## 2-3. Disassembly

1

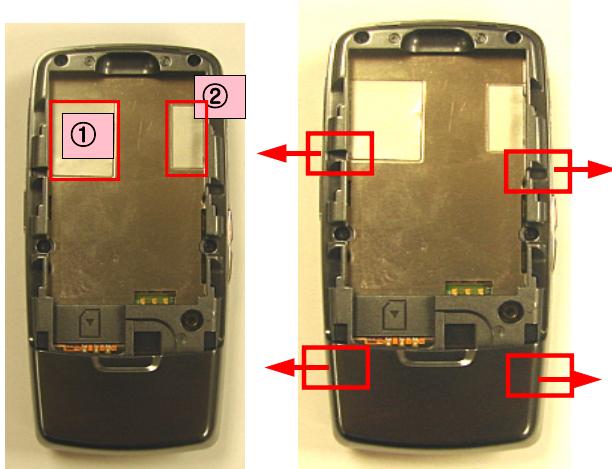

- 1) Unscrew the 4 point REAR Screws.
- 2) Extract the IF COVER.

**\* Caution**

- 1) Be careful not to scratch the appearance.

2

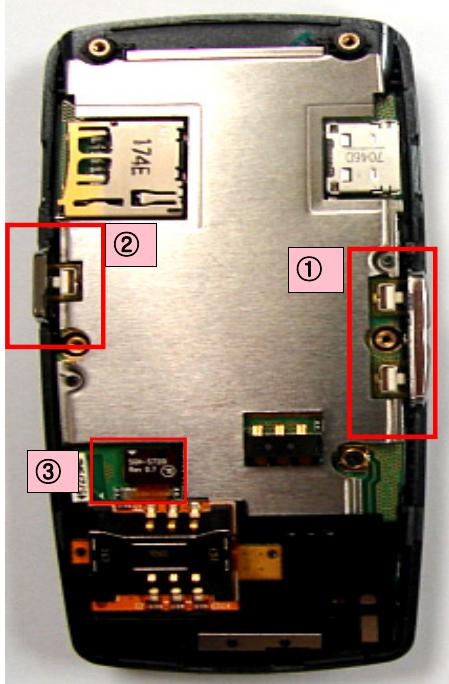

- 1) Remove the ①② tapes of Rear.
- 2) Dissolve the READ LOCKER.

**\* Caution**

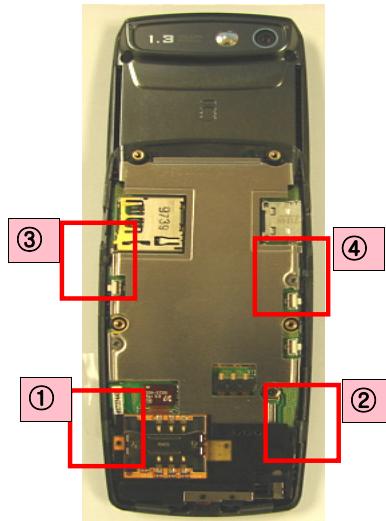

- 1) Be careful not to scratch the appearance or damage the framework.

3

- 1) Remove the VOLUME, POWER KEY.
- 2) Disconnect the SIM CONNECTOR.

4

- 1) Unlock the MAIN B'D LOCKER of lower part first, then unlock the other part.

**\* Caution**

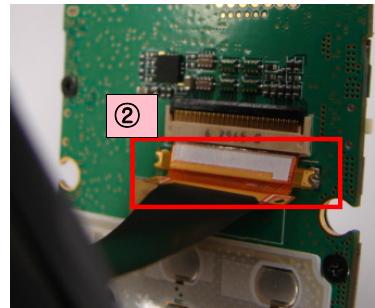

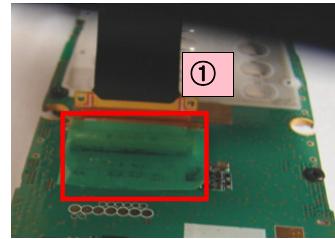

- 1) The slide should be open when dissolving the MAIN PBA.
- 2) Be careful not to cut off the slide FPCB when dissolving the MAIN PBA.

**5**

- 1) Dissolve the MAIN PBA from the main frame.

**\* Caution**

- 1) Take precaution not to cut off the slide FPCB.

**6**

- 1) Remove the protection tape.  
2) Remove the left and right SOLDER, then dissolve the F-PCB.

**\* Caution**

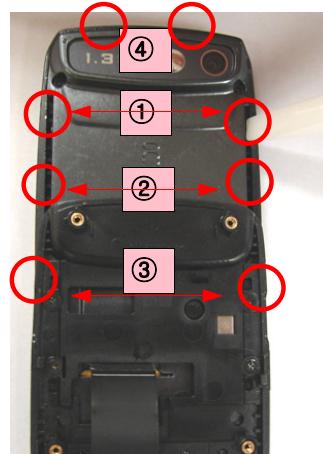

- 1) Take precaution not to cut off the slide FPCB.

**7**

- 1) Unscrew the 4 point SCREWS.

**\* Caution**

- 1) Be careful not to scratch the appearance.

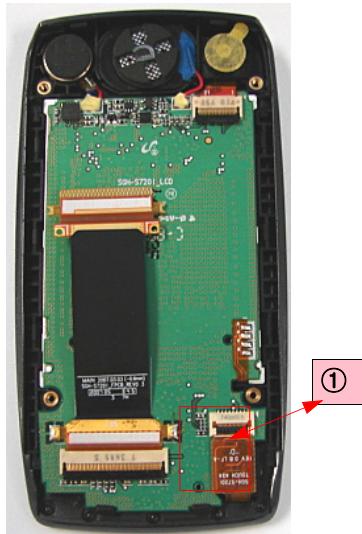

**8**

- 1) Unlock the LOCKER in numerical order from ① to ④.

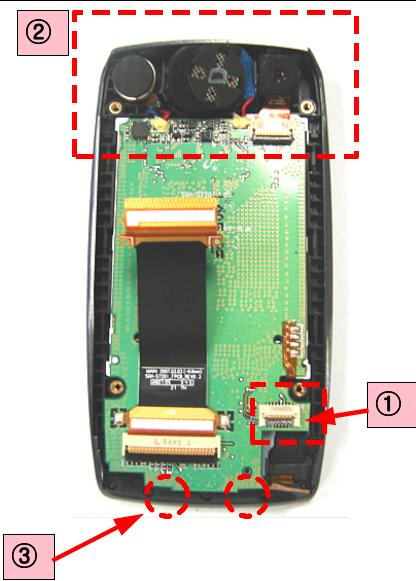

**\* Caution**

- 1) Take precaution not to damage the F-PCB.

**9**

**10**

- 1) Remove the protection tape on the touch key connector.

**\* Caution**

- 1) Be careful not to damage the slide F-PCB.

**\* Caution**

- 1) Disconnect the touch key connector.
- 2) Detach the MOTOR , SPEAKER, CAMERA.
- 3) Check the unlock of LOCKER and seperate the PBA from LCD.

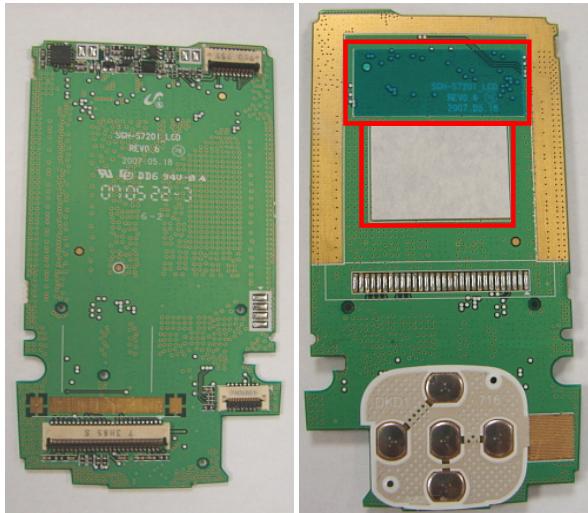

**11**

- 1) Seperate the PBA ASS'Y from LCD frame.

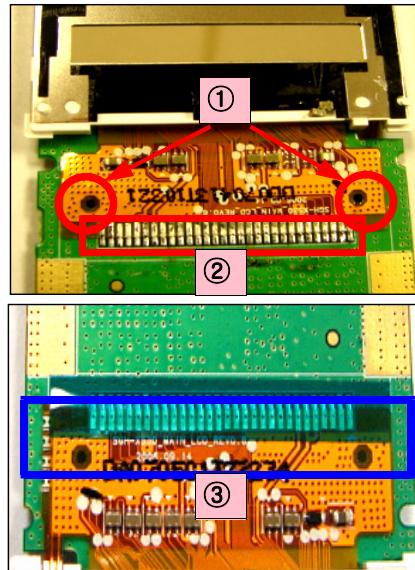

## 2-4. Assembly

1

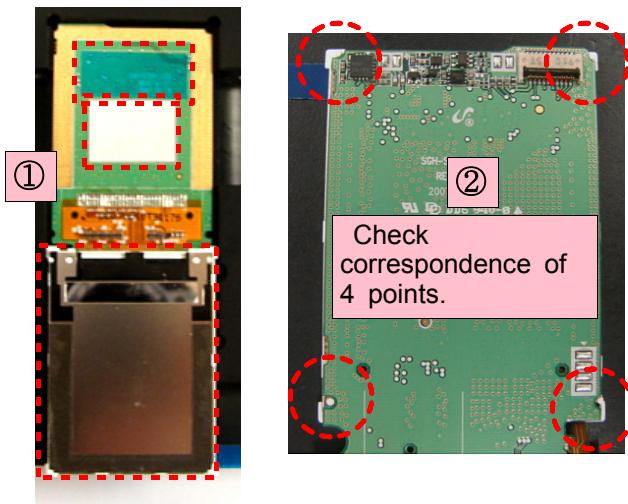

1) LCD PBA

2

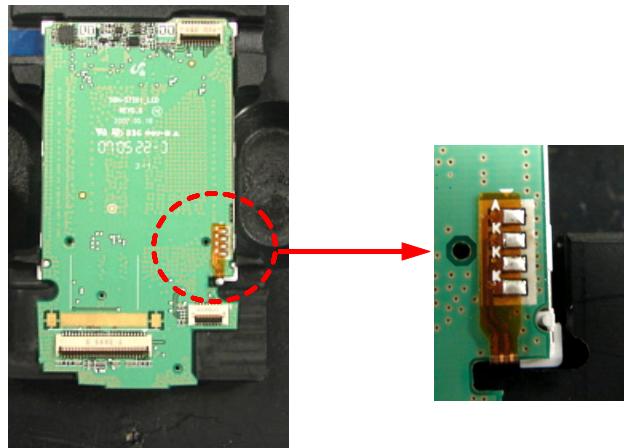

- 1) Correspond the LCD module FPCB to guide holes.
- 2) Solder the LCD PBA and LCD FPCB together.
- 3) Attach the protection tape on LCD FPCB soldering.

3

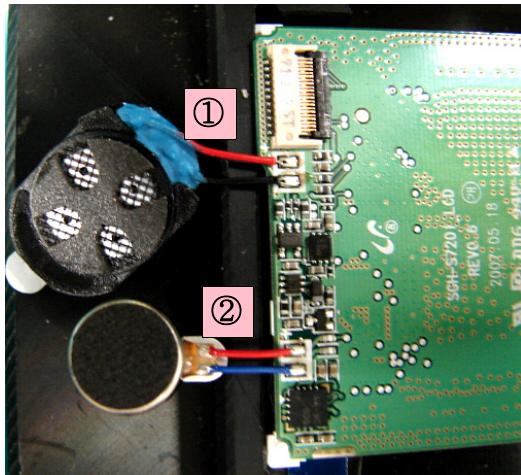

- 1) Remove the release papers as shown in Figure ①. (3 points)
- 2) Check correspondence of 4 points after assembling LCD to PBA as shown in Figure ②.

4

- 1) Solder LCD BACKLIGHT FPCB.

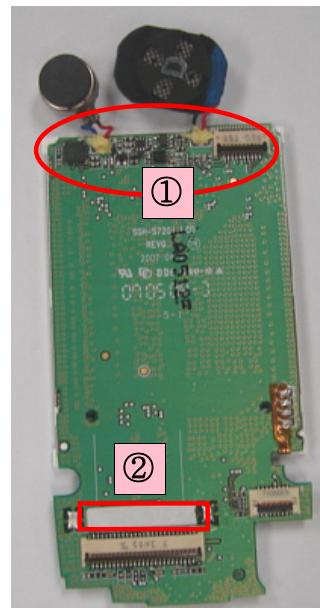

**5**

1) Solder the motor and speaker.

Confirm direction of parts and polarity before soldering.

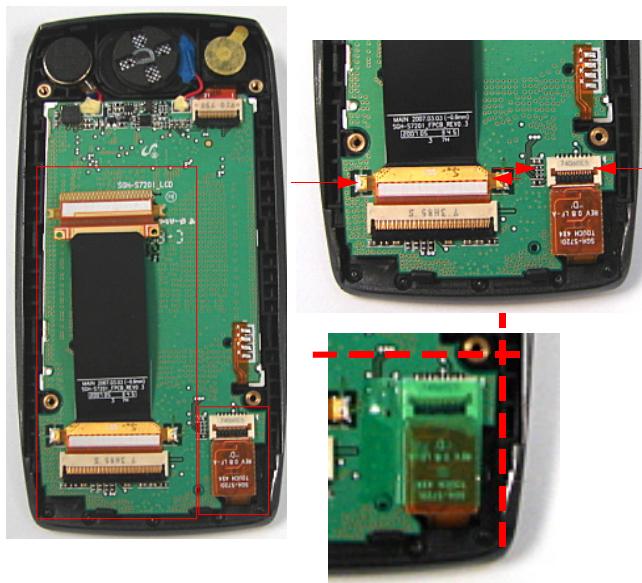

**6**

1) Work bonding operation in WIRE SOLDER area.

2) Attach the both-sided electric conduction tape.

**7**

1) Insert the slide F-PCB and touch key F-PCB to the each connector.

2) Attach the protection tape on the touch key connector.

**\* Caution**

Insert each F-PCB exactly to the each connector.

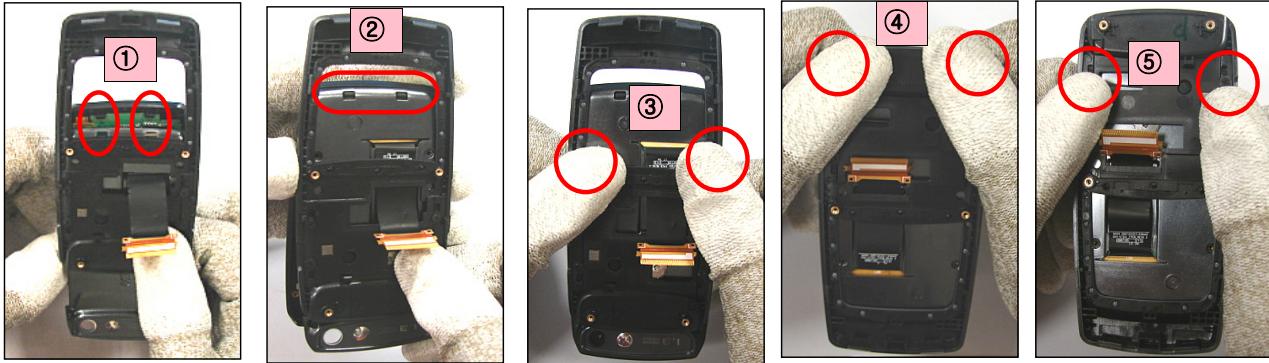

**8**

1) Put the F-PCB into the hole of main frame as the slide is down.

**\* Caution**

Take precaution not to damage the F-PCB.

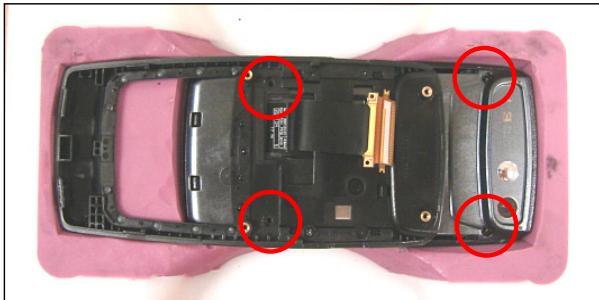

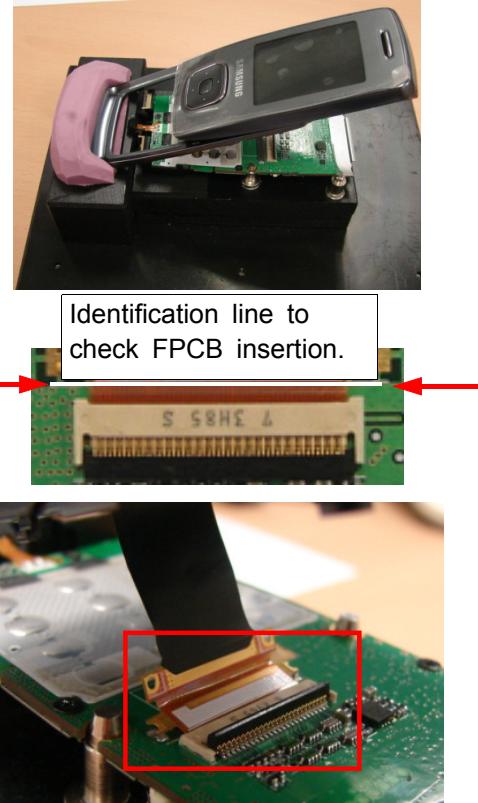

**9**

1) Lay the LOCKER of LCD PBA on top of LOWER, assemble the LOCKERS.

2) Lock the other LOCKERS as followed pictures of ③,④,⑤.

**\* Caution**

- Assemble the UPPER and FRONT when slide is open.
- Take serious precaution when locking ①.
- Be careful not the slide F-PCB to be fold.

**10****11**

1) Inserting slide F-PCB and soldering

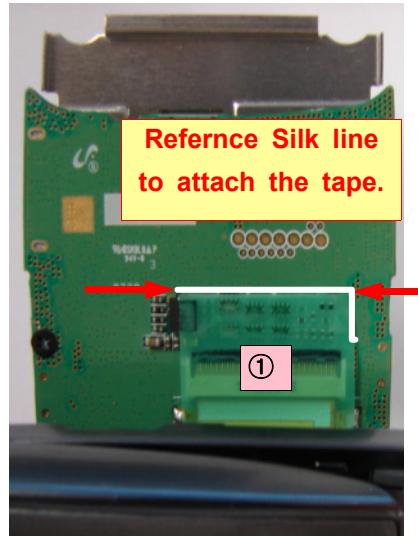

**\* Caution**

- Make sure to check the Slide F-PCB insertion exactly.
- Solder right and left F-PCB not the slide F-PCB connector to move.

1) Screw the 4 point screws.

2) Put the screw cover on top of screws in upper side.

12

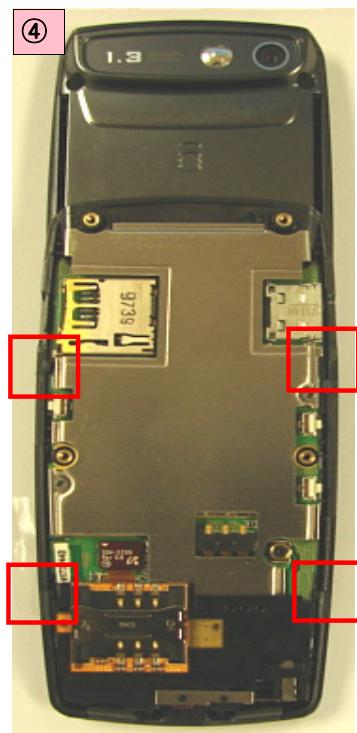

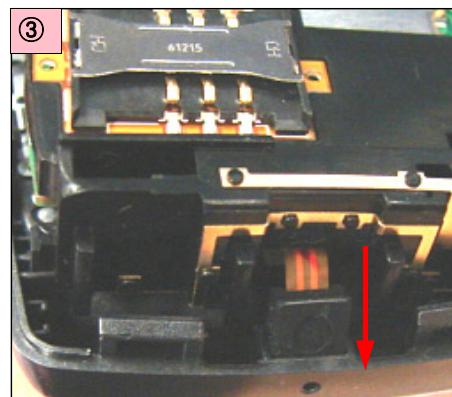

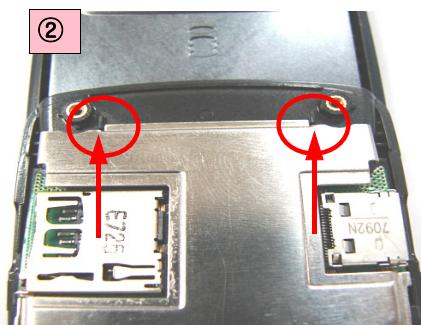

- 1) Attach the protection tape on slide F-PCB CONNECTOR.

