### 10. Reference data

---

## 1. Safety Precautions

---

### 1-1. Repair Precaution

- Repair in Shield Box, during detailed tuning.

Take specially care of tuning or test, because the specification of cellular phone is sensitive for surrounding interference(RF noise).

- Be careful to use a kind of magnetic object or tool, because performance of parts is damaged by the influence of magnetic force.
- Surely use a standard screwdriver when you disassemble this product, otherwise screw will be worn away.
- Use a thicken twisted wire when you measure level.  
A thicken twisted wire has low resistance, therefore error of measurement is few.
- Repair after separate Test Pack and Set because for short danger (for example an overcurrent and furious flames of parts etc) when you repair board in condition of connecting Test Pack and tuning on.
- Take specially care of soldering, because Land of PCB is small and weak in heat.
- Surely tune on/off while using AC power plug, because a repair of battery charger is dangerous when tuning ON/OFF PBA and Connector after disassembling charger.
- Don't use as you pleases after change other material than replacement registered on SEC System. Otherwise engineer in charge isn't charged with problem that you don't keep this rules.

## 1-2. ESD(Electrostatically Sensitive Devices) Precaution

Several semiconductor may be damaged easily by static electricity. Such parts are called by ESD (Electrostatically Sensitive Devices), for example IC,BGA chip etc. Read Precaution below.

You can prevent from ESD damage by static electricity.

- Remove static electricity remained your body before you touch semiconductor or parts with semiconductor. There are ways that you touch an earthed place or wear static electricity prevention string on wrist.
- Use earthed soldering steel when you connect or disconnect ESD.
- Use soldering removing tool to break static electricity. Otherwise ESD will be damaged by static electricity.
- Don't unpack until you set up ESD on product. Because most of ESD are packed by box and aluminum plate to have conductive power,they are prevented from static electricity.
- You must maintain electric contact between ESD and place due to be set up until ESD is connected completely to the proper place or a circuit board.

## 2. Specification

### 2-1. GSM General Specification

	<b>EGSM 900</b>	<b>DCS 1800</b>	<b>PCS 1900</b>	<b>W-CDMA 2100</b>
Freq. Band[MHz] Uplink/Downlink	880~915 925~960	1710~1785 1805~1880	1850~1910 1930~1990	1920~1980 2110~2170
ARFCN range	0~124 & 975~1023	512~885	512~810	UL:9612~9888 DL:10562~10838
Tx/Rx spacing	45MHz	95MHz	80MHz	190MHz

---

### 3. Product Function

---

#### Main Function

- Homescreen - Card Wheel
- PIM - Calendar, Contacts, Tasks, Voice Notes
- Messaging - SMS, MMS, Postcard, E-Mail, Pocket MSN
- Video Telephony
- ActiveSync
- Multimedia capability - Windows Media Player, Camera, Camcorder
- Wireless capability - Bluetooth, Wireless LAN
- Internet Explorer
- Internet Sharing
- Accessory Applications - Alarms, Calculator, D-Day, Notepad, Smart Converter, Stopwatch, World Clock, Smart Search, Task Manager, OBEX FTP
- RSS Reader, Podcast
- Picsel Viewer
- File Explorer, My Items
- Voice Assist (only for germany, france, england, russia)
- Speaker Phone capability
- Games (Bubble Breaker, Solitaire)

## 4. Array course control

### 4-1. Software Adjustments

- There are 2 set to download the binary image into your device.

[First set]

1. JIG (GH80-03308A)
2. USB Cable
3. Test Cable(GH39-00558A): JIG to phone
4. Power Cable: JIG to power supply
5. Serial Cable: PC to JIG
6. Power Supply

**[Second Set]**

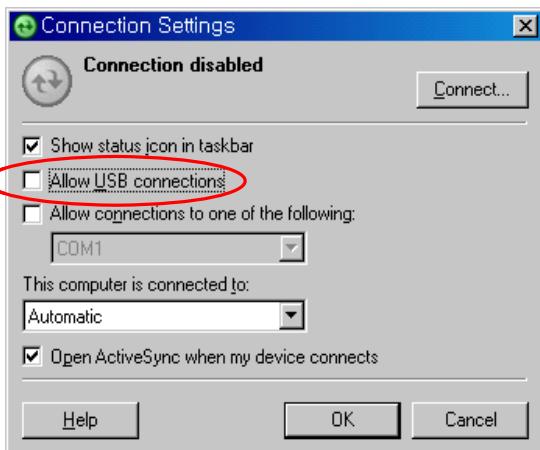

1. USB DATA Link Cable(PCB200BBE)
2. Battery

## 4-2. Software Download

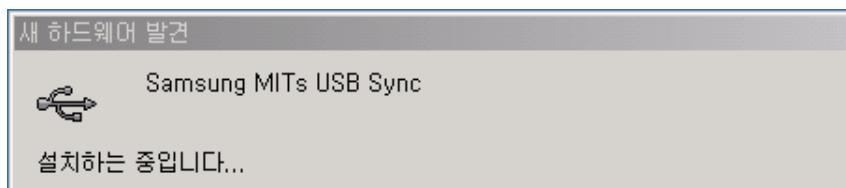

### 4-2-1. Pre-requisite for Download

- Downloader Program (there are 3 ways to download.)
  - [WCEDownloader v1.1Single.exe](#)
  - [WCEDownloader v1.1.exe \(multidownloader\)](#)
  - [\[unknown\].exe](#)
- SGH\_I600 Mobile Device
- Binary files
- Active sync Setting
- Driver Installation.

### 4-2-2. Active sync setting and Driver Installation

- Make sure that the active sync program is checked before connecting your device to the host computer.
- If the active sync program is working in your computer, Make sure that check box, **Allow USB connection** at the Connection Setting, is released.
- Press 'OK' button to save a configuration.

- You can see the next picture if usb driver is not installed when you try to connect the device to the host computer.
- You have to install the file which is name of '**wceusbsh.inf**' when you select the driver.

#### 4-2-3. S/W Download Process

##### Single Download ([WCEDownloader v1.1Single.exe](#))

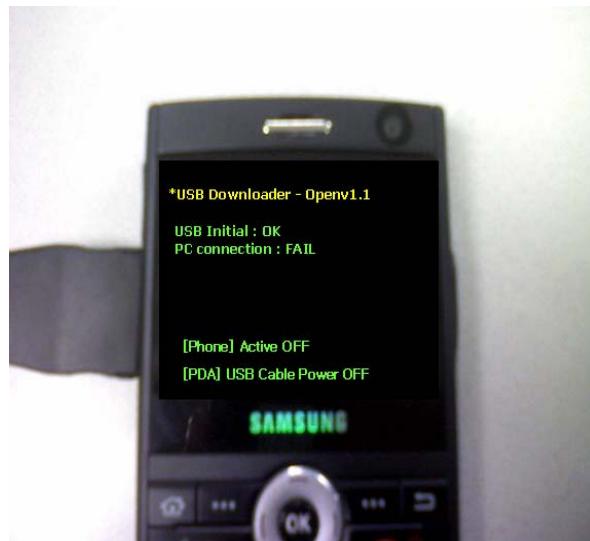

- How to connect the device to your host computer.

- Make sure that '**SAMSUNG Composite USB Driver**' should be installed in your computer.
- Connect your device to the host computer by using **MSM USB cable**.
- Select the binary files by using Eboot, PDA and PHONE buttons.

