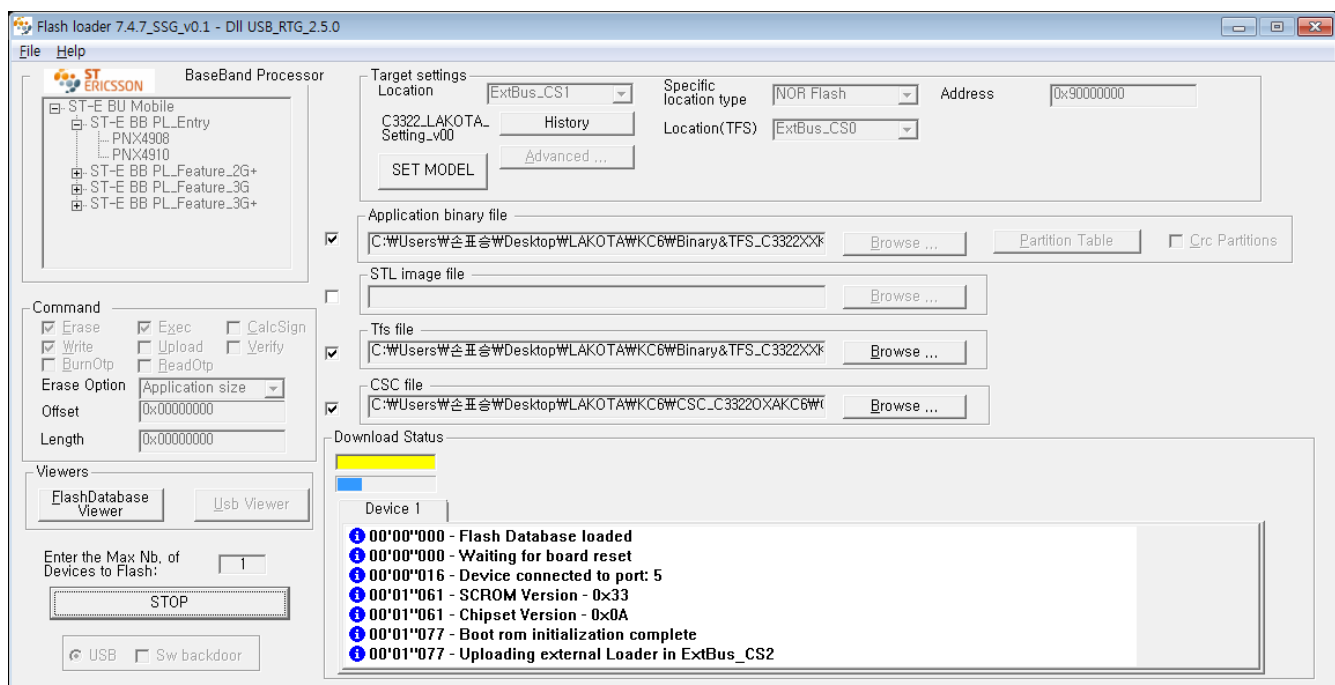

#### 5) Connect the device

First, power off the device with battery.

After that, connect PC with device using USB cable.

(Don't detach your finger from two keys.)

In that case the device will power on and downloader recognize the device automatically

## 6) Complete download

The download process is automatically executed.

If "Slot freed for new download" message was shown without any problems, you now download the binary successfully.

(Notice : After download process is completed, take care of the abnormal power off situation(ex. mount/demount battery) within the first booting time. It may causes malfunction)

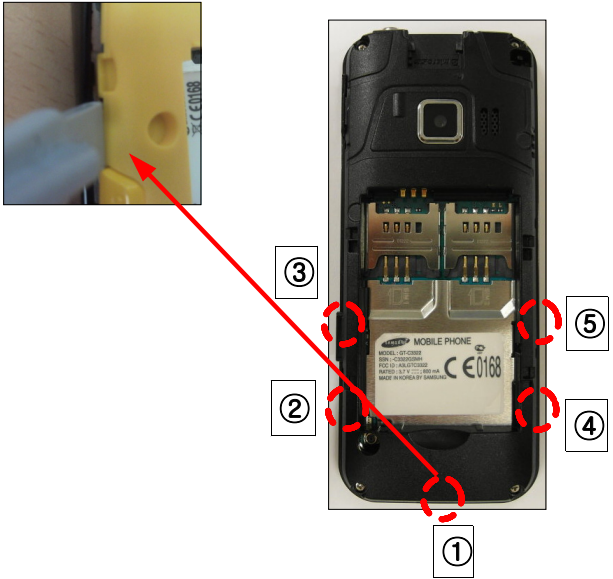

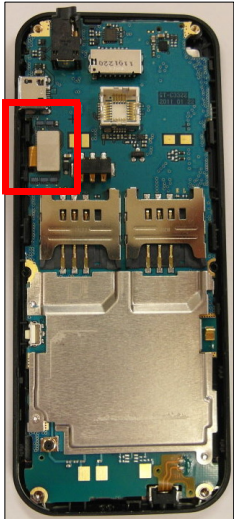

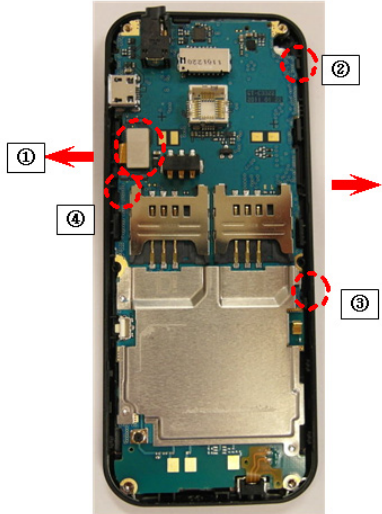

## 7) Confirm Download

- Reboot the device and confirm whether the device do normal operation.
- When completing download, downloader is automatically initialized and ready for connecting next device.

## 7. Level 2 Repair

### 7-1. Disassembly and Assembly Instructions

#### 7-1-1. Disassembly

<div data-bbox="175 346 792 405"> <div>1</div> <div>Unscrew Rear Case</div> </div> 	<div data-bbox="833 346 1450 405"> <div>2</div> <div>Separate the Rear Case</div> </div> 
<p>Unscrew 4 points on Rear Case.</p>	<p>Separate Rear part corner using a decomposition tool.</p>
<div data-bbox="175 1102 792 1161"> <div>3</div> <div>Separate 1 connectors.</div> </div> 	<div data-bbox="833 1102 1450 1161"> <div>4</div> <div>Separate the PBA from Front Ass'y.</div> </div> 
<p>Separate 2 connectors from the PBA with care.</p>	<p>Lift the Hook &amp; Separate the PBA from Front Ass'y.</p>

5

Unscrew PBA

Unscrew 3 points on the PBA.

6

Separate Shield Can

Separate the Shield Can.

7

Separate the LCD from Front.

Separate the LCD from Front and Keypad.

8

Check Front Ass'y, PBA, LCD.

Check Front Ass'y, PBA, LCD.

## 7-1-2. Assembly

1