\* Caution

- 1) Attach the tape exactly based on the silk line.

13

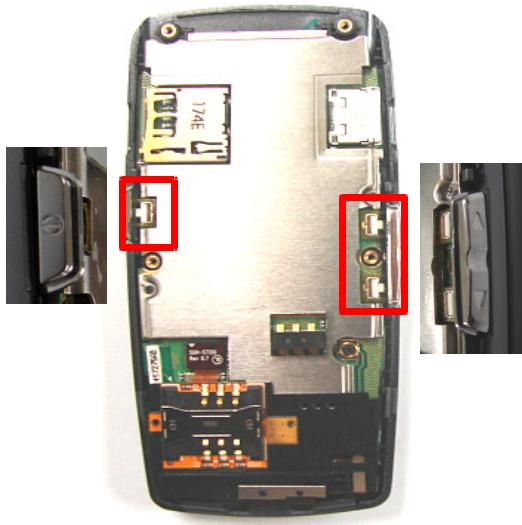

- 1) Assemble KEYPAD
- 2) Guide the upper side.
- 3) Put the MIC into MIC hole.
- 4) Assemble the PBA and lock.

\* Caution

- 1) Be careful not KEYPAD to move and to put the MIC into MIC hole.

14

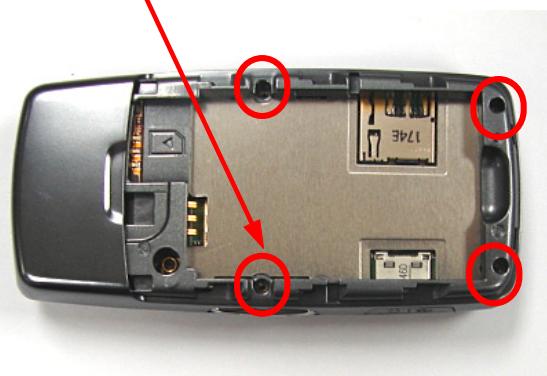

- 1) LOCK PBA Right
- 2) LOCK PBA Left
- 3)&4) Insert POWER/VOLUME KEY

**\* Caution**

- 1) Repeat slide open and close so that the F-PCB could be right position in the main frame.

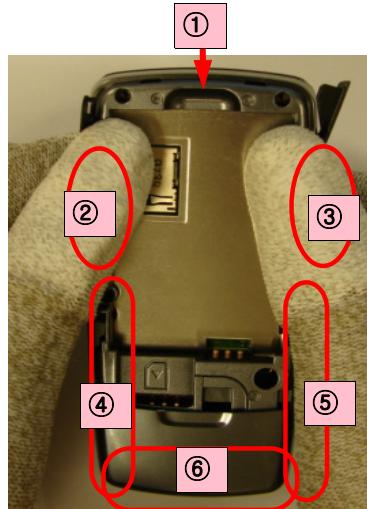

16

- 1) Screw the 4 point screws.

15

Lock the REAR LOCKERS in numerical order from ① to ⑥. The "tick-tack" sound comes when locking exactly.

- 1) Make sure the LOCKERS is locked exactly.

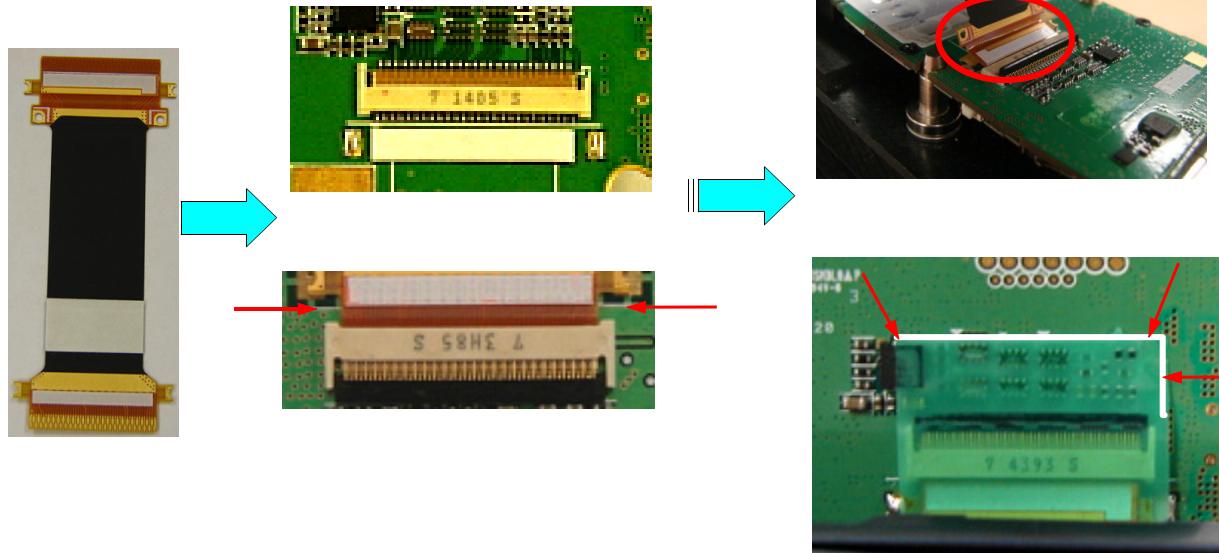

17

SD connector tape

- 1) Attach the EARJACK / SD connector tapes.
- \* Caution**
- 1) Attach tapes in the guide line.

18

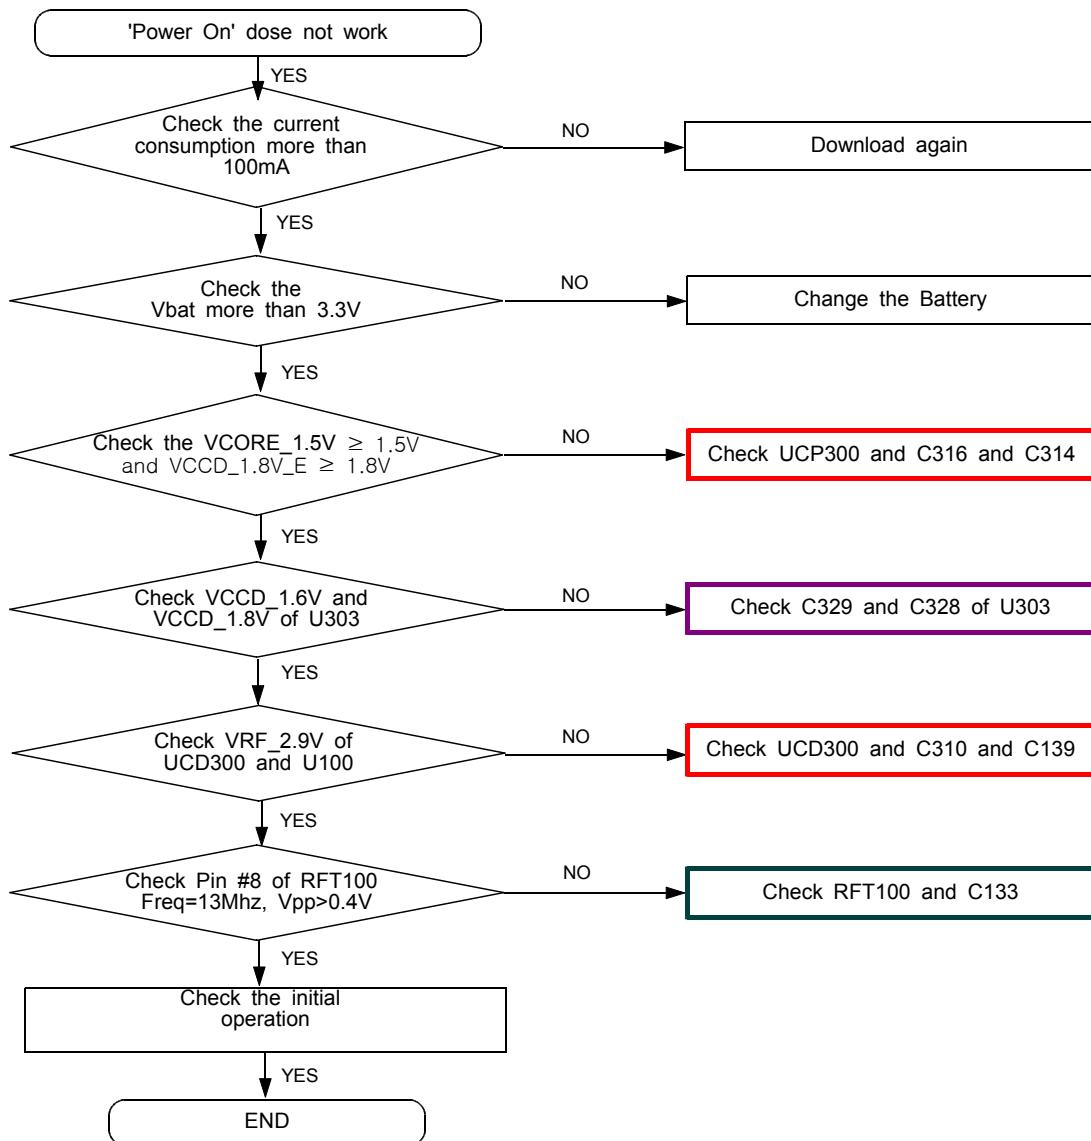

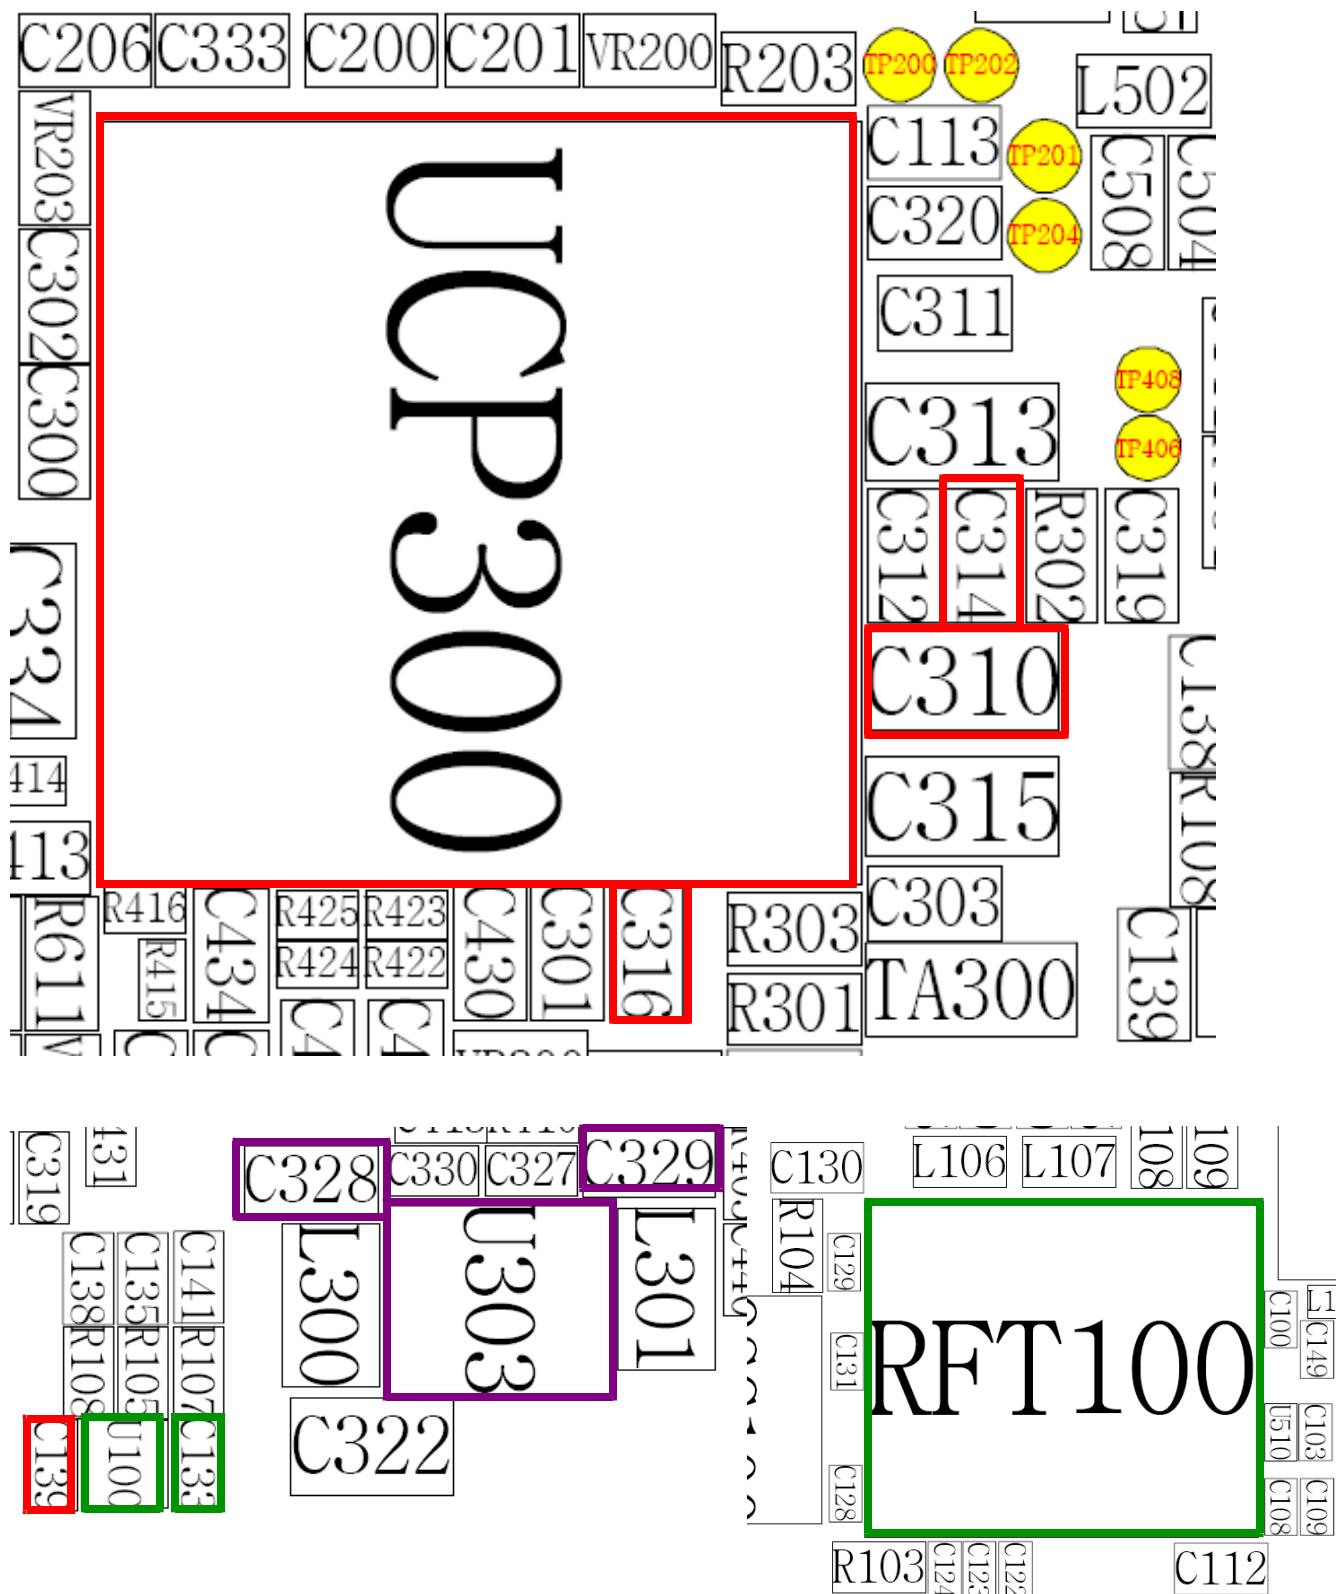

1. Remove the protection tape on conduction tape of LCD MODULE.
2. Insert LCD FPCB into connector with lined up with guide silk