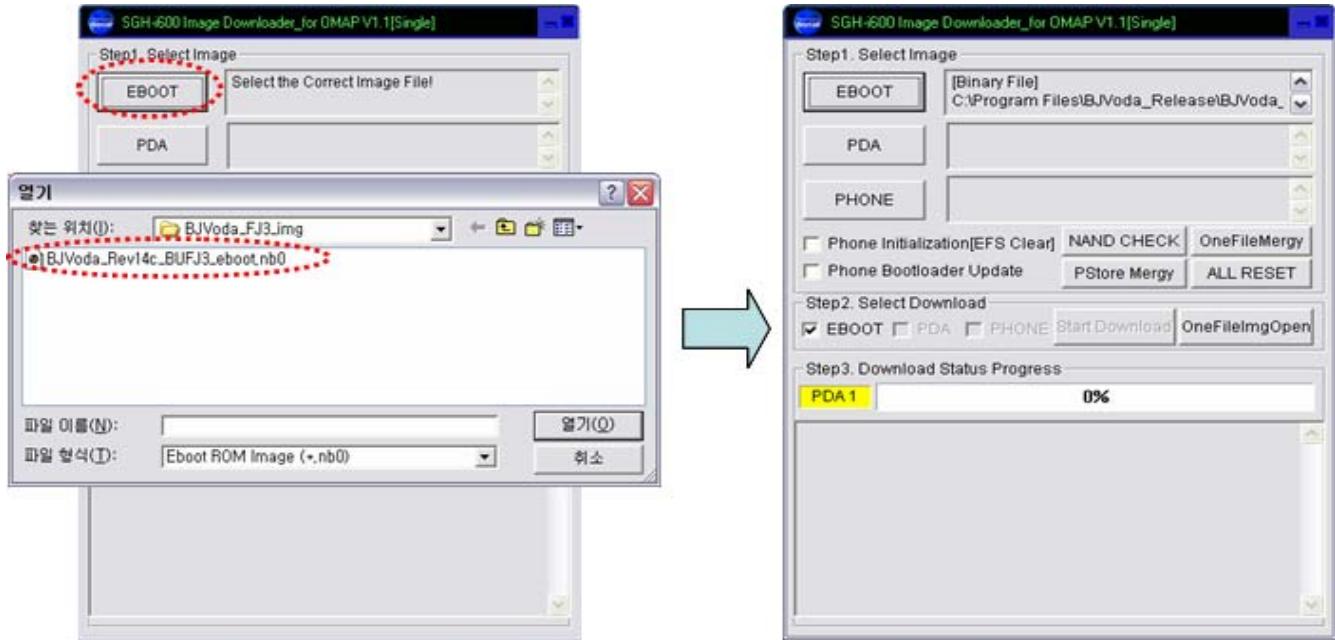

- Turn on your device to enter download mode when you press Fuction key and Soft 2 key simultaneously.

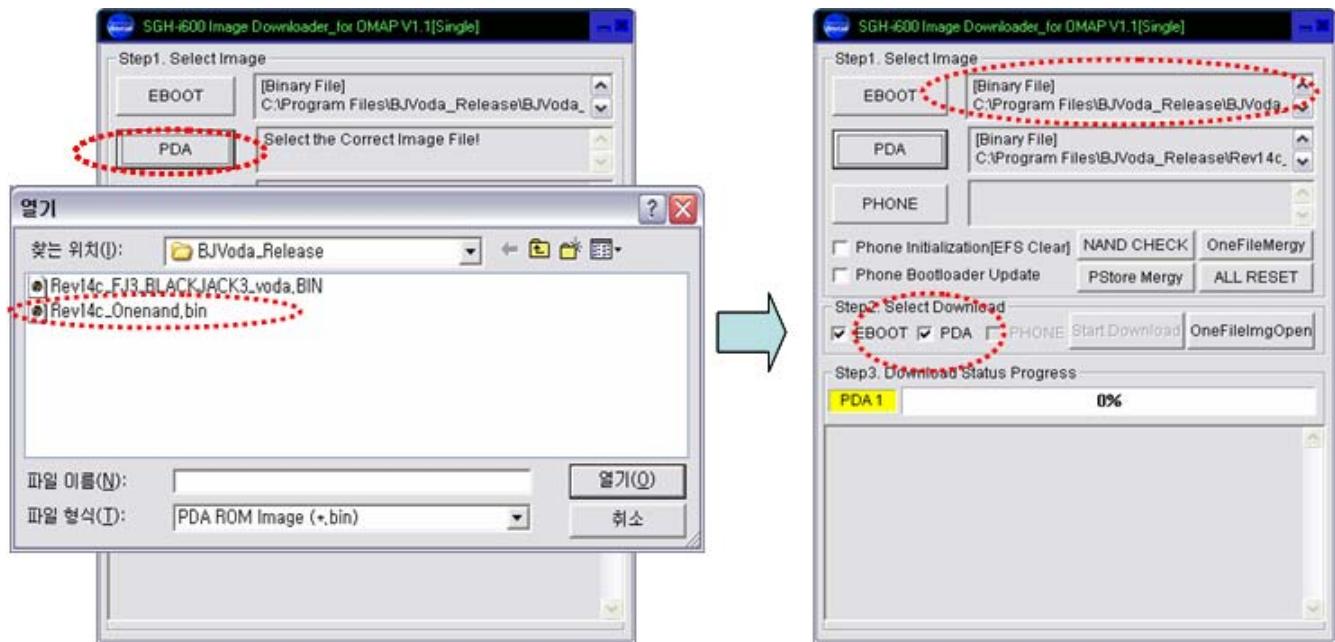

- You can see the upper picture when the connection is failed.  
- Retry to connect the device with your host computer.

- Load the binary download program by executing the "WCEDownloader v1.1Single.exe"