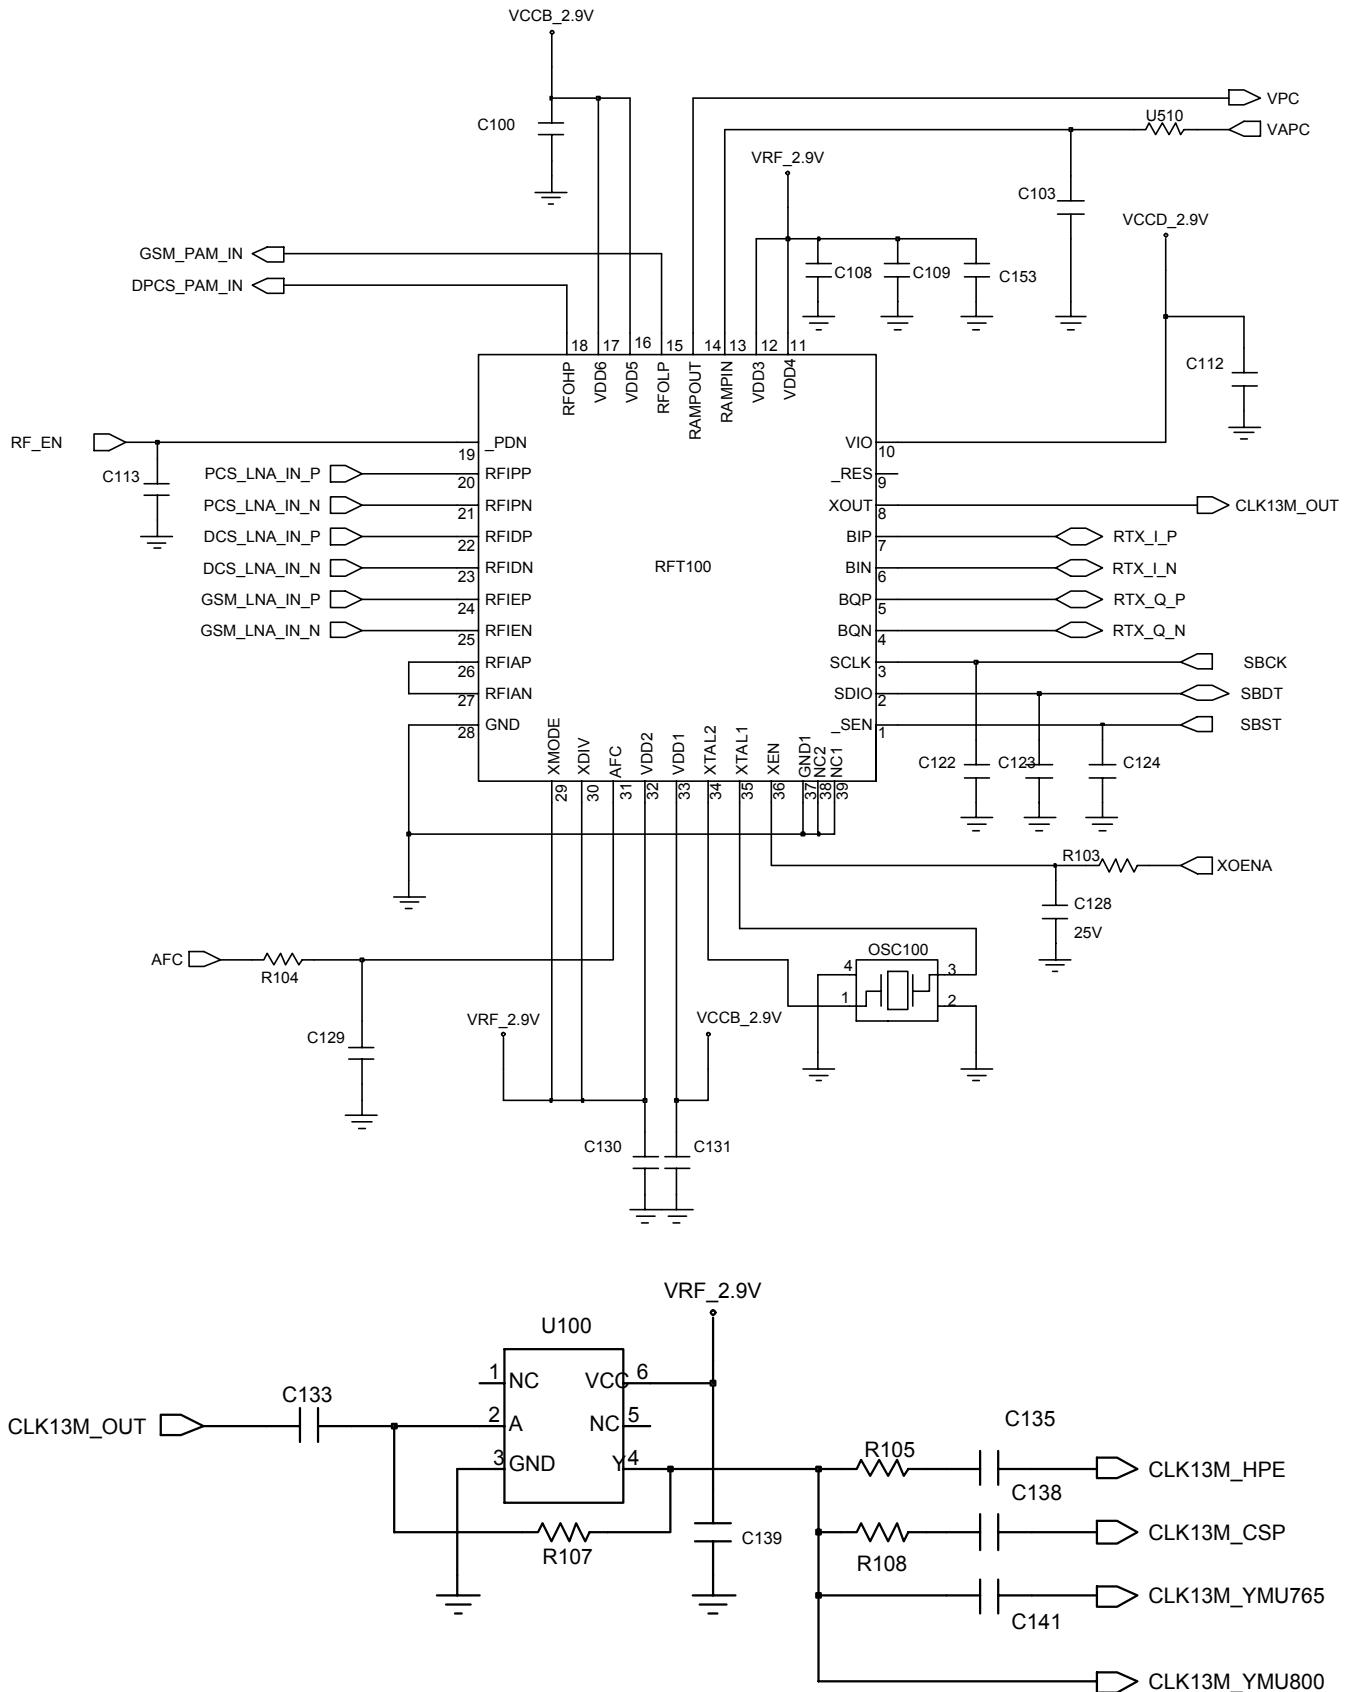

### 3. Chart of Troubleshooting

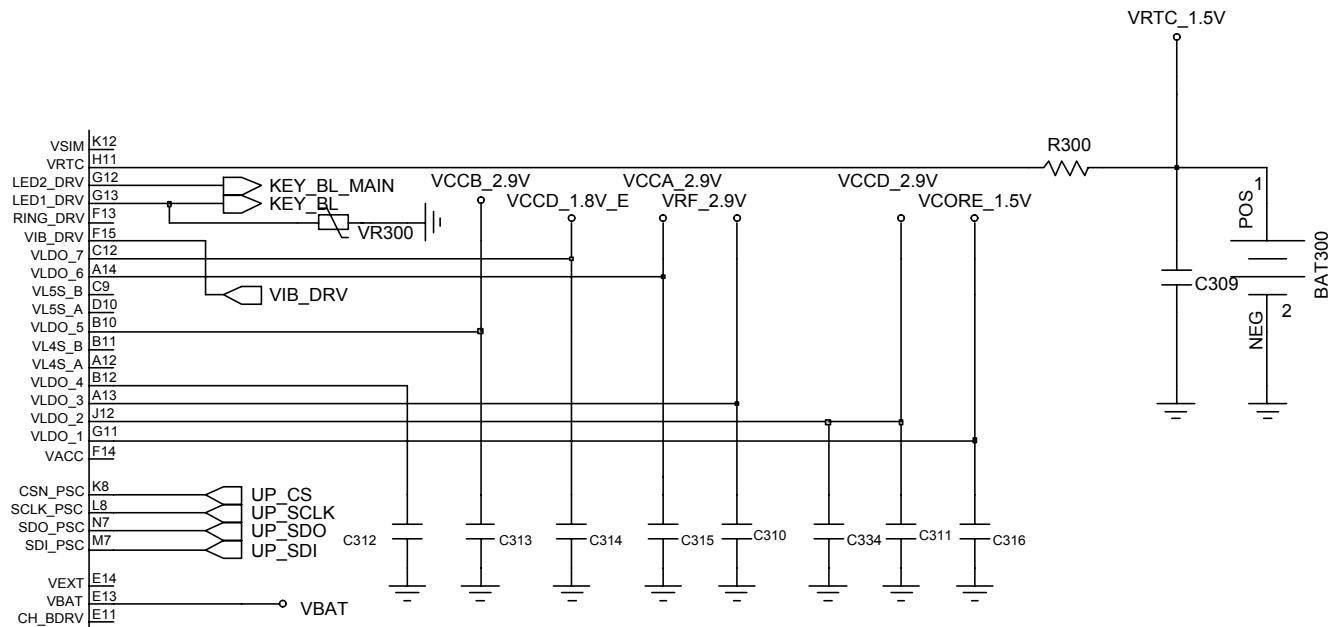

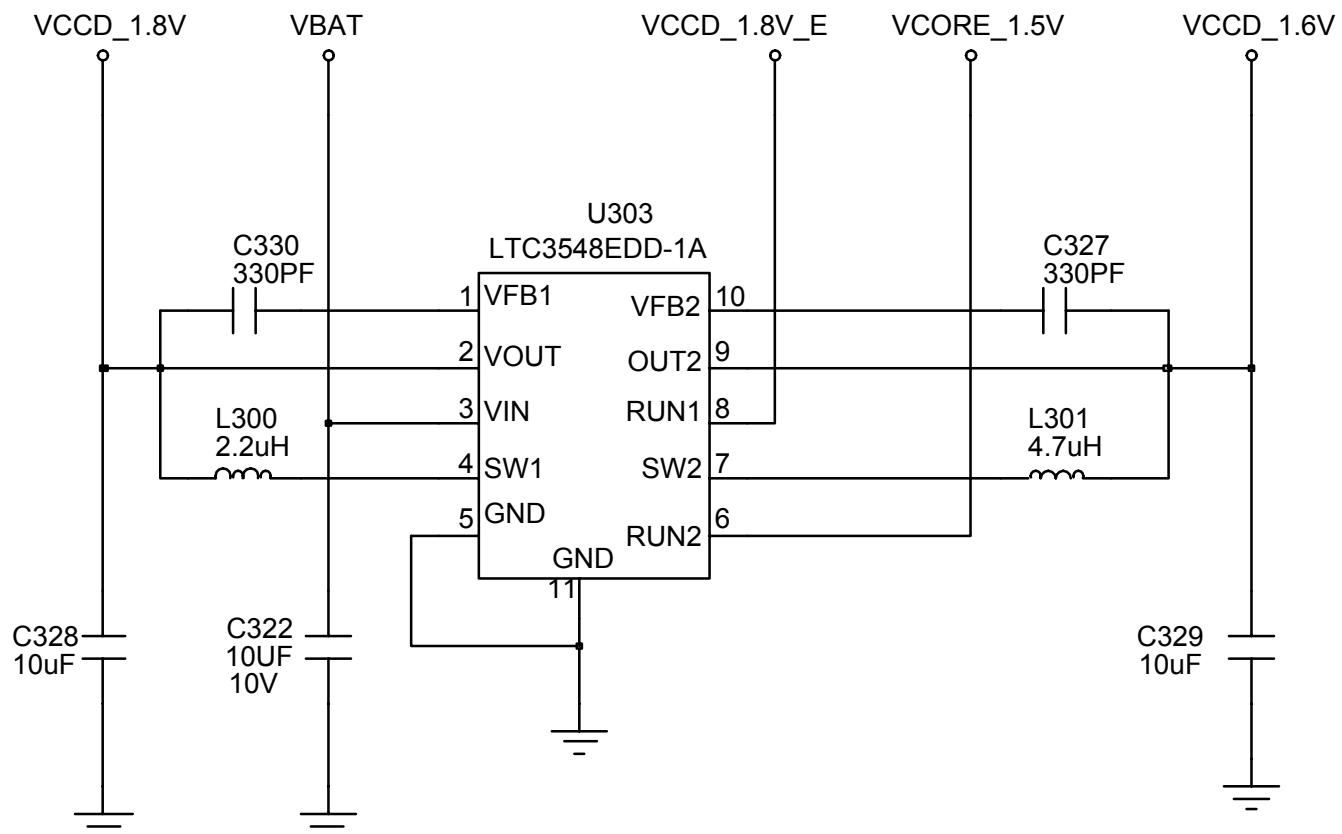

#### 3-1. Baseband

##### 3-1-1. Power ON

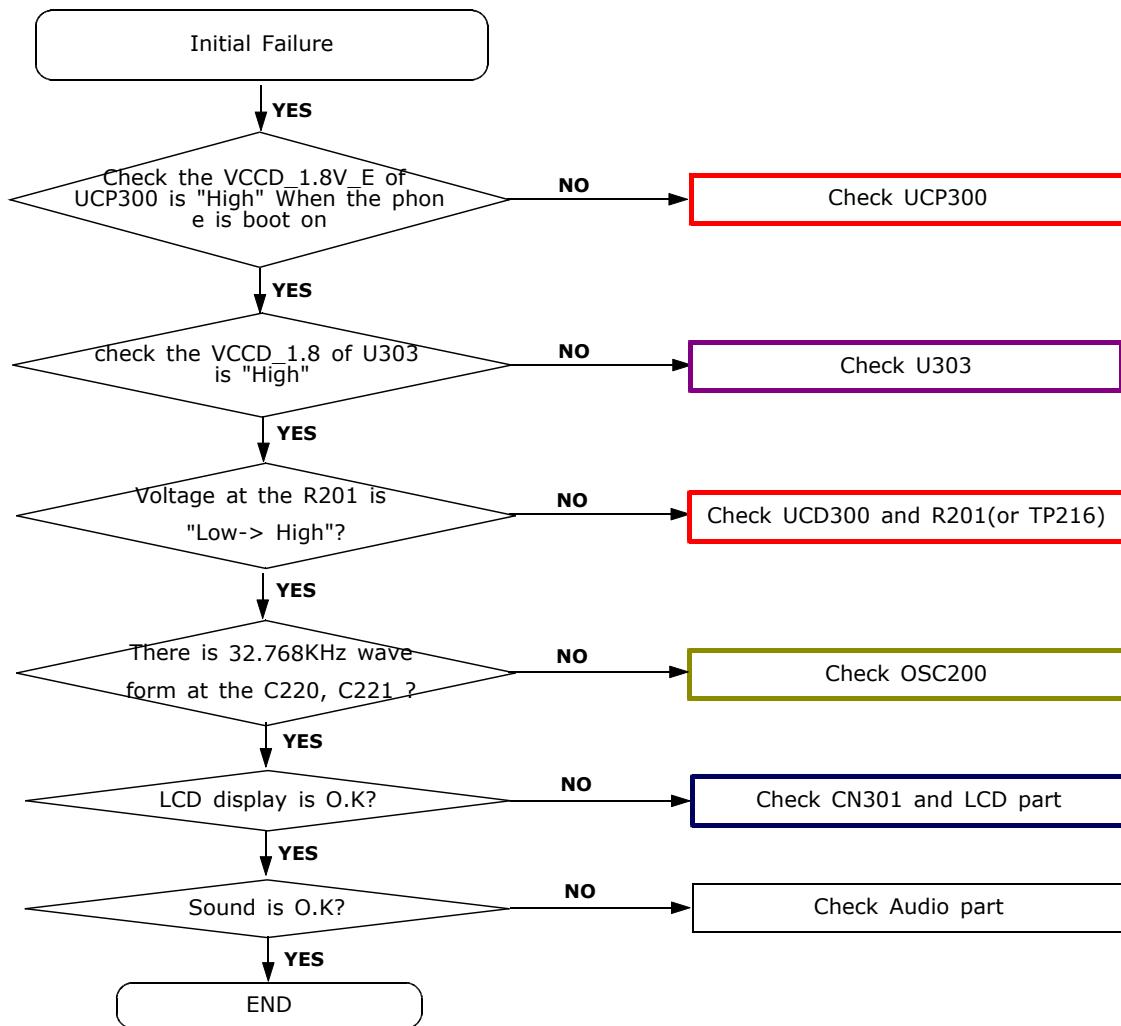

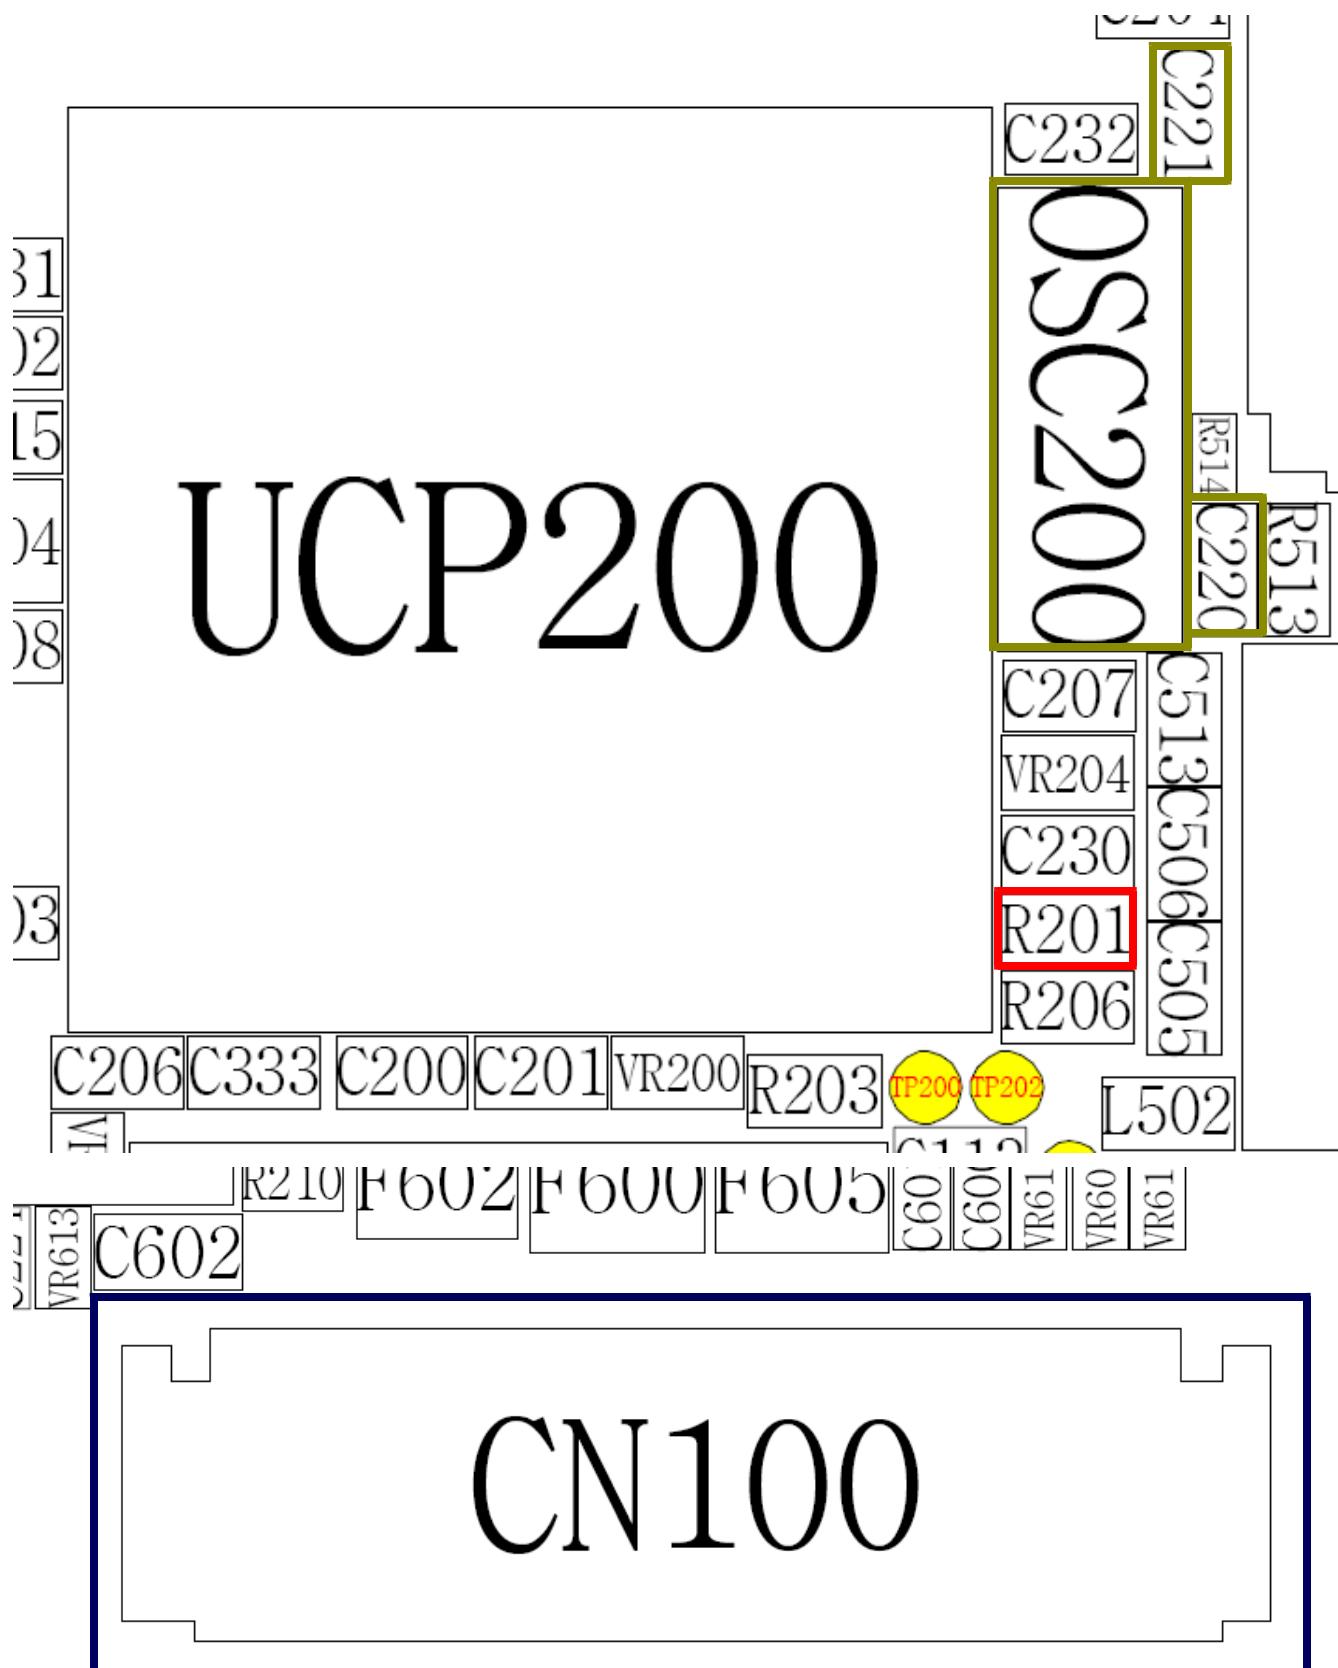

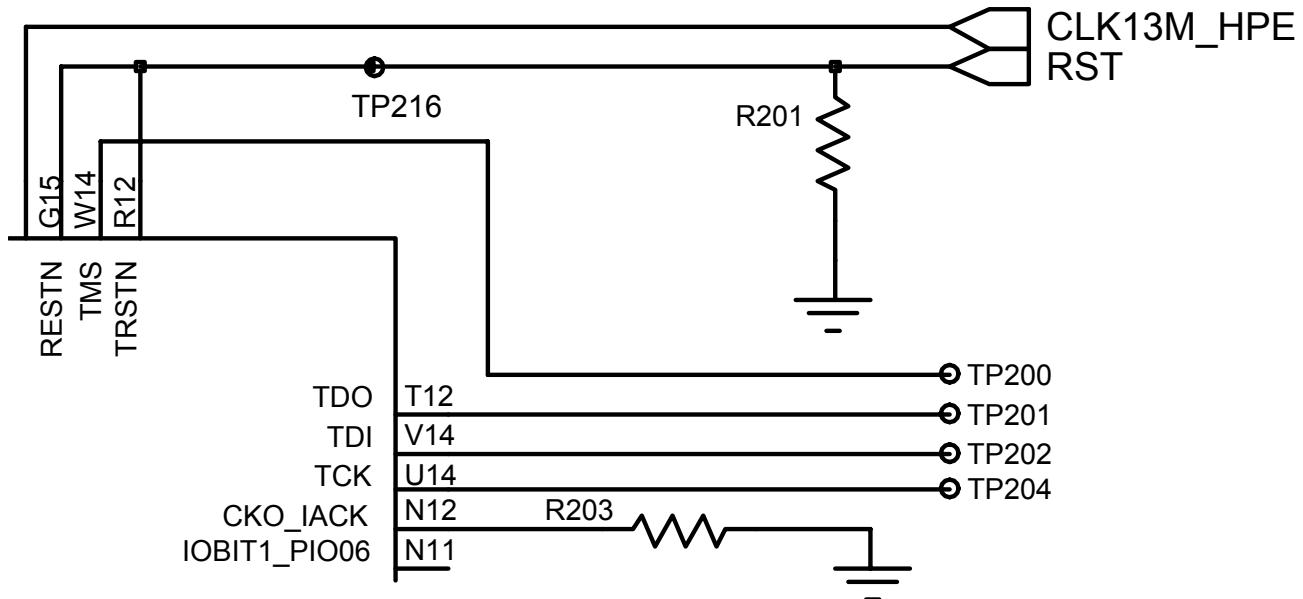

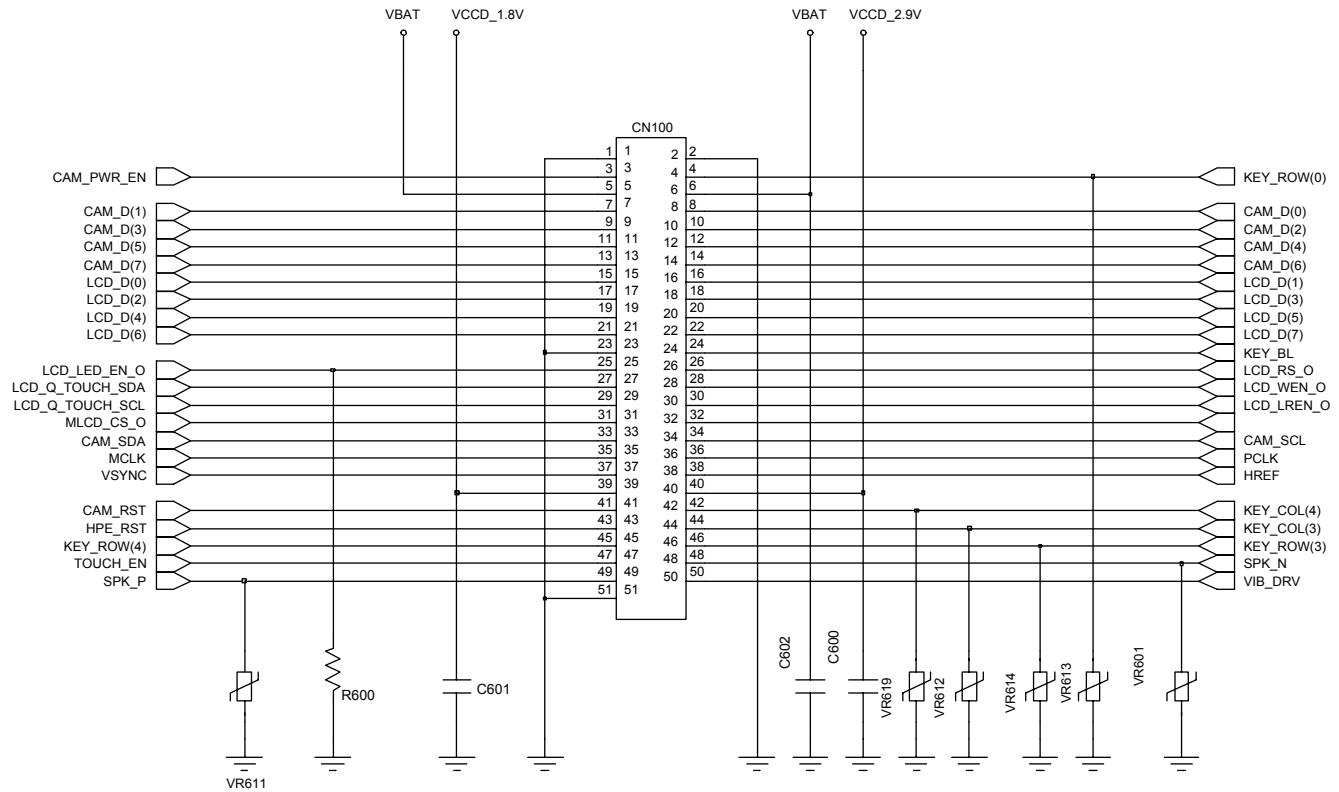

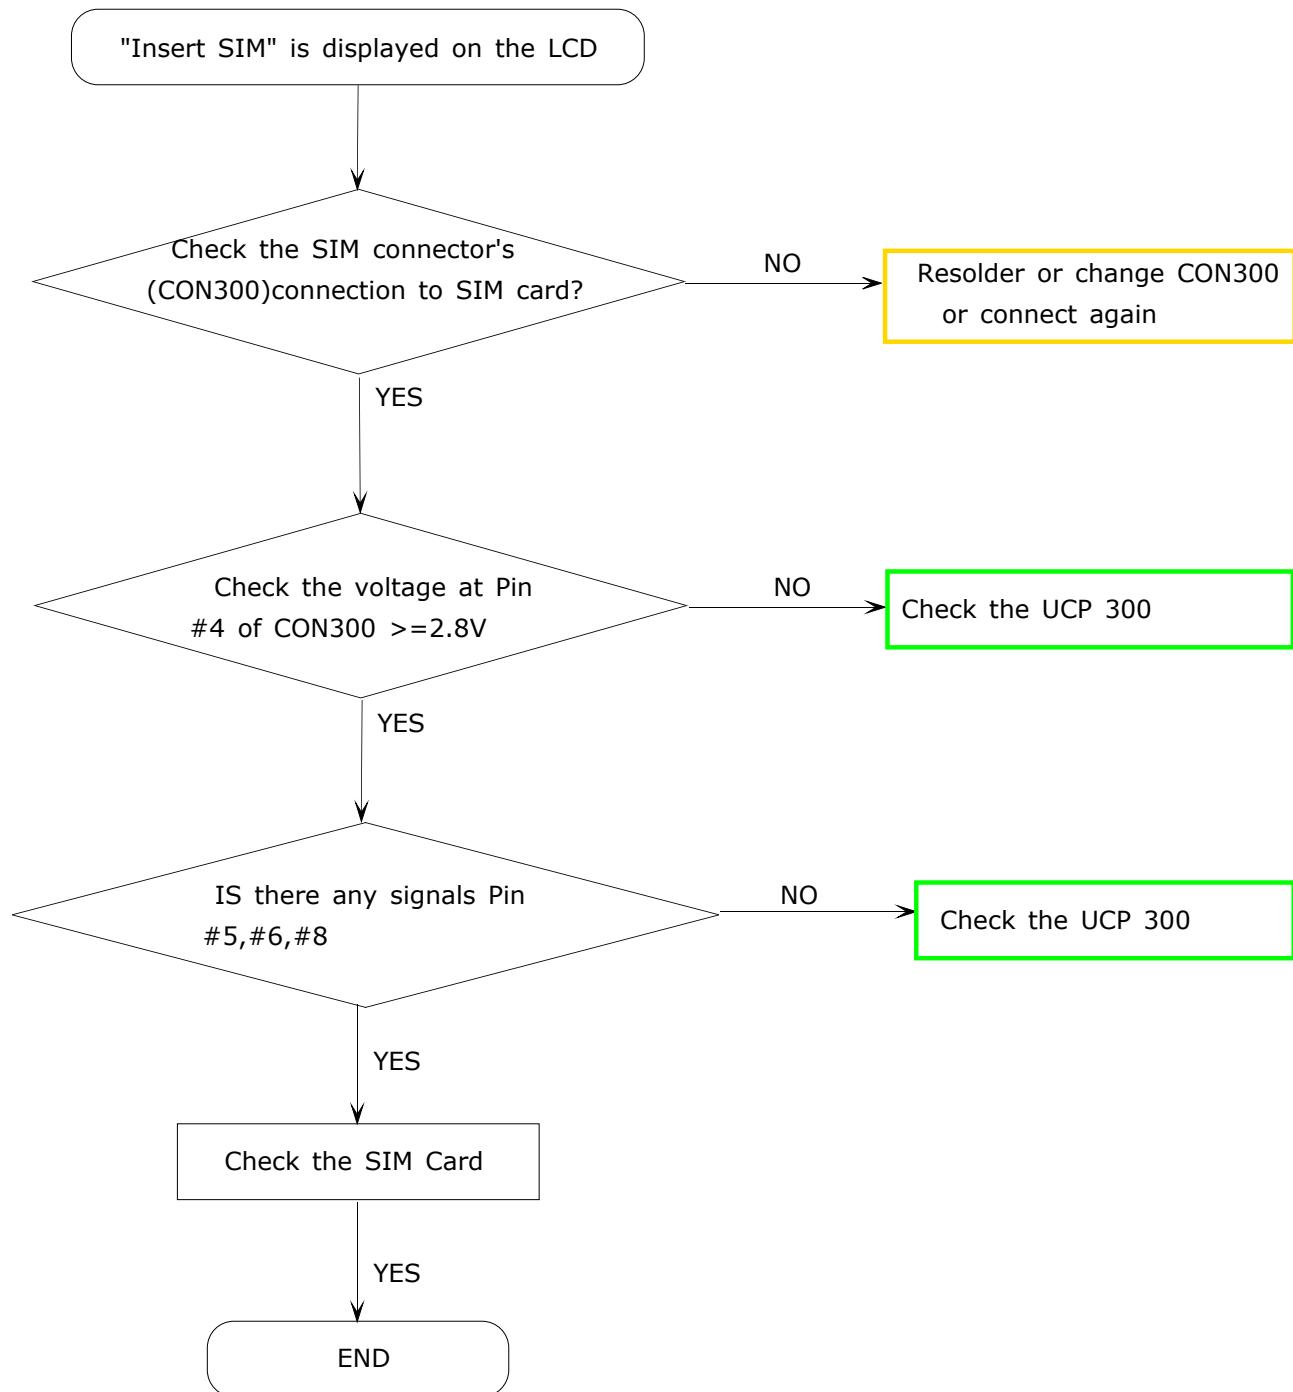

### 3-1-2. System Initial

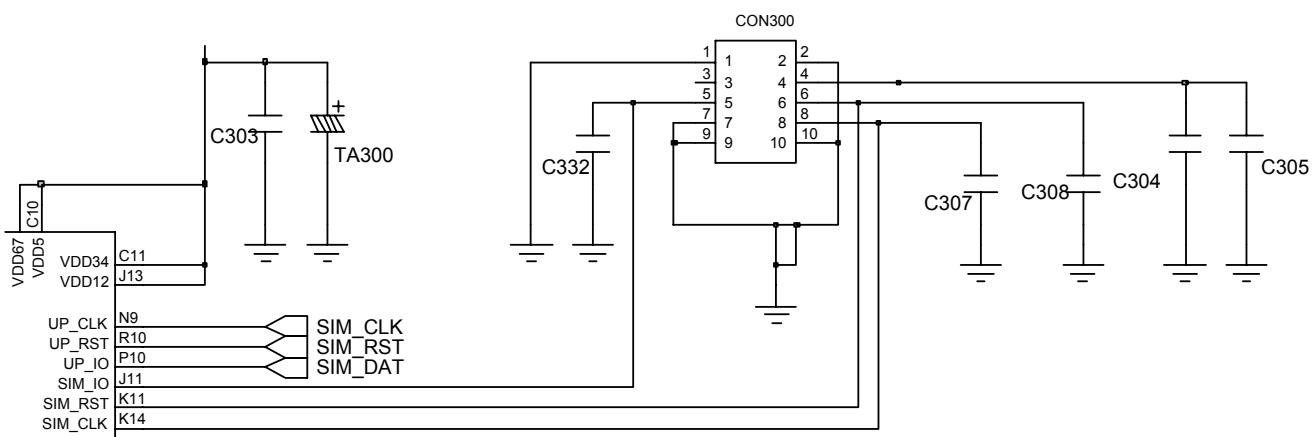

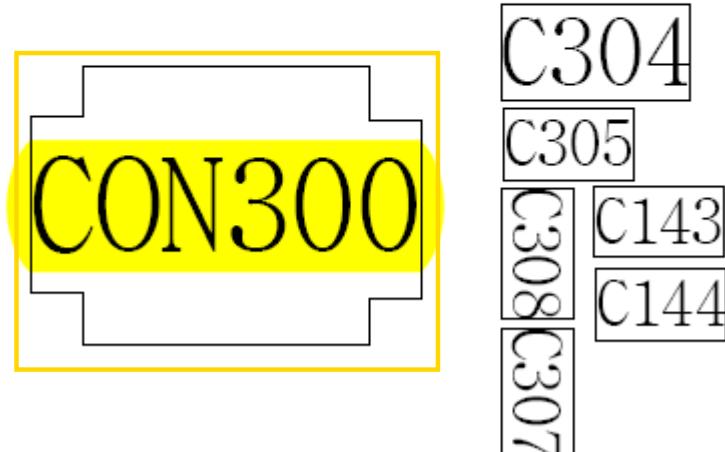

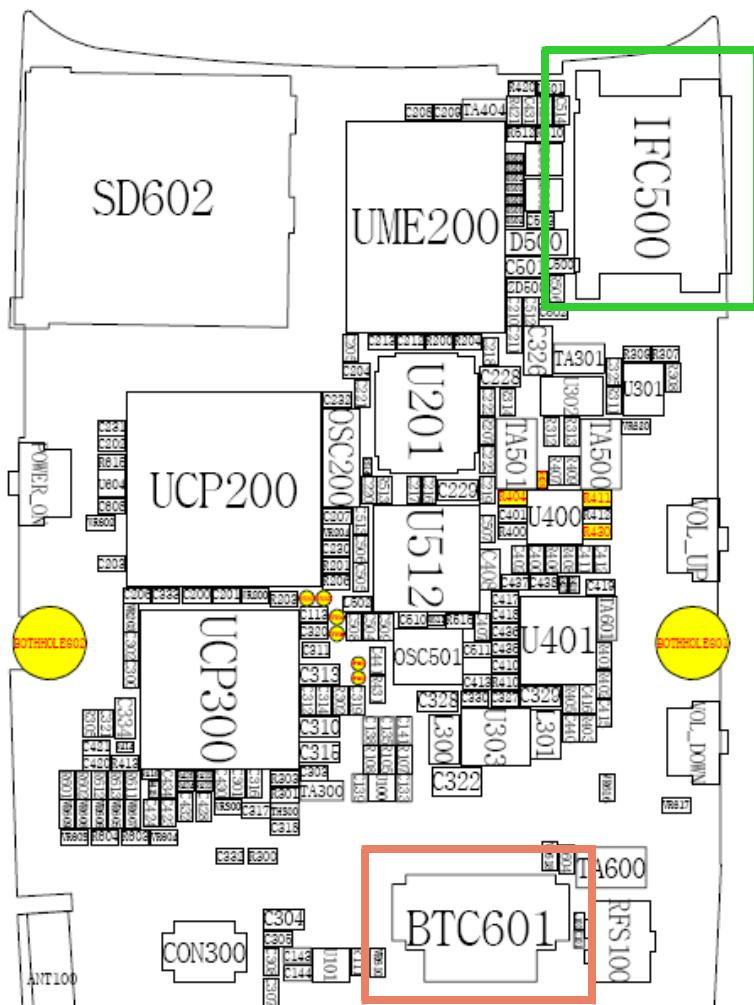

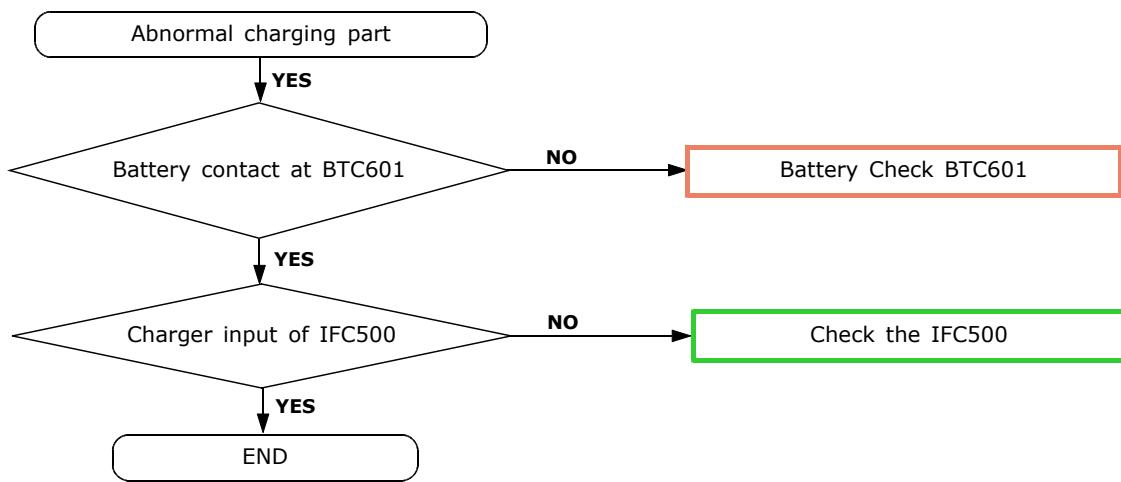