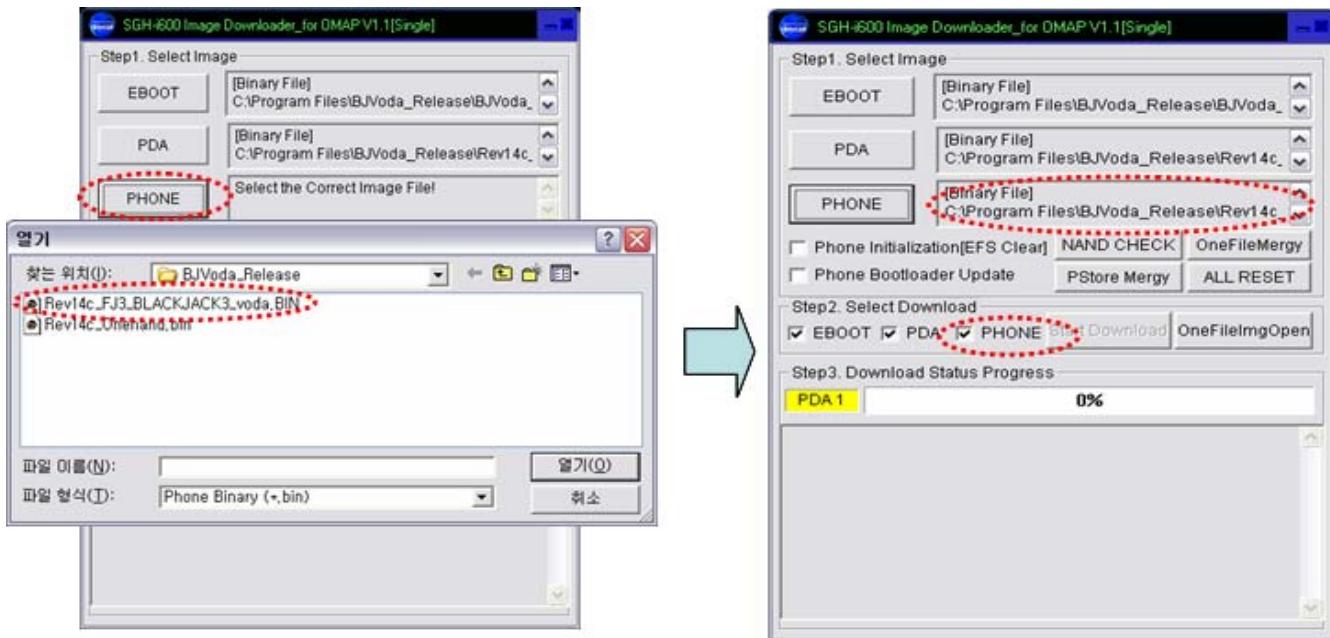

1. First select the bootloader image by clicking the EBOOT button. The Eboot Checkbox will be activated.

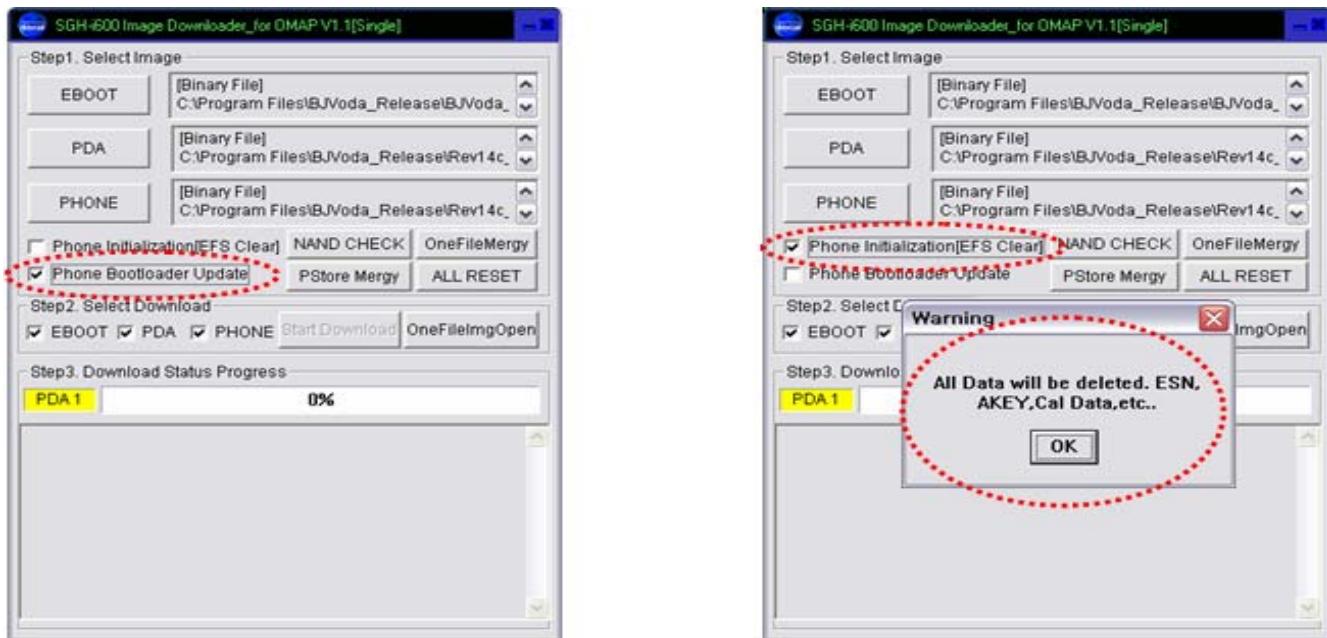

2. Click the PDA Button to select the PDA image, then the PDA checkbox will be activated.

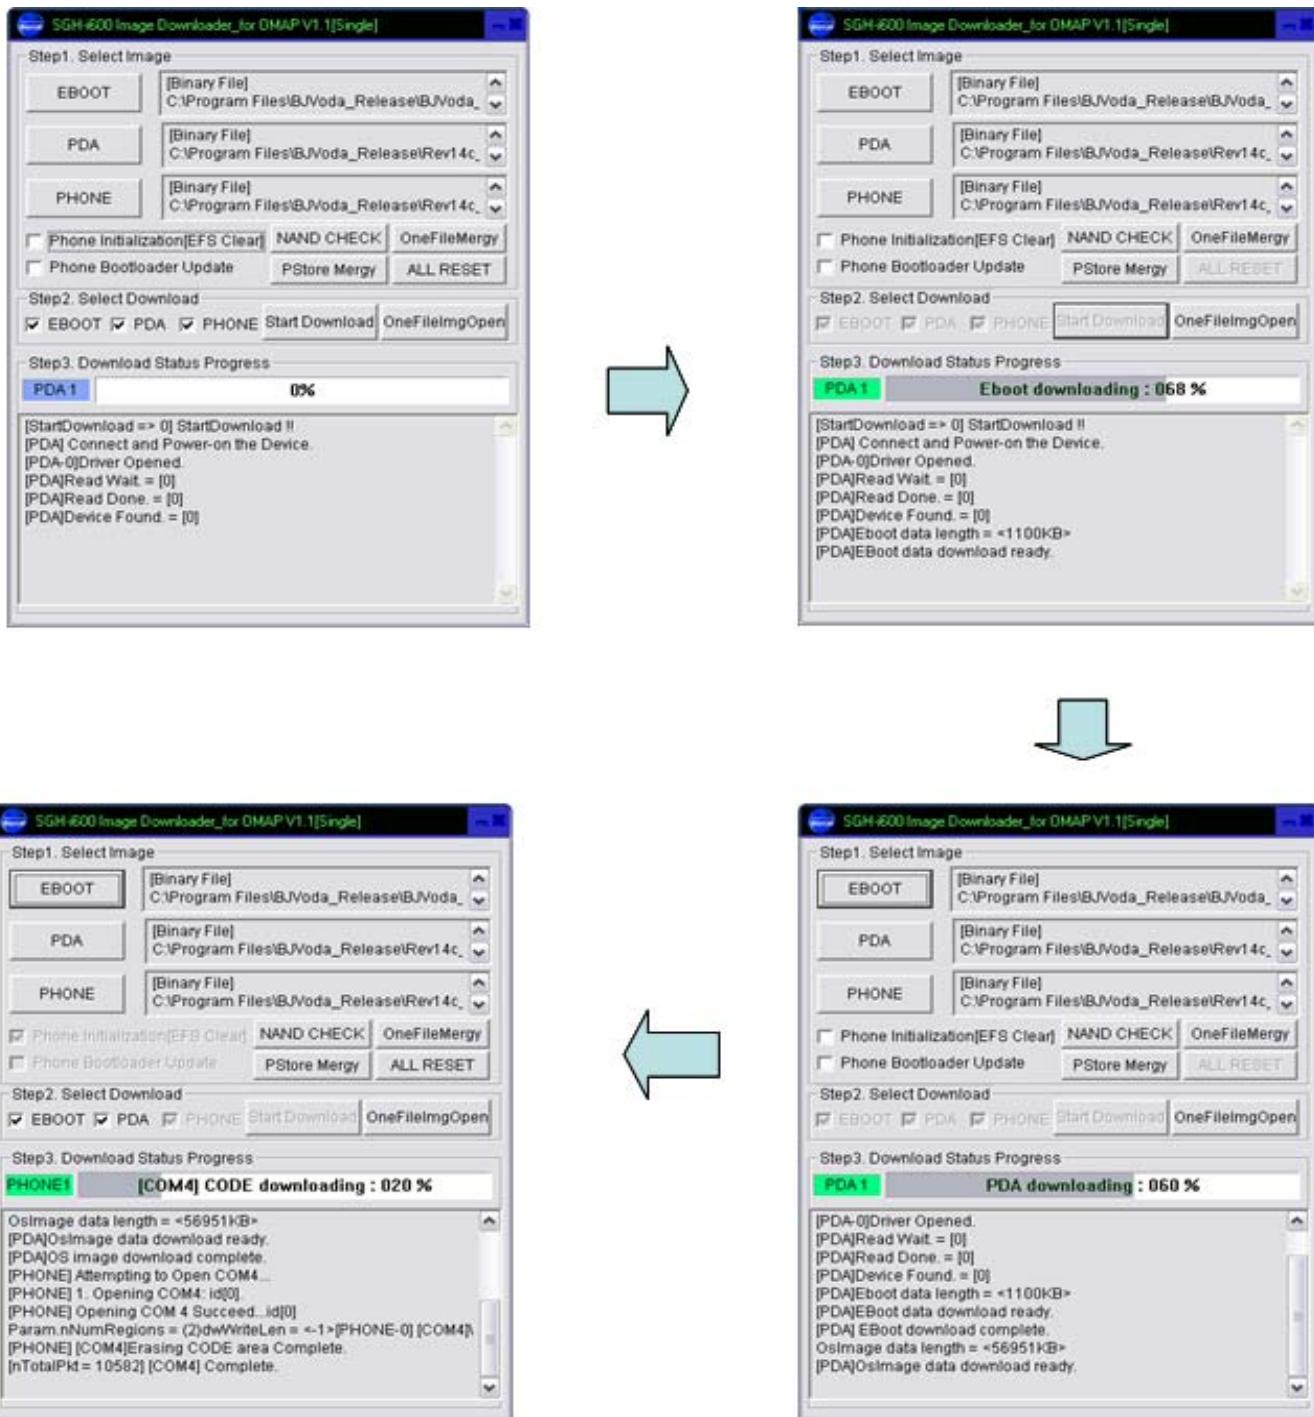

- Click the PHONE Button to select the PHONE image, then the PHONE checkbox will be activated.

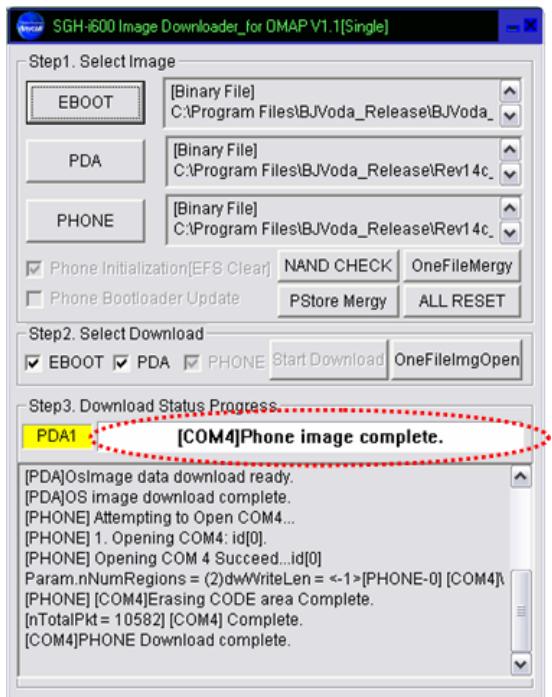