### 3-1-3. Sim Part

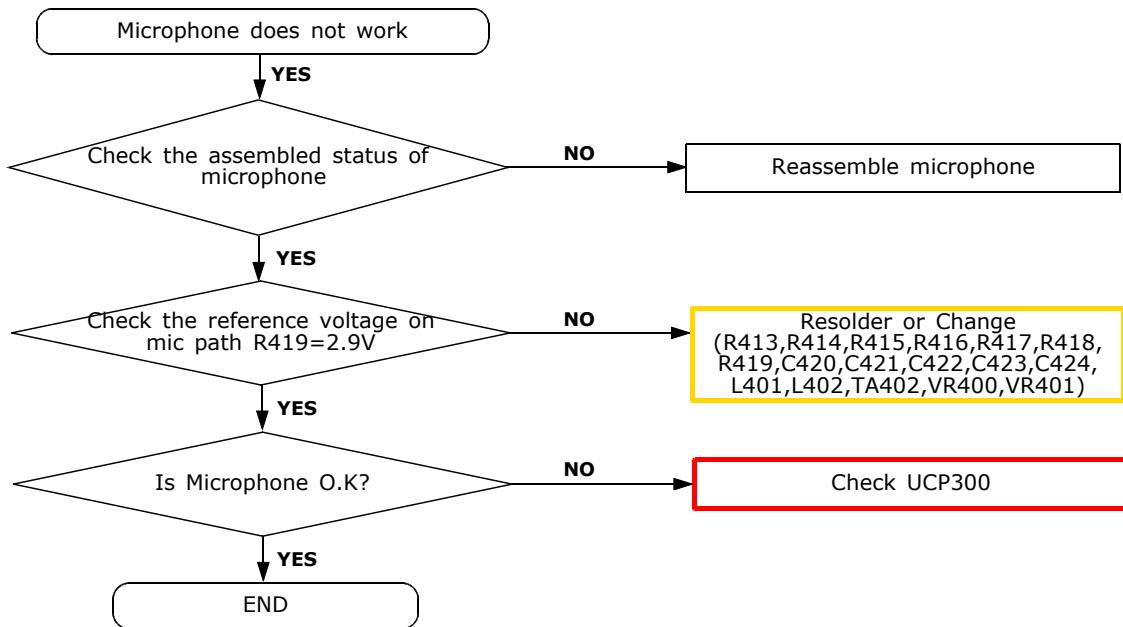

C332 R300

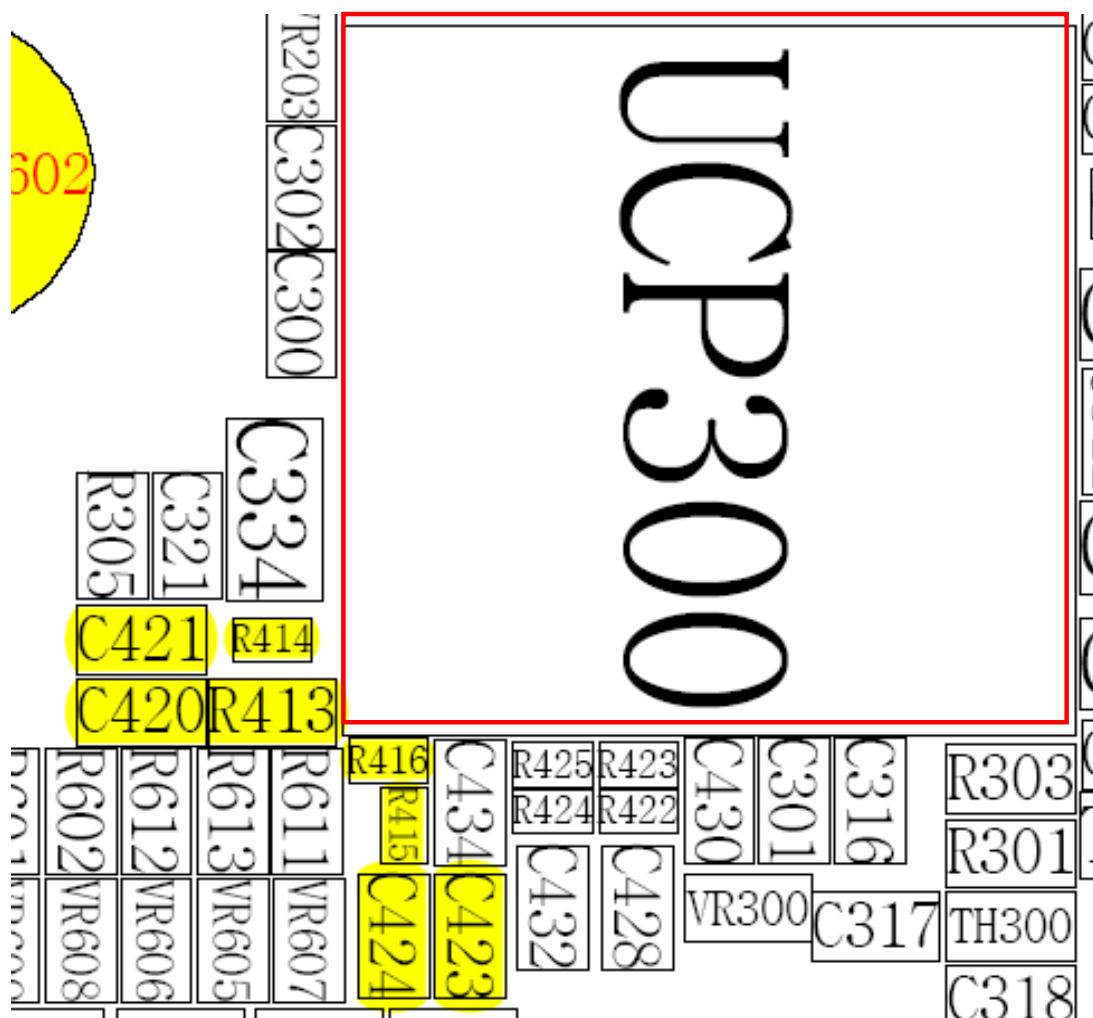

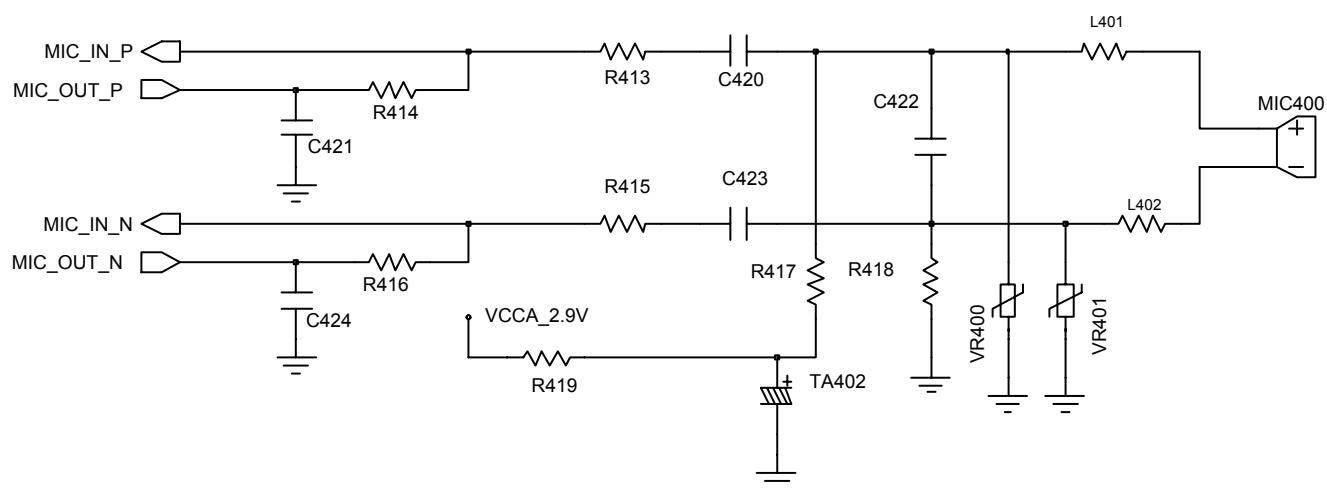

### 3-1-4. Charging Part

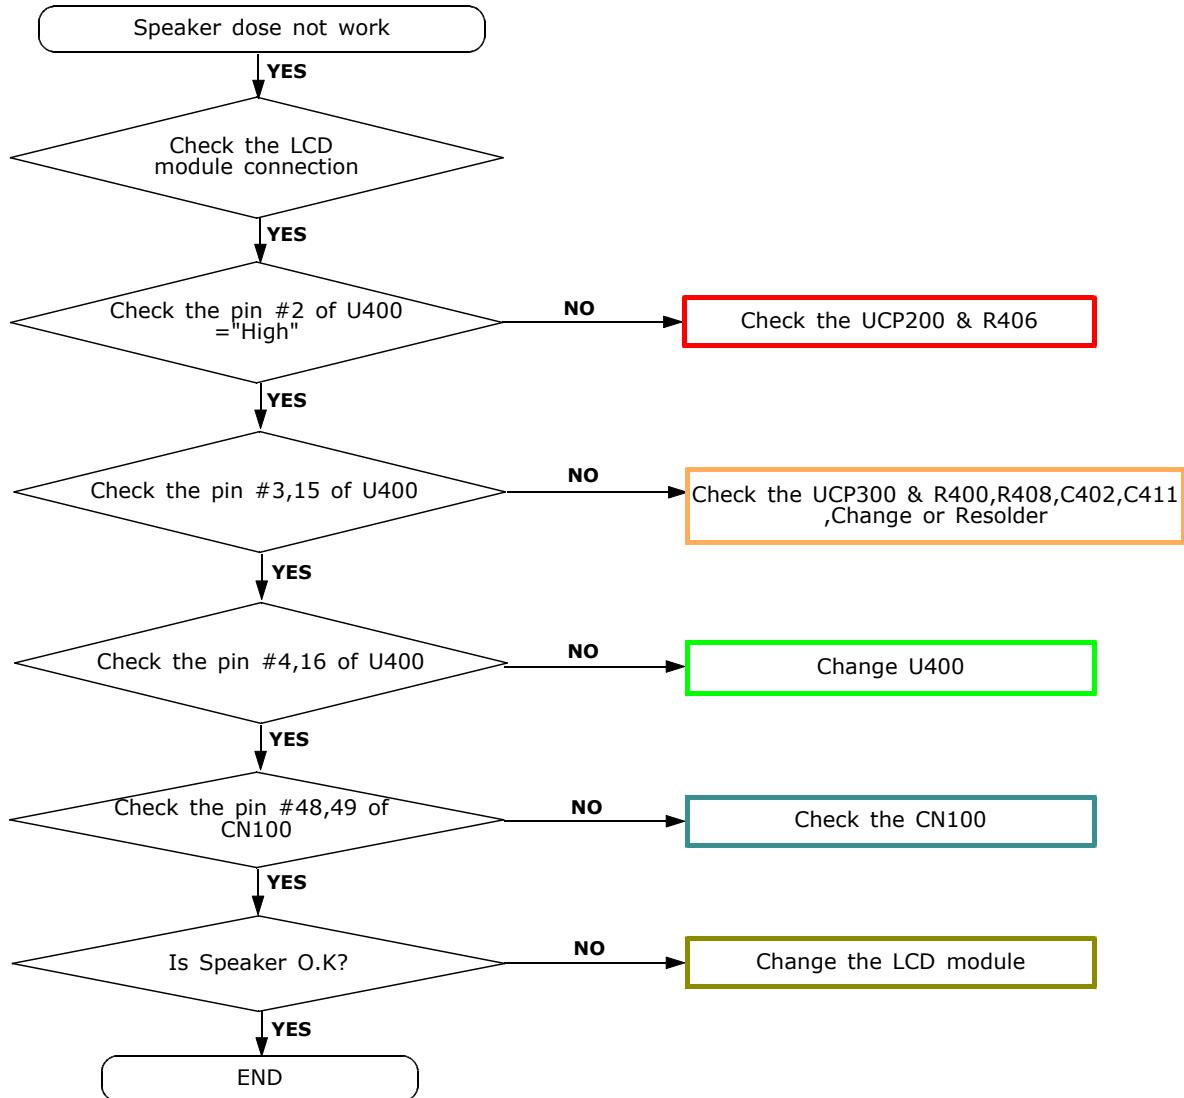

### 3-1-5. Microphone Part

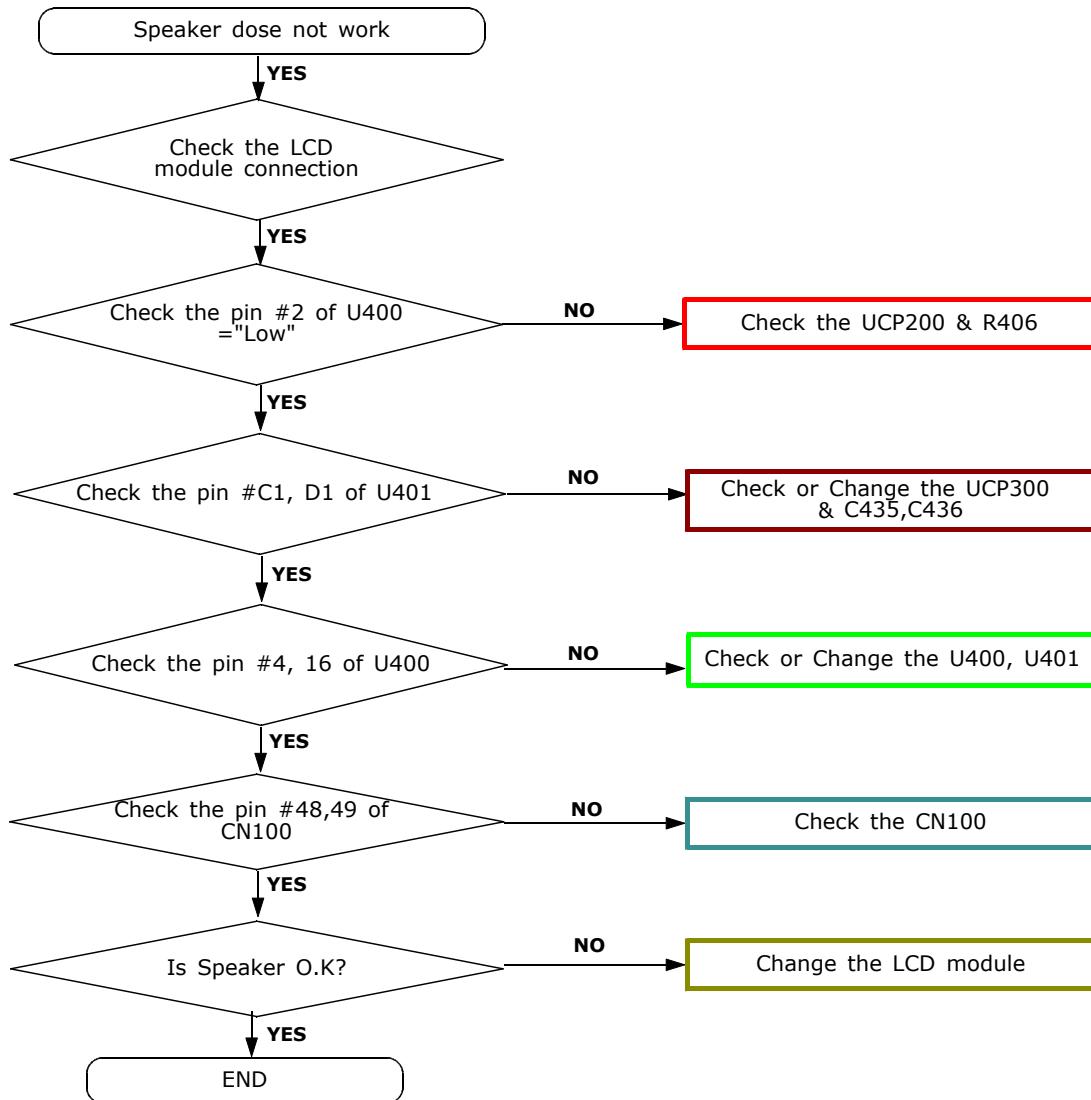