- If you need to update phone bootloader, you should check the 'Phone Bootloader Update' checkbox. So does 'EFS Clear'.

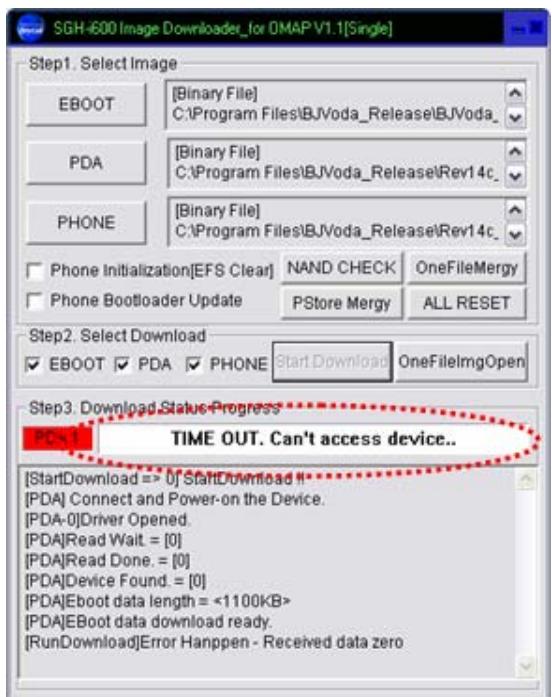

5. If the device connected with the host PC, the color of progress bar will be changed with blue. In that time, You can push the start button to download the binary image.

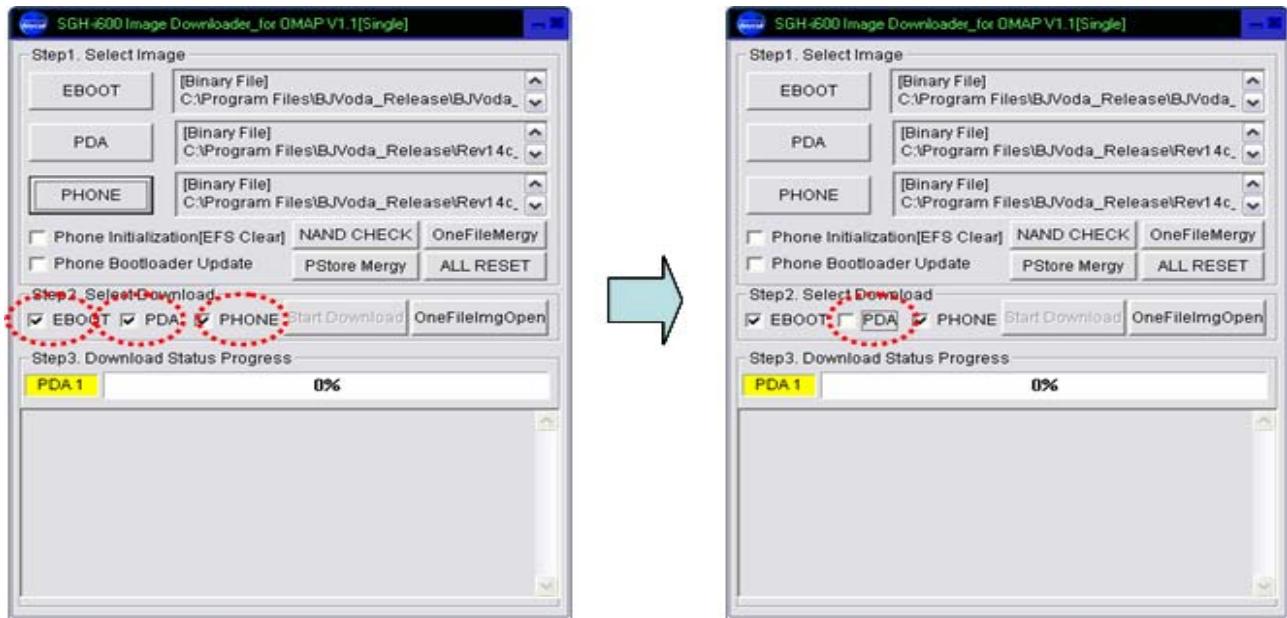

6. You can see the below picture, when it is done. And the device will be rebooted.  
If your device is turned on successfully, every downloading procedure is finished.

7. If some error occurs, You have to restart download program or push the all reset button.

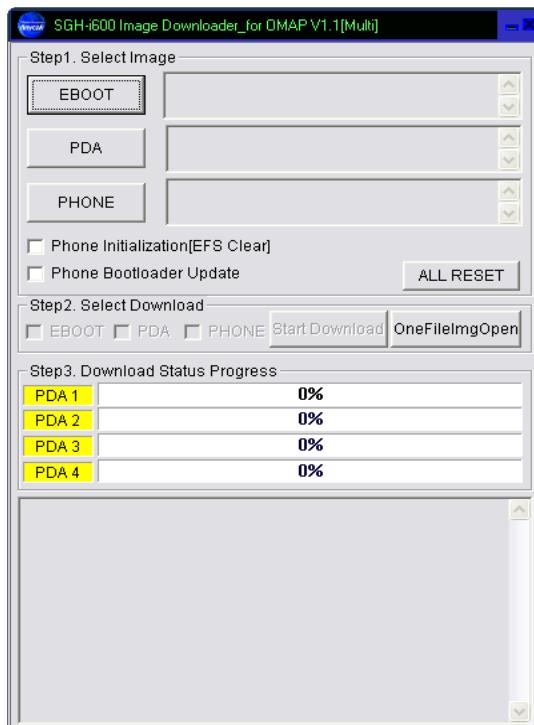

8. If you want to omit to download PDA image, you can release the PDA check box. And Eboot, Phone download are the same as this.

#### 4-2-4. Multi Download ([WCEDownloader v1.1.exe \(multidownloader\)](#))

- Multi-download is almost same as single download.

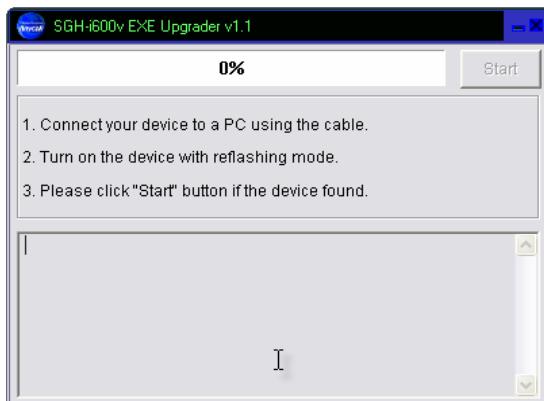

■ The difference is below.

1. There are four progress bars. It means you can download four devices at once.
2. The device will be rebooted automatically after download. In that time, 'MITs USB RNDIS Driver' is not detected in the host PC. It means you can't use the active sync program. So Make sure that you have to restart the device after first booting.

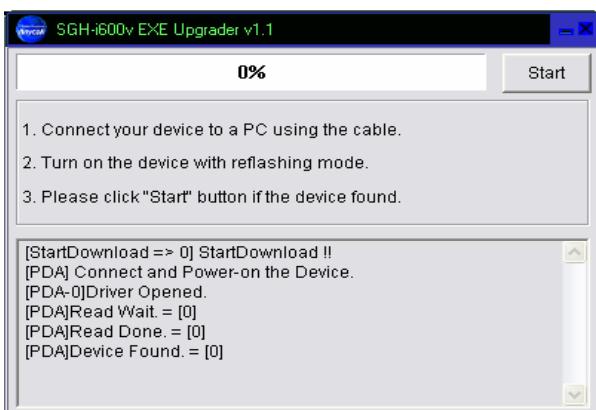

#### 4-2-5. USER ROM Upgrader ([\[unknown\].exe](#))

■ This program is to update user's device.

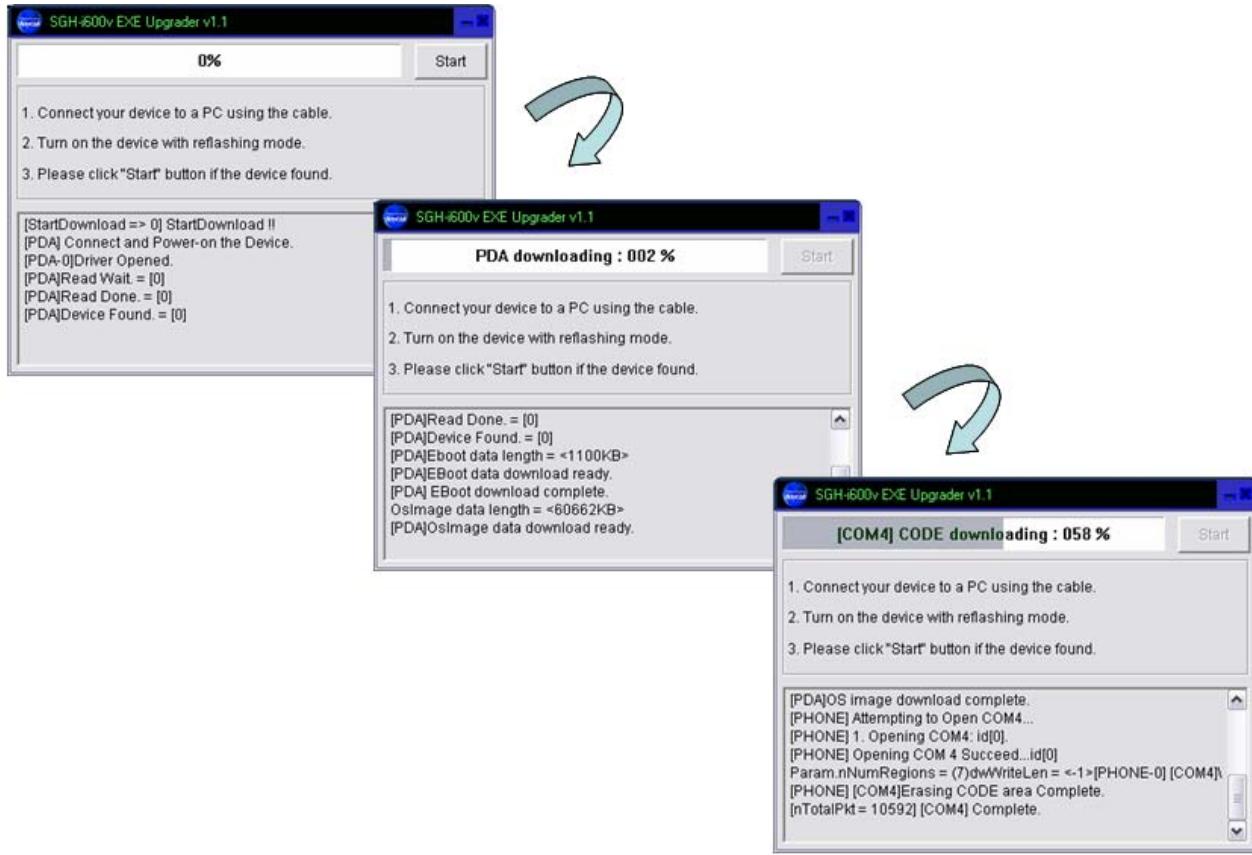

■ Execute the "[\[unknown\].exe](#)"

1. Connect with the host PC.

- If the connection is succeeded, 'Start' button will be activated.
- Press 'Start' button to upgrade your ROM image.