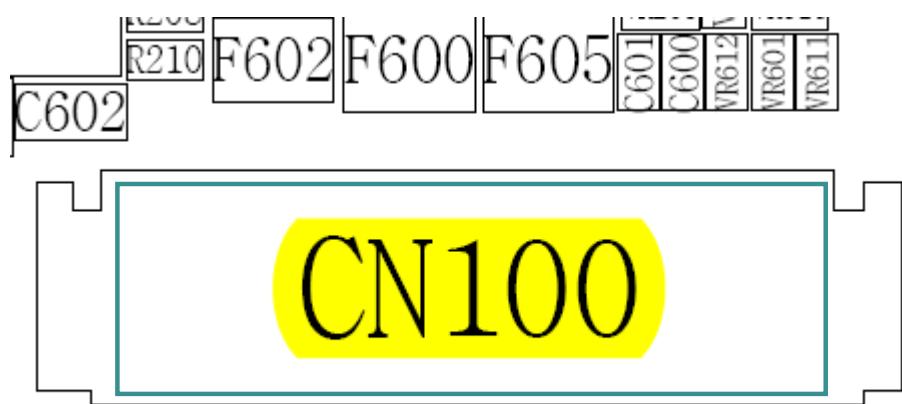

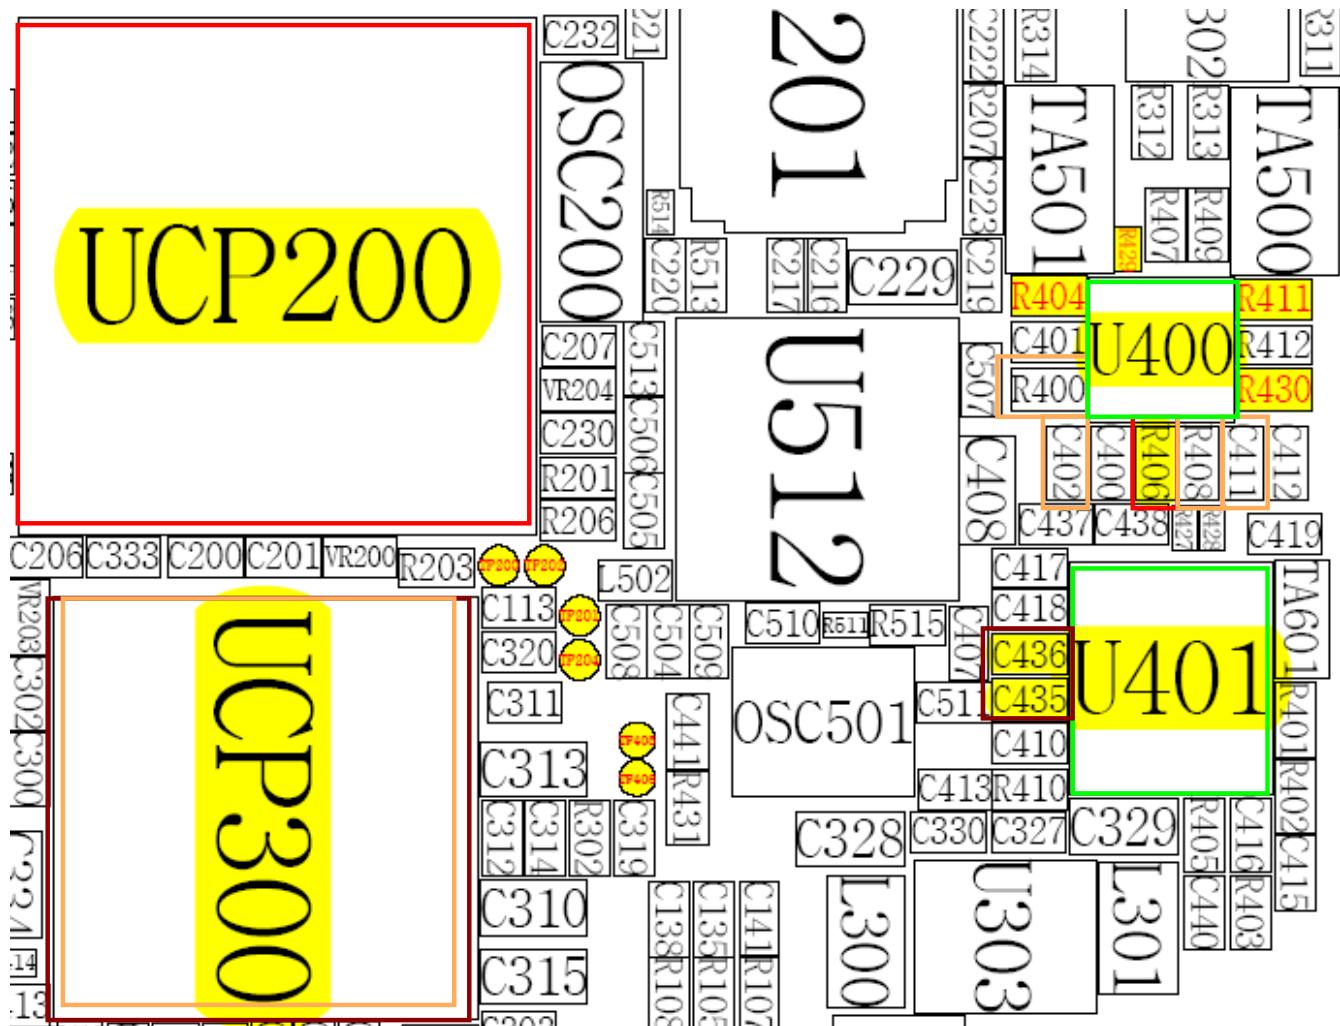

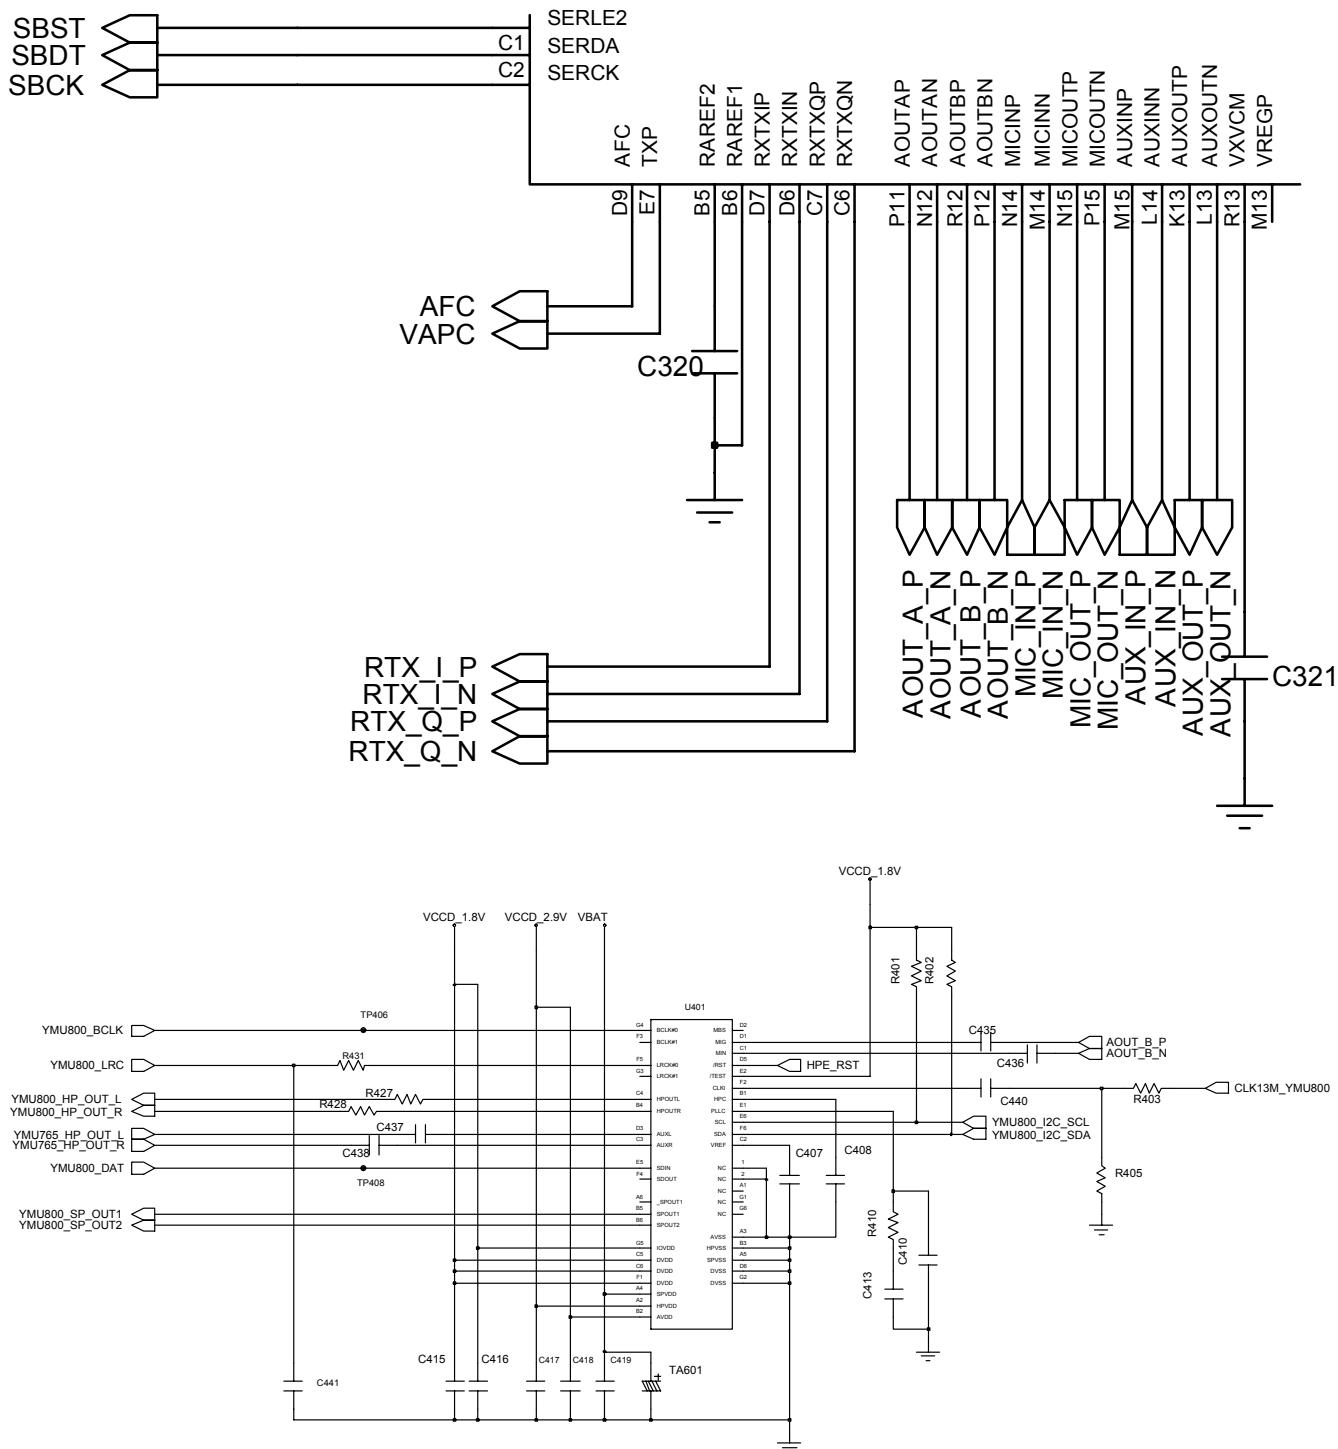

### 3-1-6. Receiver Part

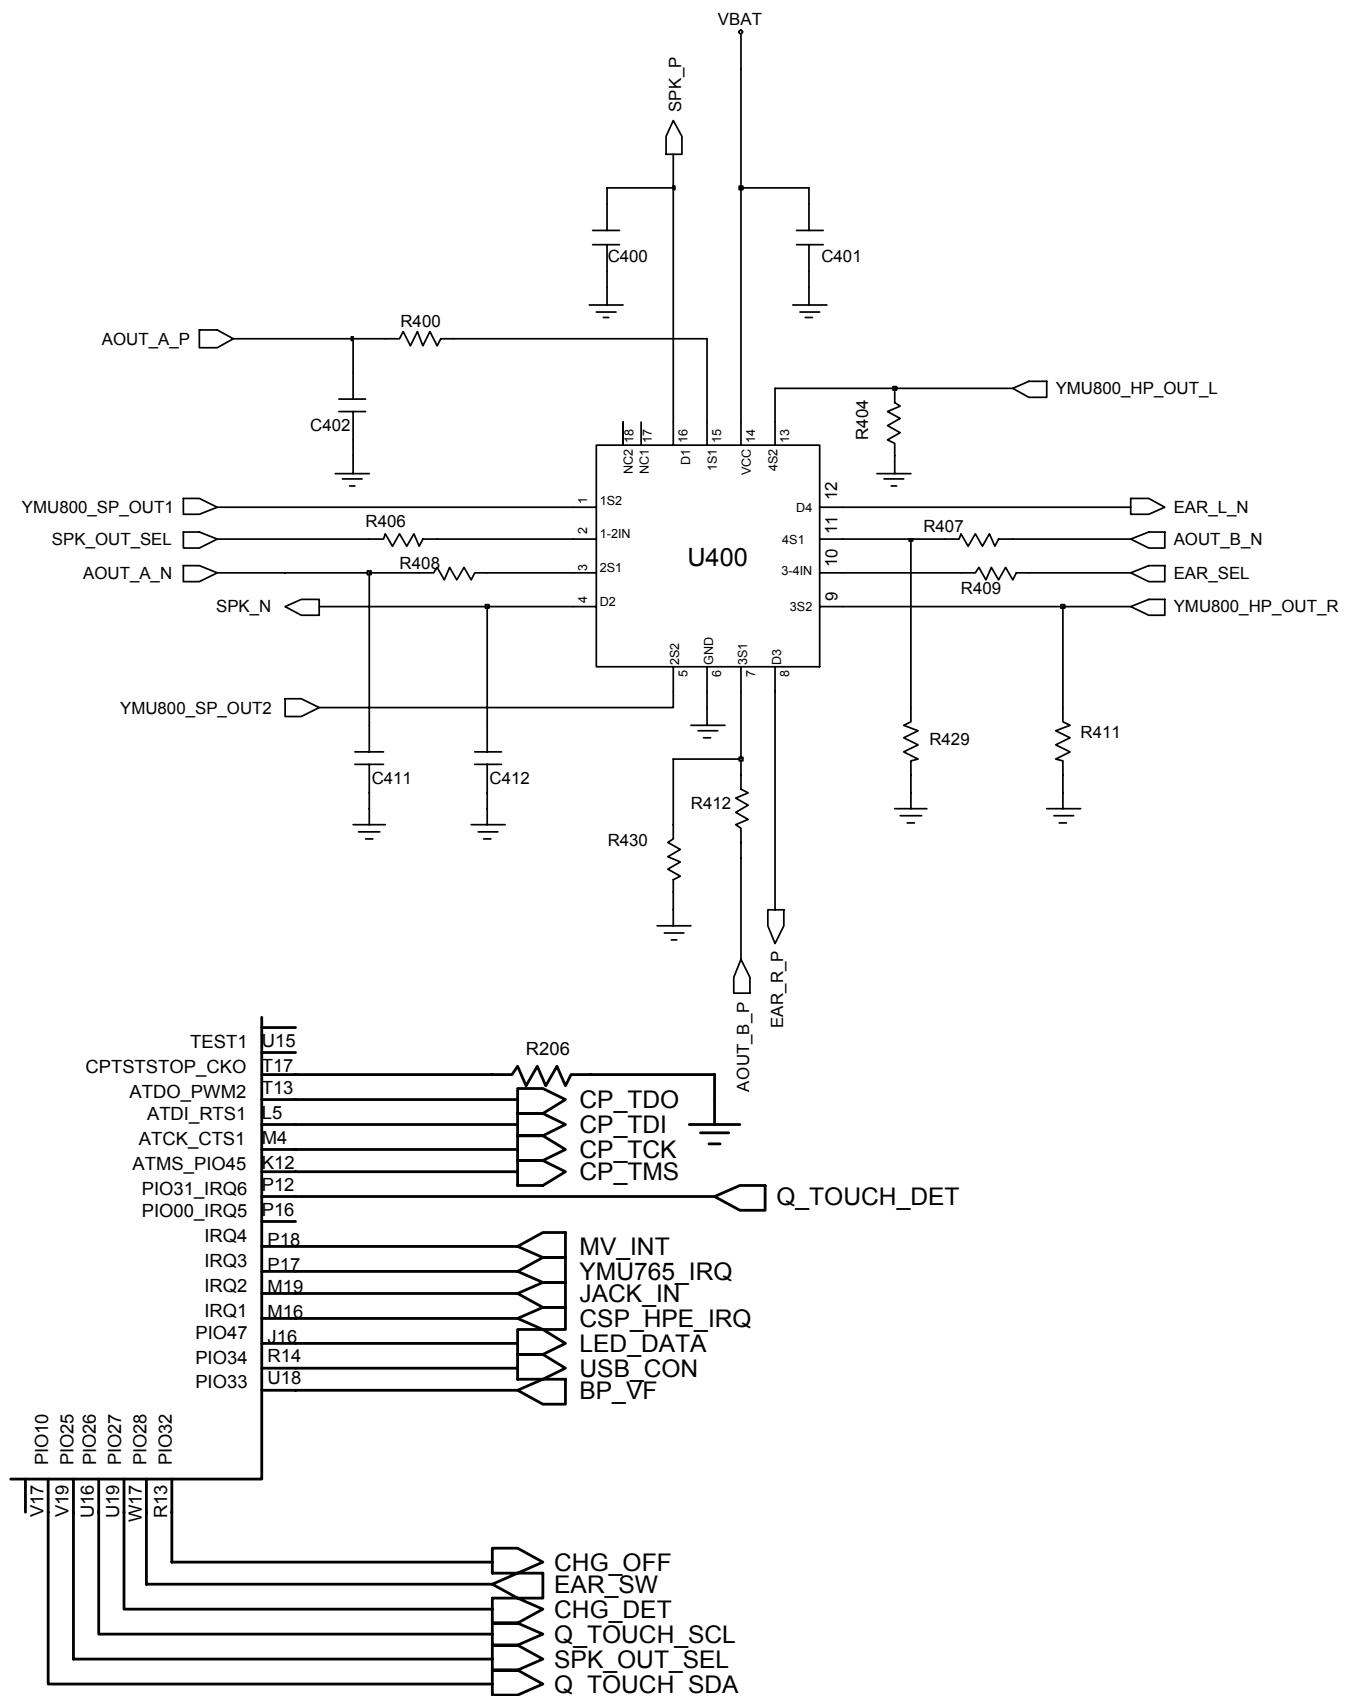

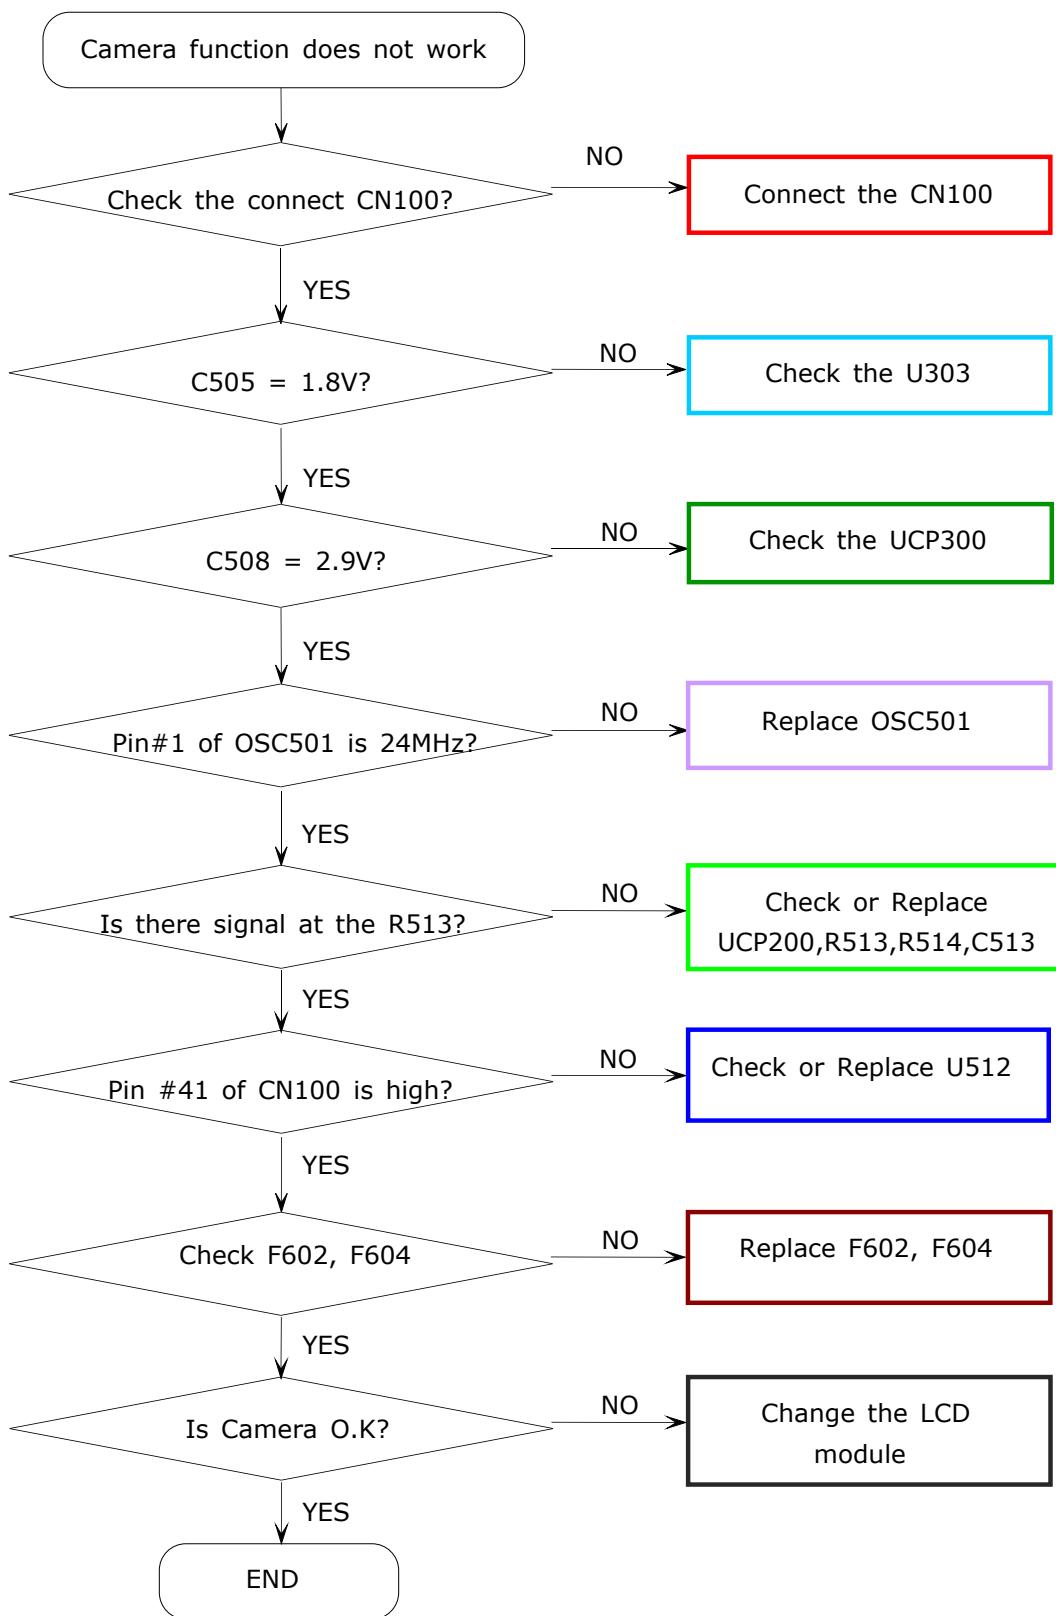

### 3-1-7. Speaker Part

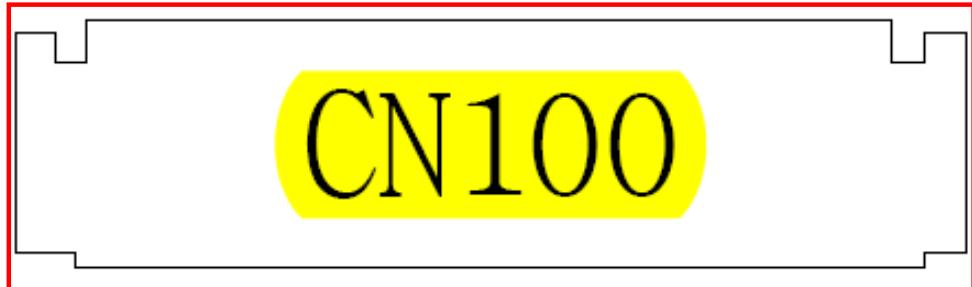

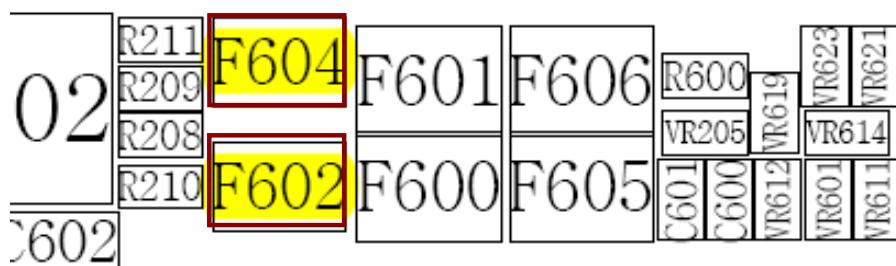

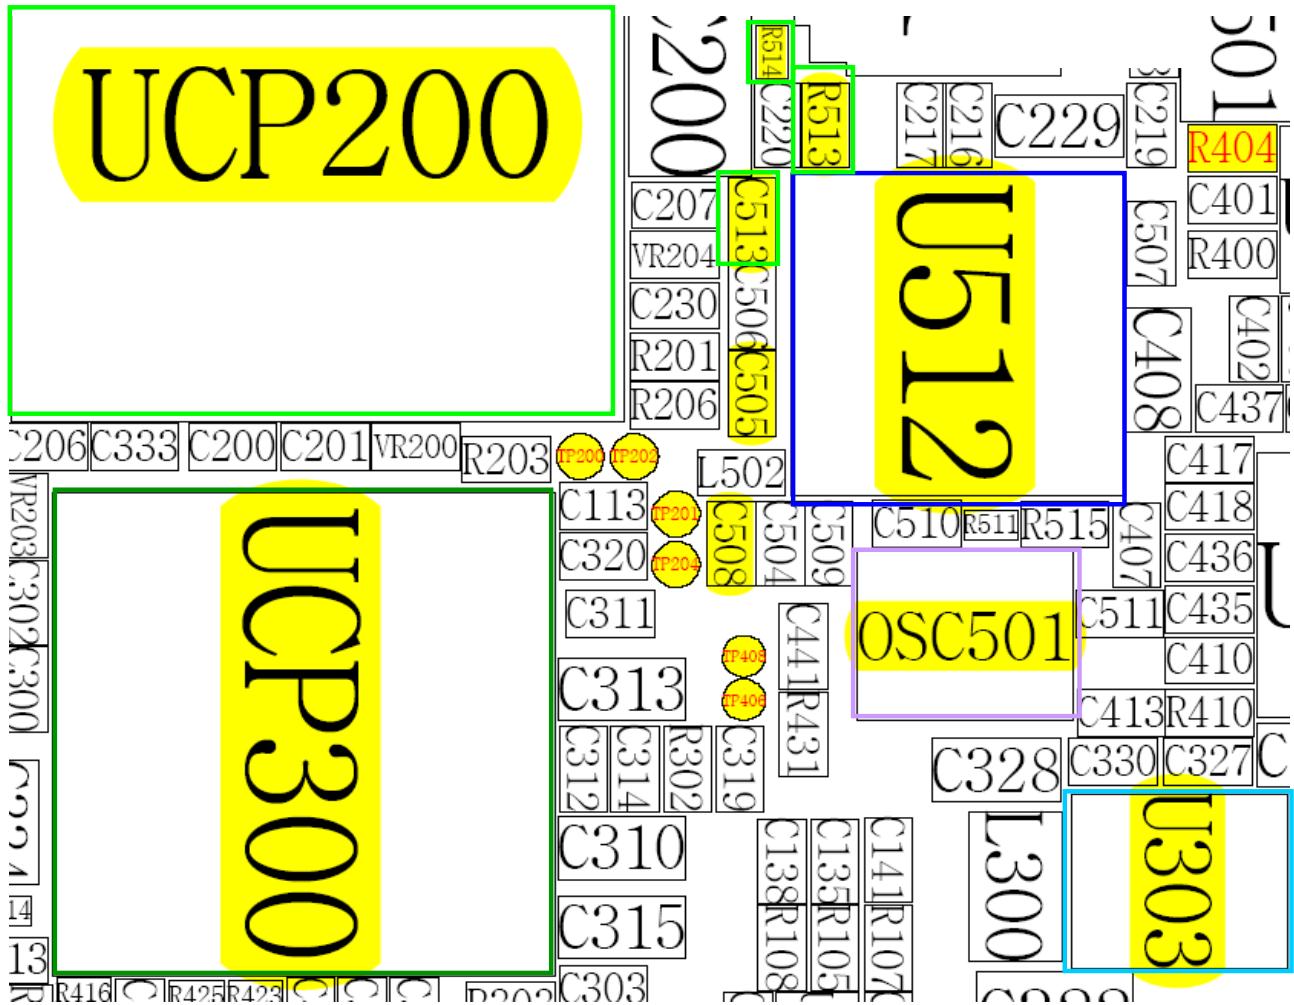

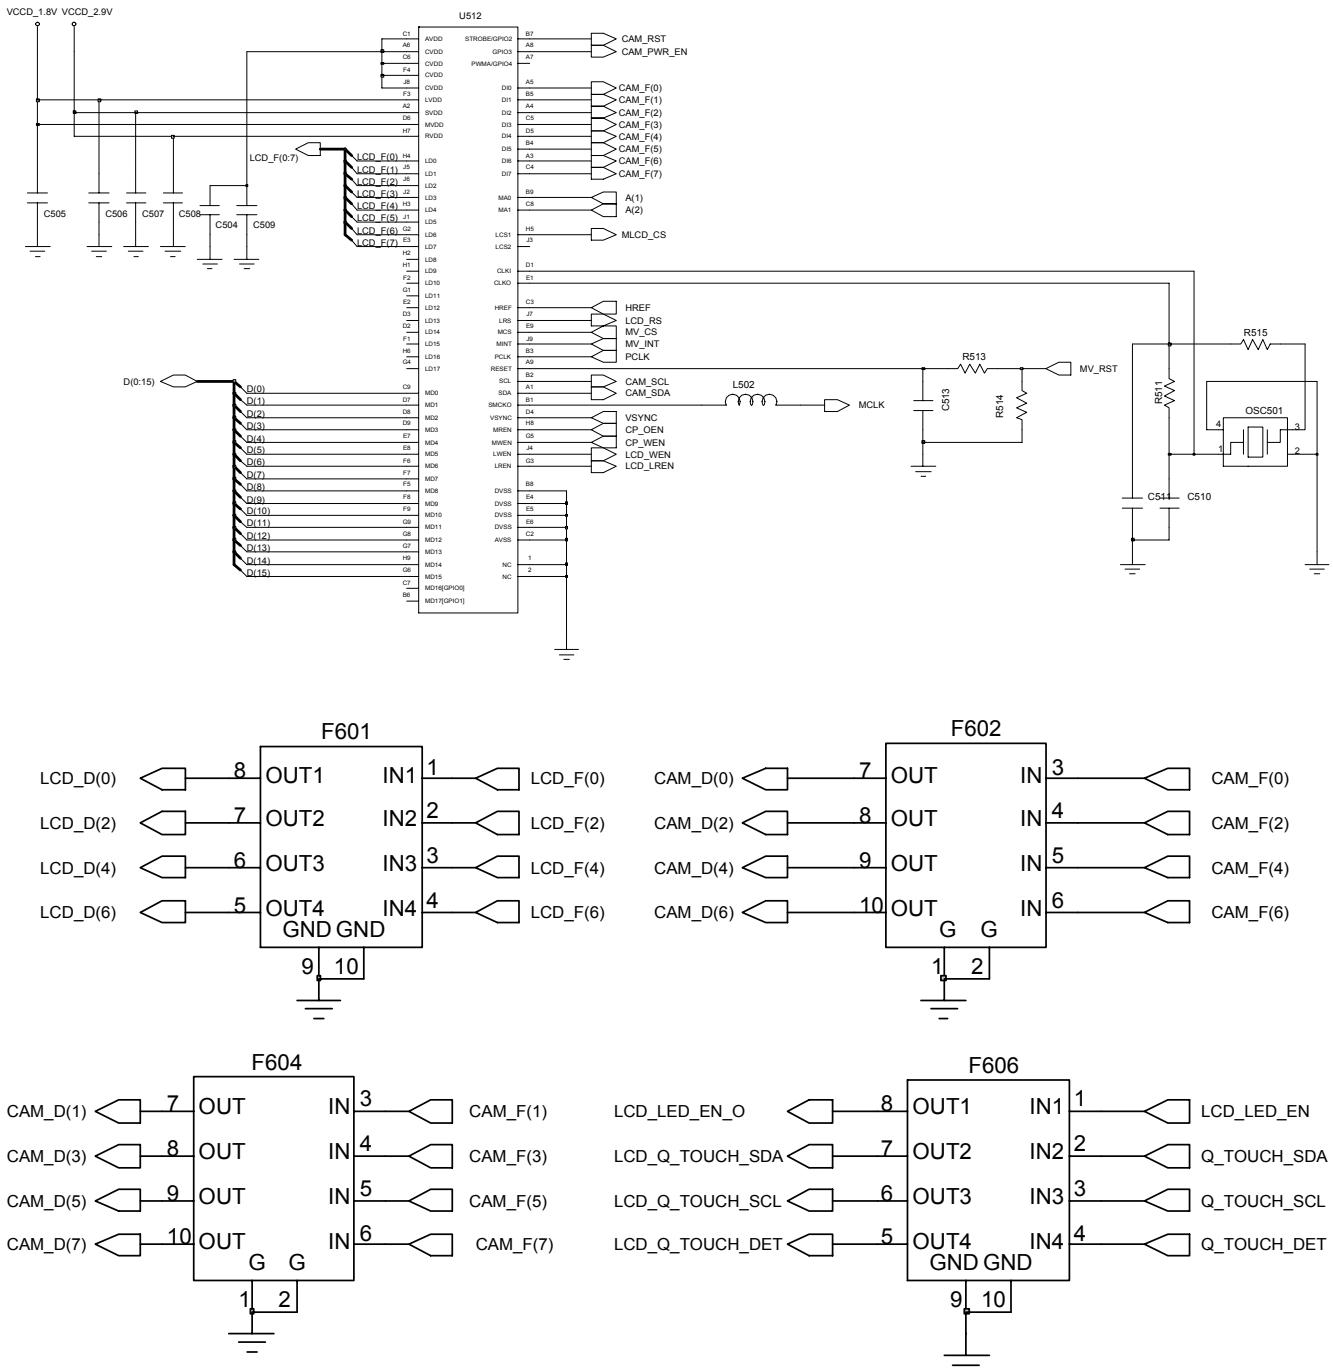

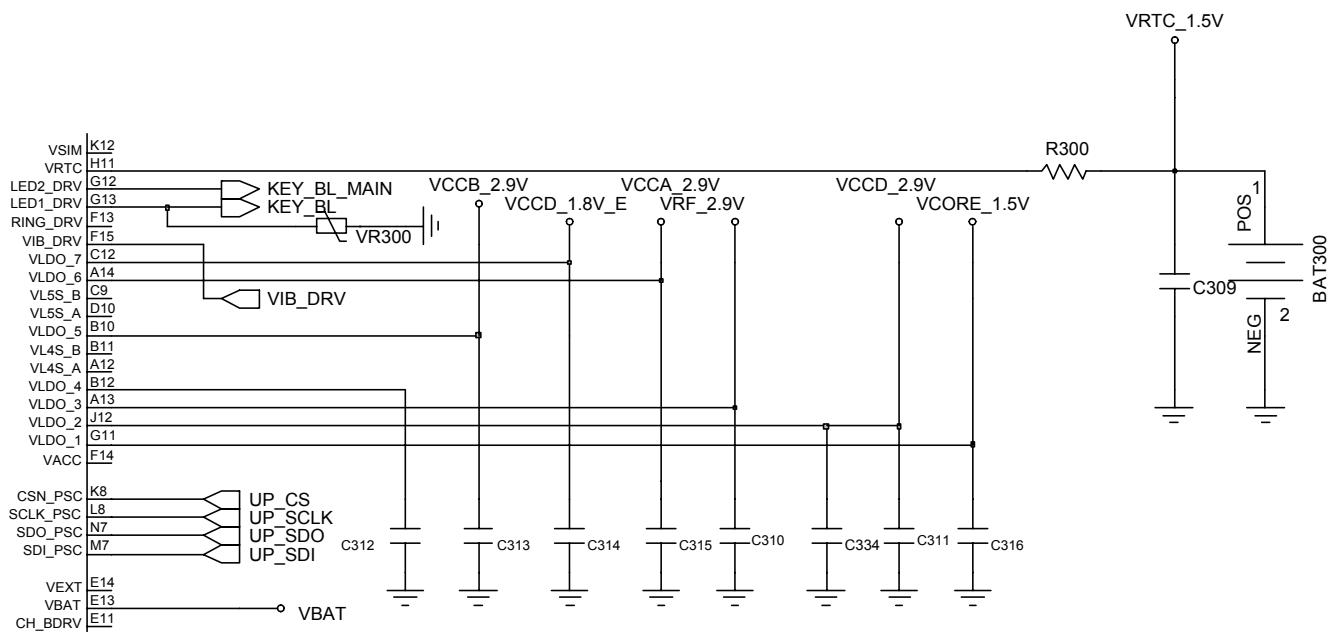

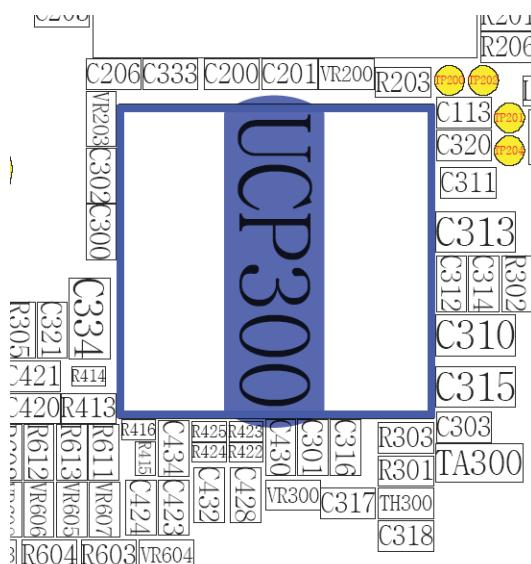

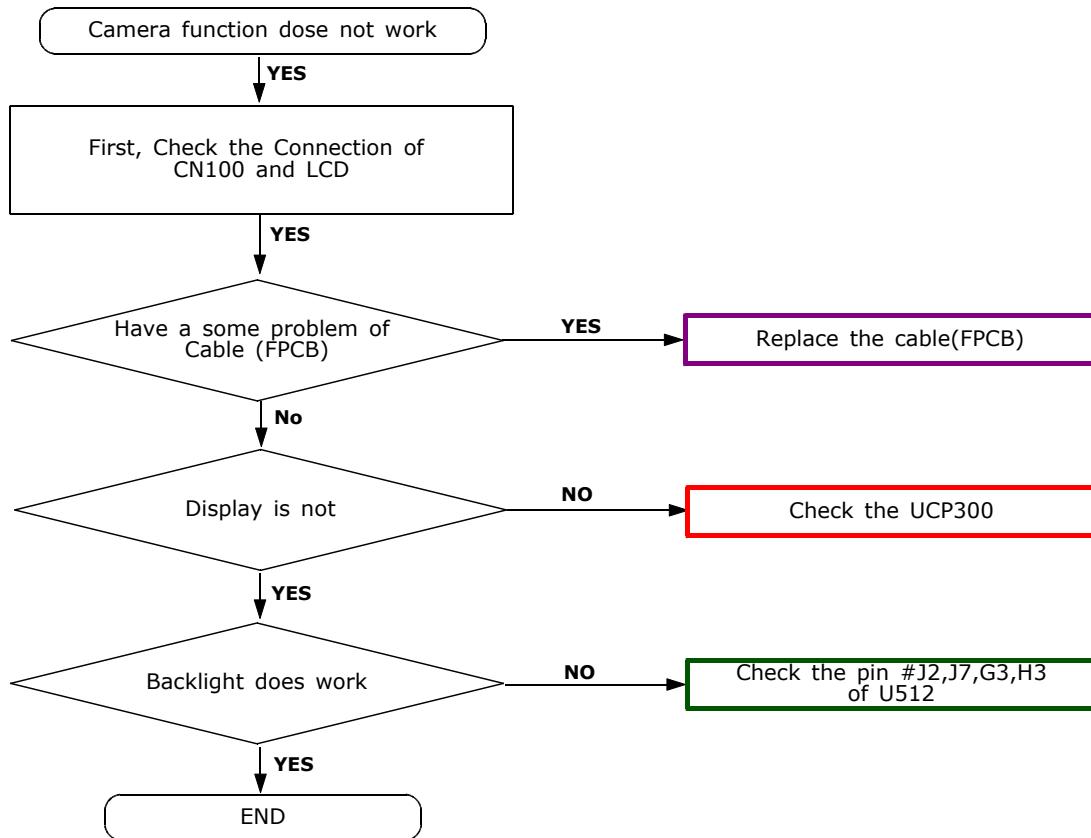

**3-1-8. Camera Part**

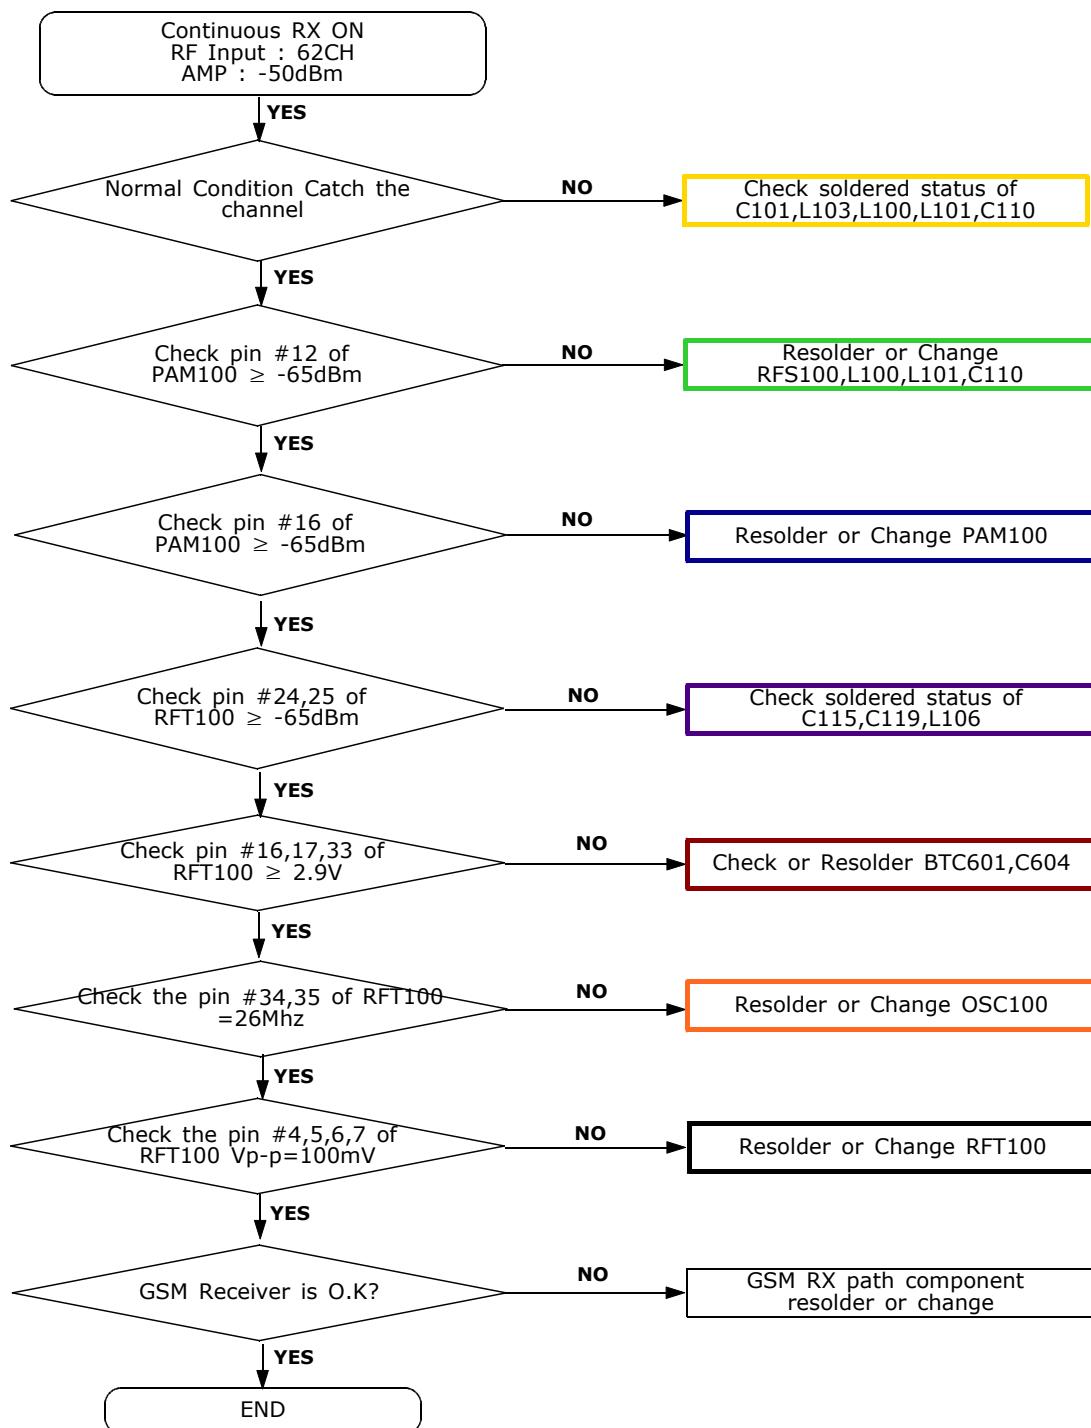