## 2. Download Procedure

1. EBOOT downloading

2. PDA downloading

3. Phone downloading

\*If some error happens, you must download again

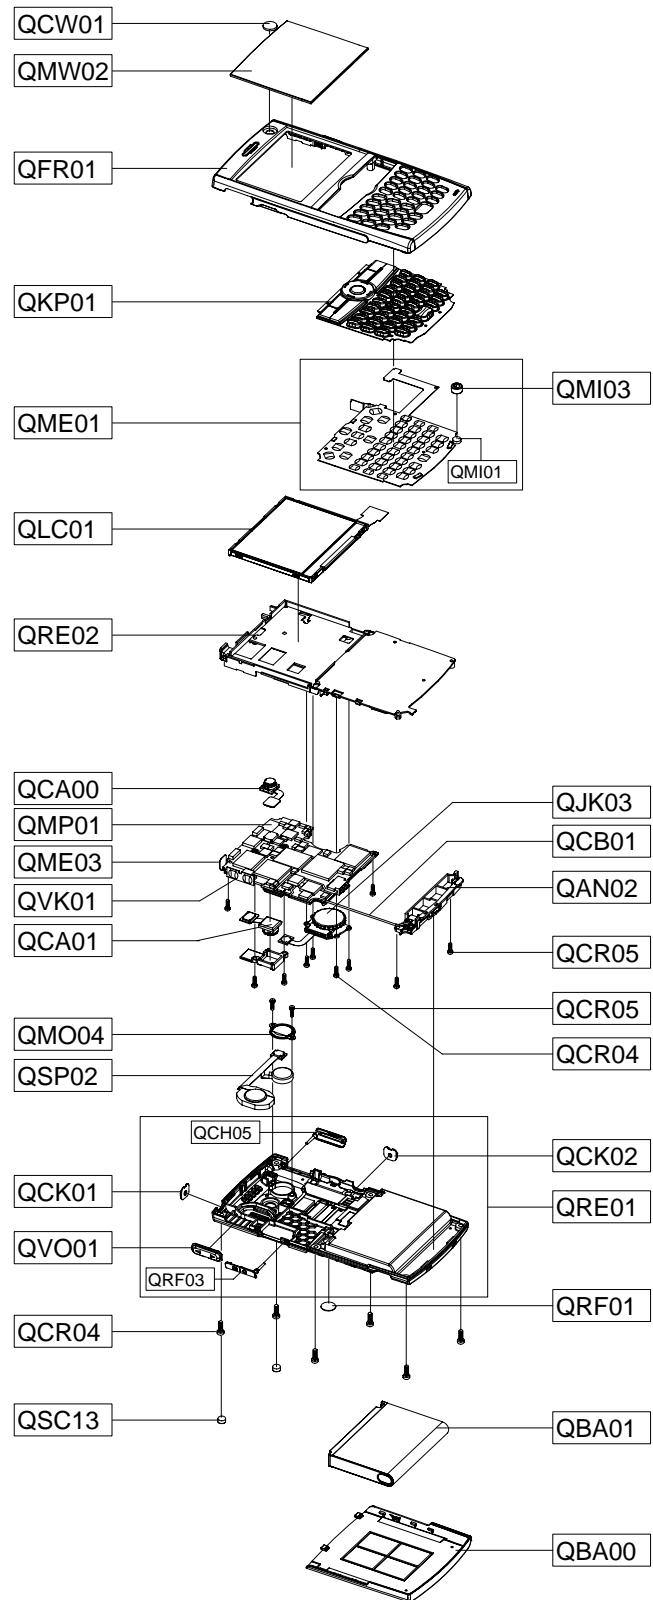

- You can see the next picture when it is done. And the Device will be rebooted.
- If your device is turned on successfully, every downloading procedure is finished.

## 3. Download is completed.

## 5. Exploded View/Disassembly&Assembly Instructions

### 5-1. Cellular phone Exploded View

## 5-3. Disassembly and Assembly Instructions

### — Disassembly

1

- 1) Disassemble the screw caps using the tweezers.

2

- 1) Unscrew six points in the Rear Case.

1) Notice that the Rear Case should not be in damage.

1) Notice that the Rear Case should not be in damage.

\* Rear screw specification : M1.4, L4

3

- 1) Disjoint the Rear Case from the lower part of the set.

4

- 1) Disjoint SPK-MOTOR connector.

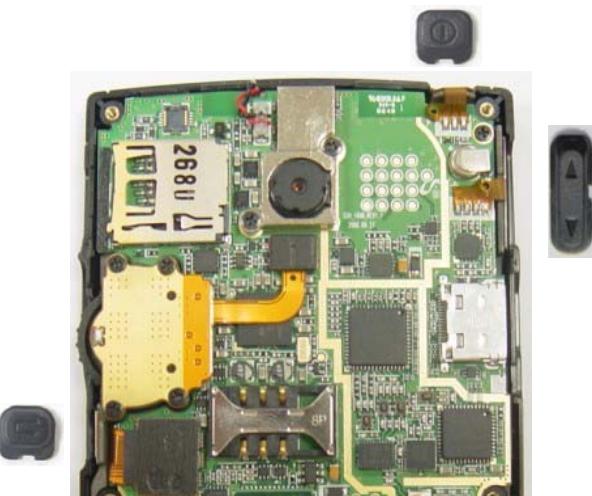

1) Disjoint shaking to right and left as the Cases can be damaged in case of take off strongly.

1) Notice that the F-PCB should not be in damage.

**5**

- 1) Detach POWER KEY, VOLUME KEY, and FUNCTION KEY.

**6**

- 1) Disjoint the RECEIVER connector.

- 1) Notice that the Front Case and other components should not be in damage.

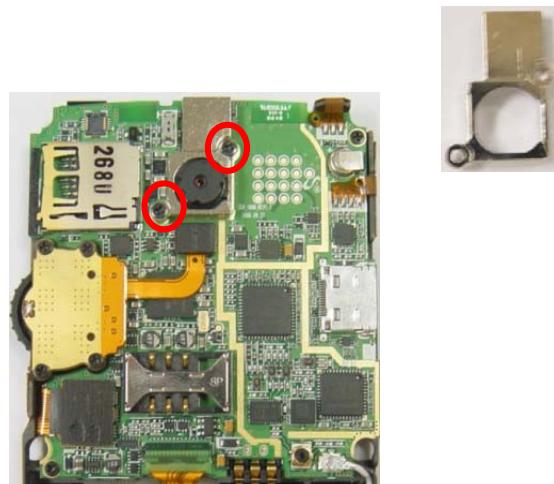

- 1) Notice that connector pin should not get bent.

**7**

- 1) Separate the Front Case and the PBA catches and lifts below antenna.

**8**

- 1) Unscrew 1.3M CAMERA BRACKET and separate the BRACKET from the PBA.

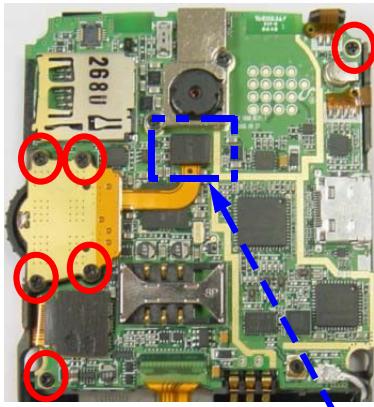

- 1) Notice that other material should not be inserted to LCD and WINDOW.

- 1) Notice that components around the screw should not be in damage.

\* 1.3M CAMERA BRACKET screw spec. : M1.4, L4

9

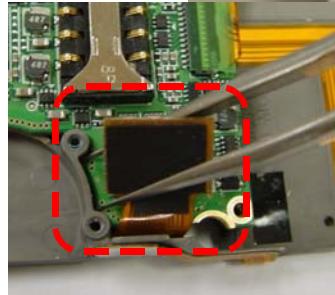

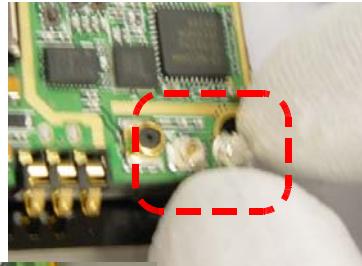

- 1) Unscrew six points in the WHEEL KEY and the PBA.

- 2) Disjoint the WHEEL KEY connector.

10

- 1) Disjoint the INTENA connector.  
2) Disjoint the LCD connector.

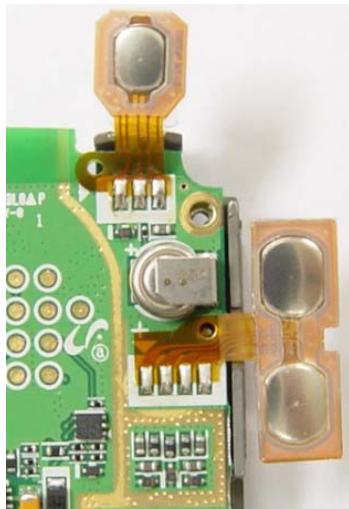

- 1) Notice that components around the screw should not be in damage.  
2) Notice that the WHEEL KEY F-PCB should not be in damage.

\* WHEEL, PBA screw spec. : M1.4, L3

11

- 1) Detach the POWER KEY and VOLUME KEY F-PCB using the tweezers.

- 1) Notice that the double-side tapes and shield-can should not be in damage.  
2) Notice that the F-PCBs should not be in damage.

12

- 1) Detach the KEY F-PCB connector insulation tape using the tweezers.  
2) Disjoint the KEY F-PCB connector.

- 1) Notice that the KEY F-PCB should not be in damage.

**13**

- 1) Separate the shield-can and the PBA.

**14**

- 1) Unscrew two points in the INTENNA.  
2) Detach the INTENNA Wire from the shield-can.

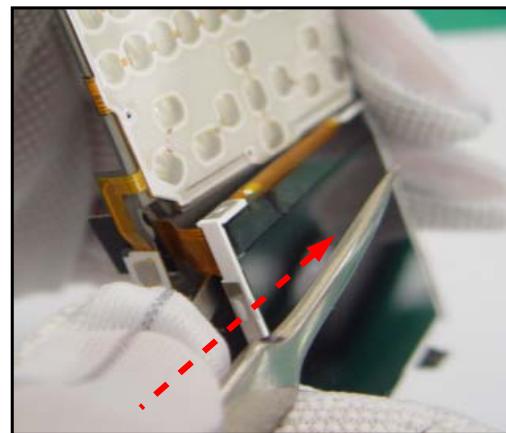

- 1) Notice that components of the PBA should not be in damage

**15**

- 1) Insert tweezers into the backside of the LCD module and detach the double-stick tape as shown in the figure.

**16**

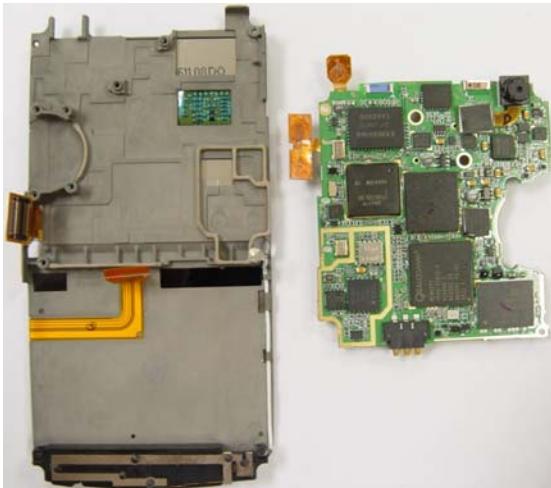

- 1) Insert tweezers into the backside of the LCD module and detach the double-stick tape as shown in the figure.  
2) Disjoint LCD module.

## — Assembly

1

- 1) Connect the 1.3M and VGA CAMERA to connector on the PBA.

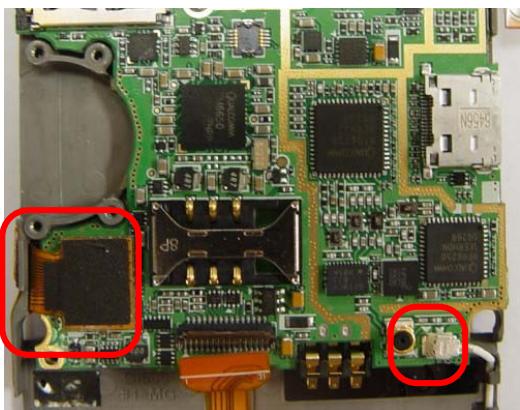

2

- 1) Put PBA for shield-can.

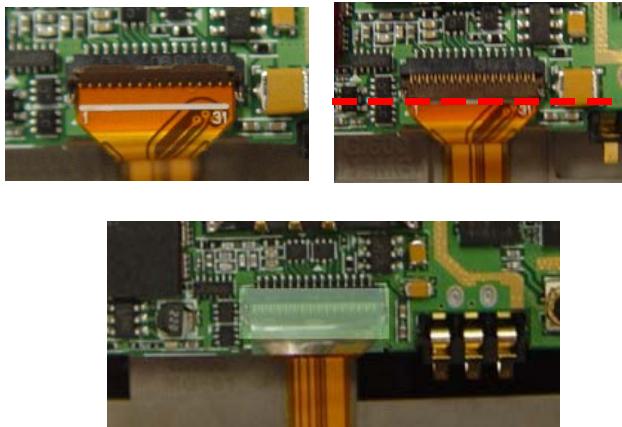

3

- 1) Attach the LCD connector and the INTENNA connector.

4

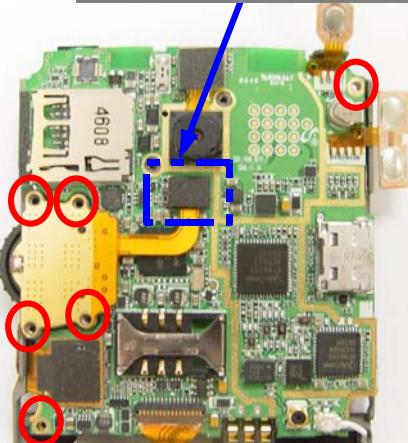

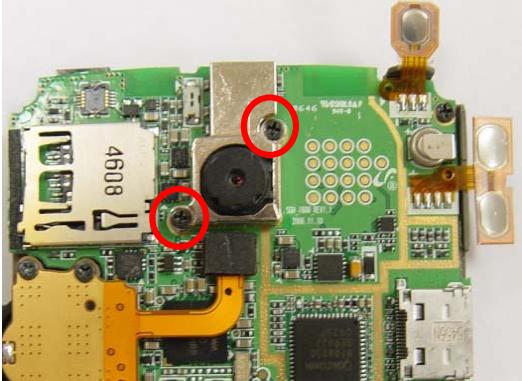

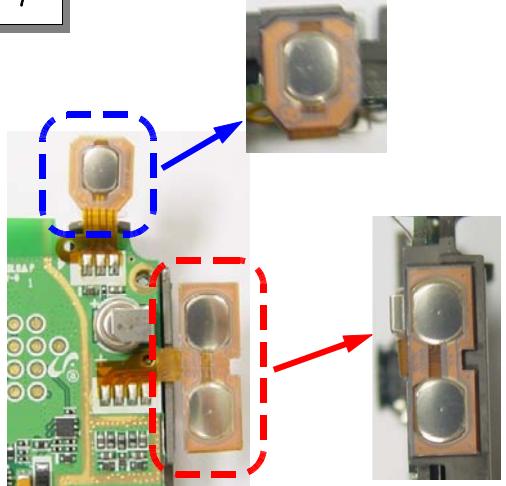

- 1) Connect the KEY F-PCB and attach the insulation tape on the connector.

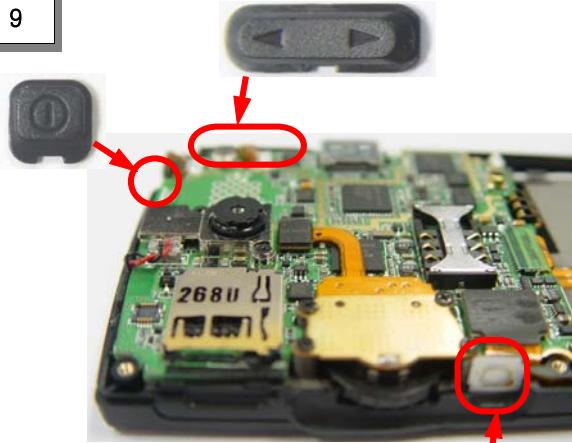

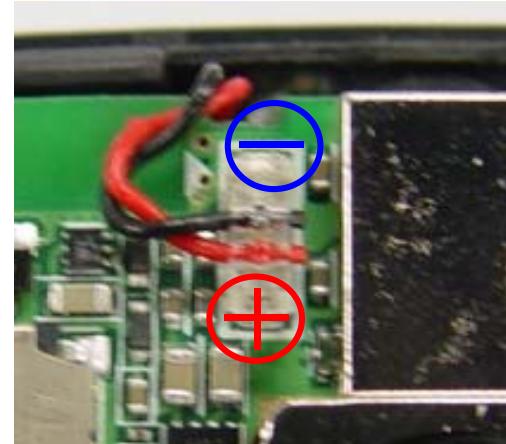

- 1) Notice that components around the connector should not be in damage.

- 2) Press connector so that is sonant 'Exactly' vertically.

- 1) Put deeply KEY connector so that reach to white line.

- 2) Insulation tape covers whole so that connector may not come out.

<p><b>5</b></p> <p>1) Connect the WHEEL KEY to the connector on the PBA.</p>  <p>2) Screw six points in the WHEEL KEY and the PBA.</p>	<p><b>6</b></p> <p>1) Assemble the 1.3M CAMERA BRACKET. 2) Screw two points in the CAMERA BRACKET.</p> 
<p>1) Press WHEEL KEY connector so that is sonant 'Exactly' vertically. 2) Notice that components around the screw should not be in damage. ※ WHEEL, PBA screw spec. : M1.4, L3</p>	<p>1) Notice that components around the screw should not be in damage. ※ 1.3M CAMERA BRACKET screw spec. : M1.4, L4</p>
<p><b>7</b></p>  <p>1) Attach the VOLUME KEY and POWER KEY F-PCB in accordance with the groove.</p>	<p><b>8</b></p>  <p>1) Check the Front Case and the PBA set.</p>
<p>1) Observe as KEY tension can grow worse in case of escapes and attaches groove.</p>	<p>1) Check the RECEIVER and KEY PAD setting.</p>

<p><b>9</b></p>  <p>1) Put PBA inside the Front Case. 2) Attach POWER KEY, VOLUME KEY, and FUNCTION KEY.</p>	<p><b>10</b></p> <p>1) Joint the RECEIVER connector.</p> 
<p>1) Notice that other material should not be inserted to LCD and WINDOW. 2) KEY's groove does so that head toward down and assembles. 3) Assemble POWER KEY, FUNCTION KEY carving a seal after is rapidly.</p>	<p>1) Make the RECEIVER wire groove that gouge the PBA. 2) Observe in polarity of the RECEIVER connector.</p>
<p><b>11</b></p> <p>1) Joint SPK-MOTOR connector.</p> 	<p><b>12</b></p> <p>1) Assemble the Rear Case with the Front Case.</p> 
<p>1) Press SPK-MOTOR connector so that is sonant 'Exactly' vertically.</p>	<p>1) First, assemble top portion Locker, and both side. 2) Press with hand in case of the top portion does not fit certainly after assembly.</p>

**13**

1) Screw six points in the Rear Case.

**14**

1) Assemble the screw caps using the tweezers.

1) Notice that the Rear Case should not be in damage.

\* Rear screw specification : M1.4, L4

1) Notice that the Rear Case should not be in damage.

## 10. Reference data

---

### Reference Abbreviate

- **ARFCN** : Absolute Radio Frequency Channel Number
- **BGA** : Ball Grid Array
- **DCS** : Digital Communications System
- **DL** : Downlink
- **EFS** : Embadded File System
- **EGSM** : Enhanced Global System for Mobile Communications
- **FTP** : File Transfer Protocol
- **HPSK** : Hybrid Phase Shift Keying
- **Mcps** : Mega-chips per second
- **MMS** : Multimedia Messaging Service
- **MSK** : Minimum Shift Keying
- **OBEX** : OBject EXchange
- **PBA** : Panel Board Assembly
- **PCS** : Personal Communication System
- **PIM(S)** : Personal Information Management (System)
- **QPSK** : Quadrature Phase Shift Keying
- **RNDIS** : Remote Network Driver Interface Specification
- **RSS** : Received Signal Strength
- **SAW** : Surface Acoustic Wave
- **SMS** : Short Message Service
- **UL** : Uplink
- **USB** : Universal Serial Bus
- **WCDMA** : Wideband Code Division Multiple Access