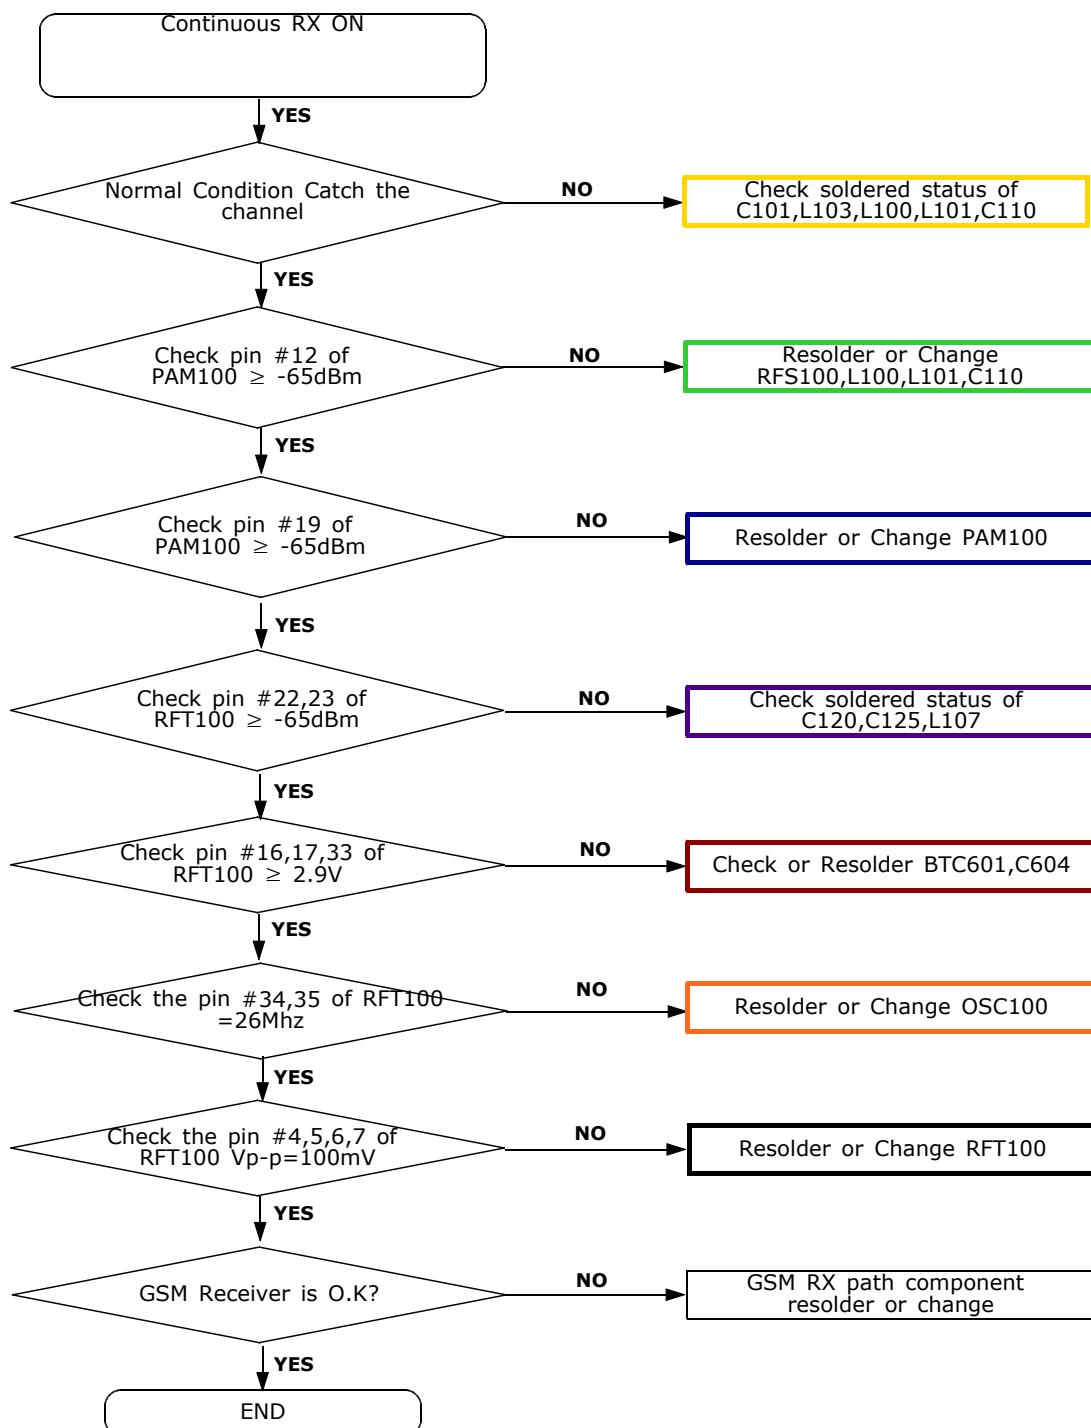

### **3-1-9. LCD**

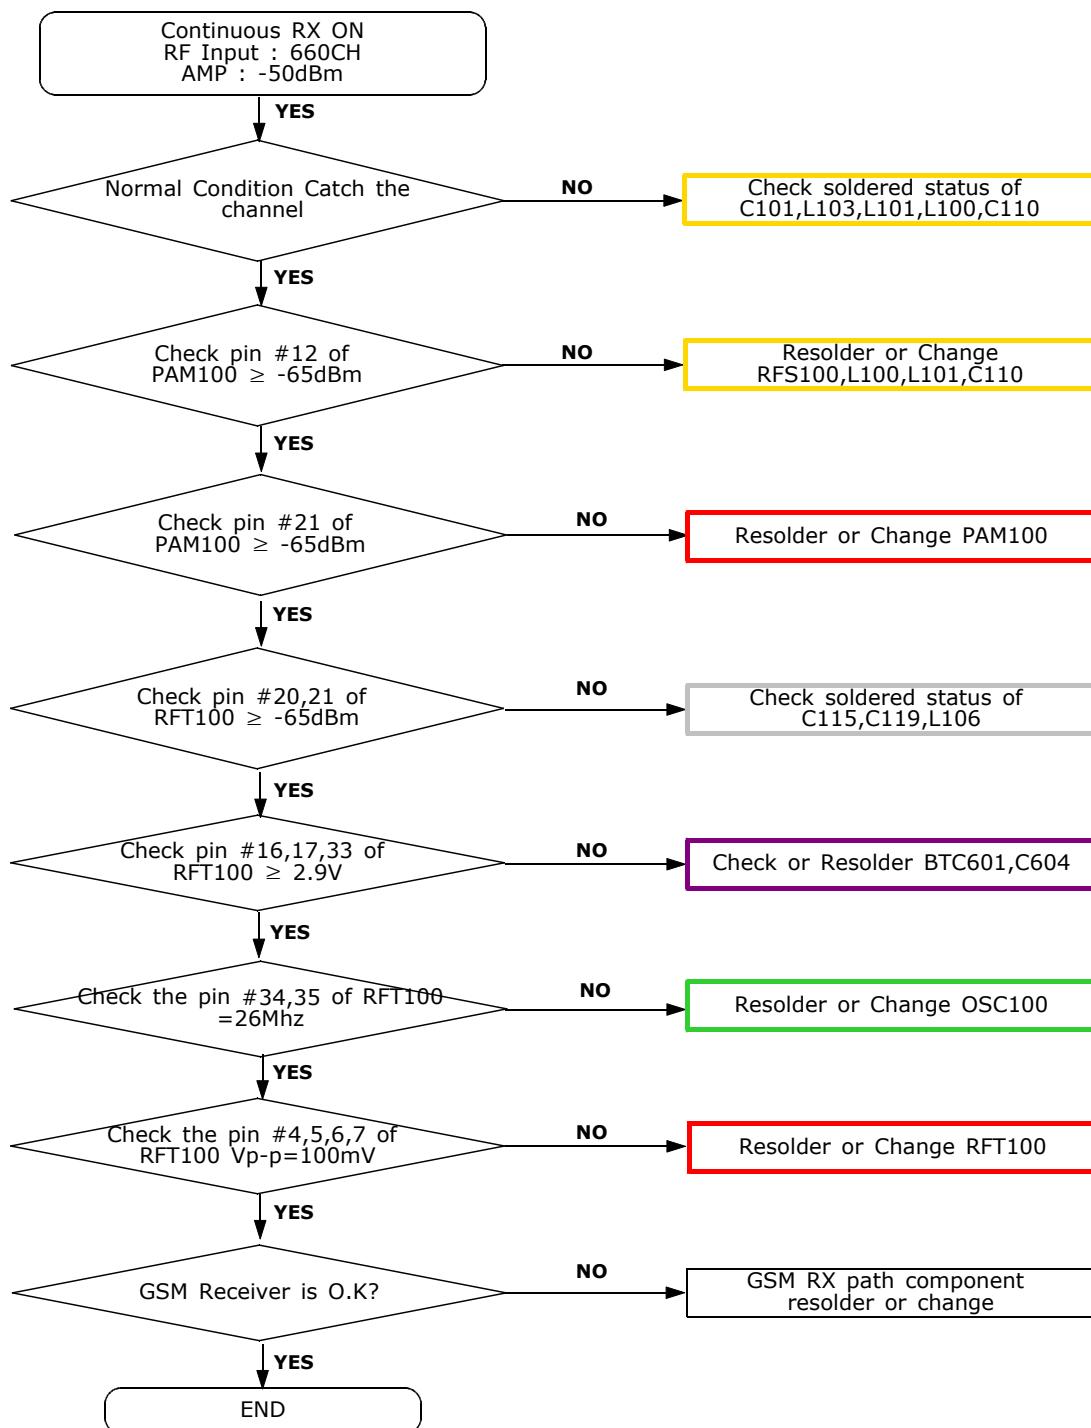

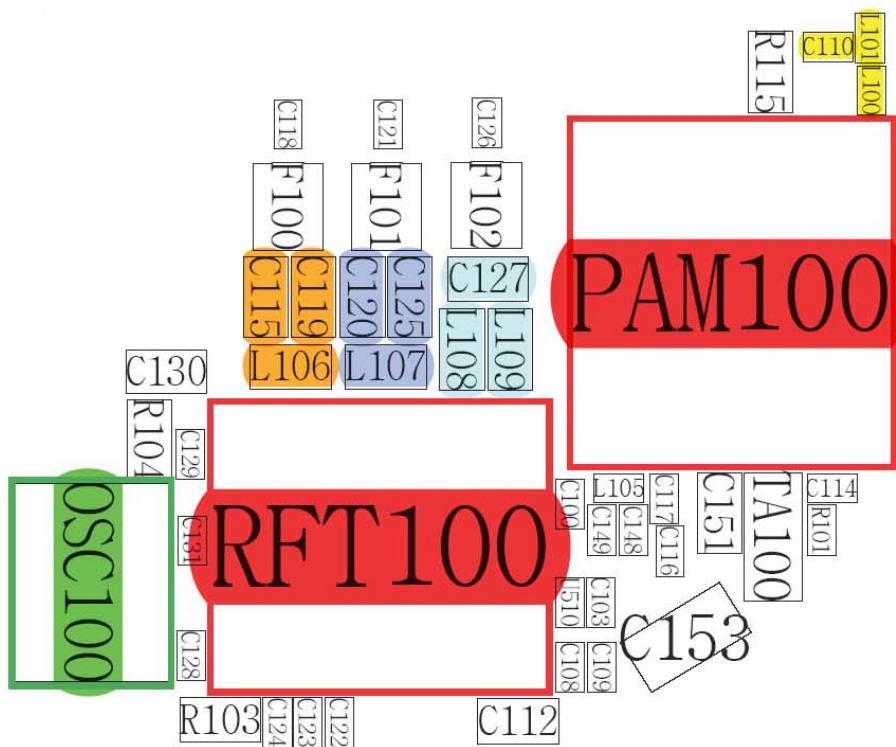

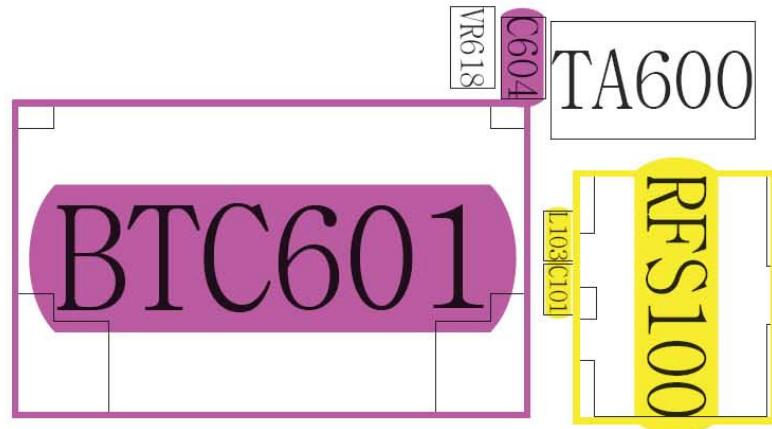

**3-2.RF****3-2-1. EGSM Rx**

## 3-2-2. DCS Rx

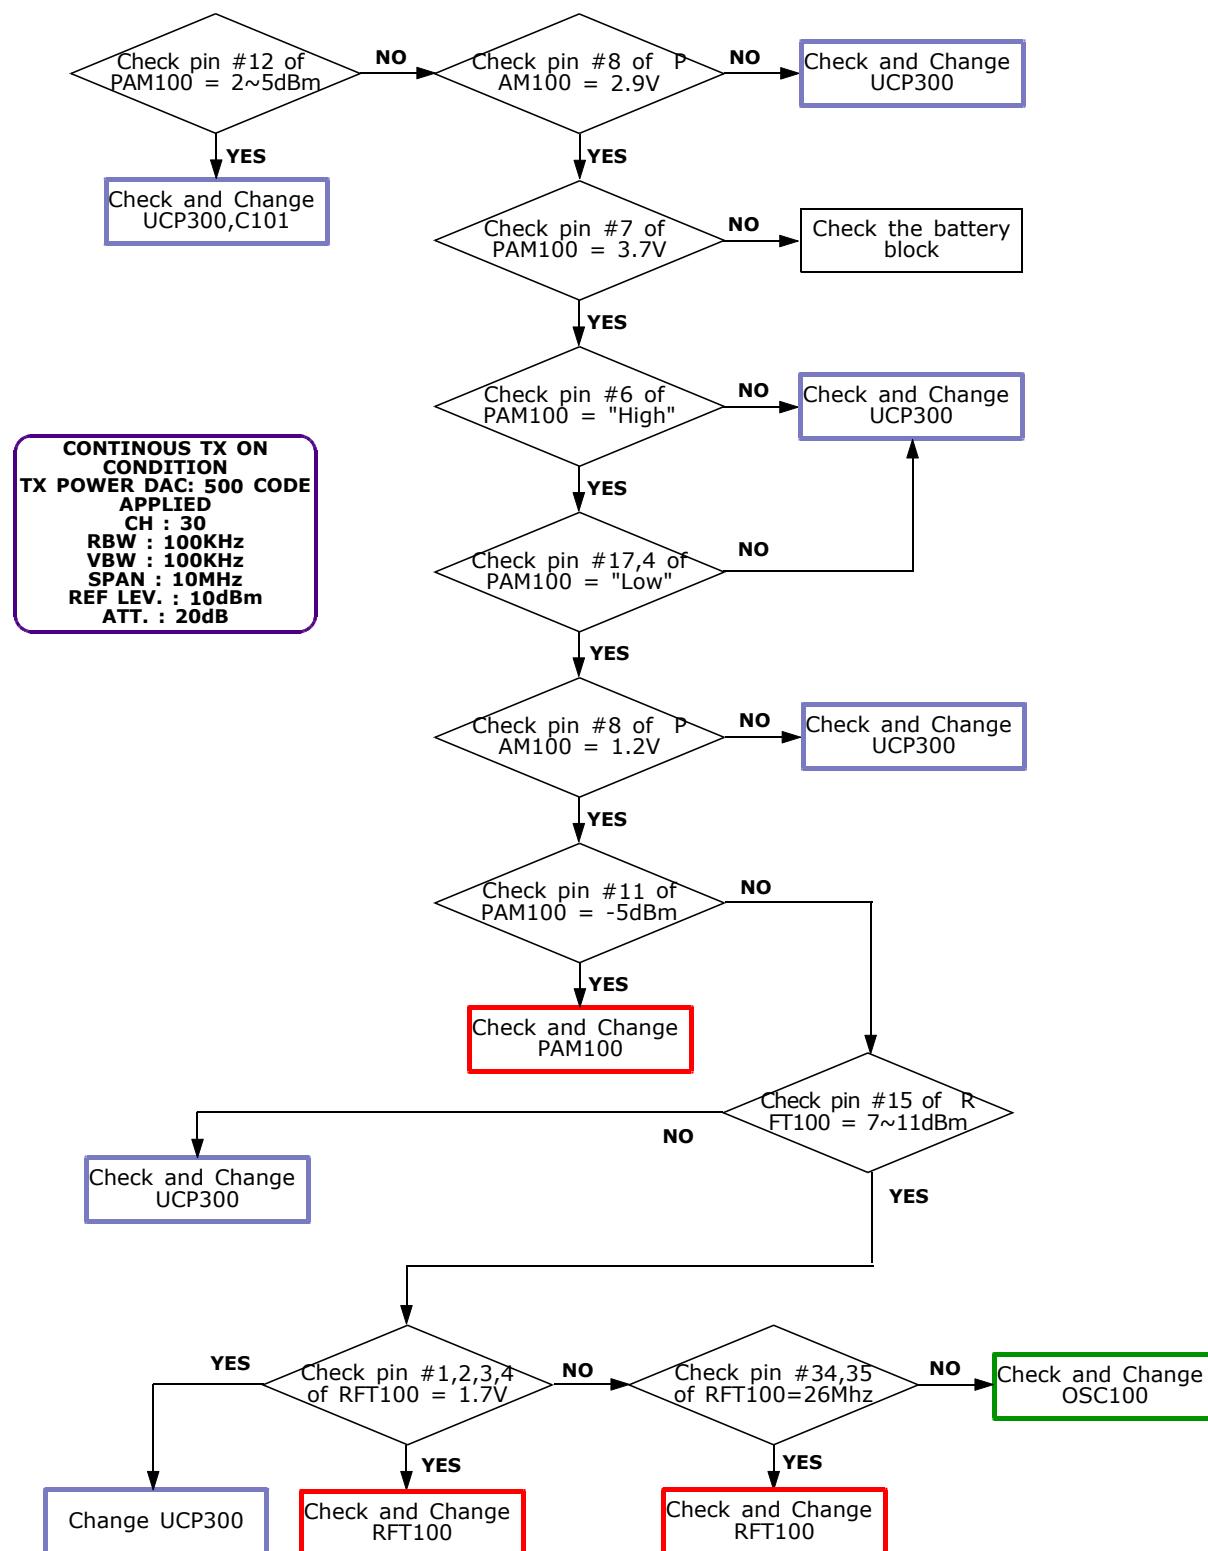

## 3-2-3. PCS Rx

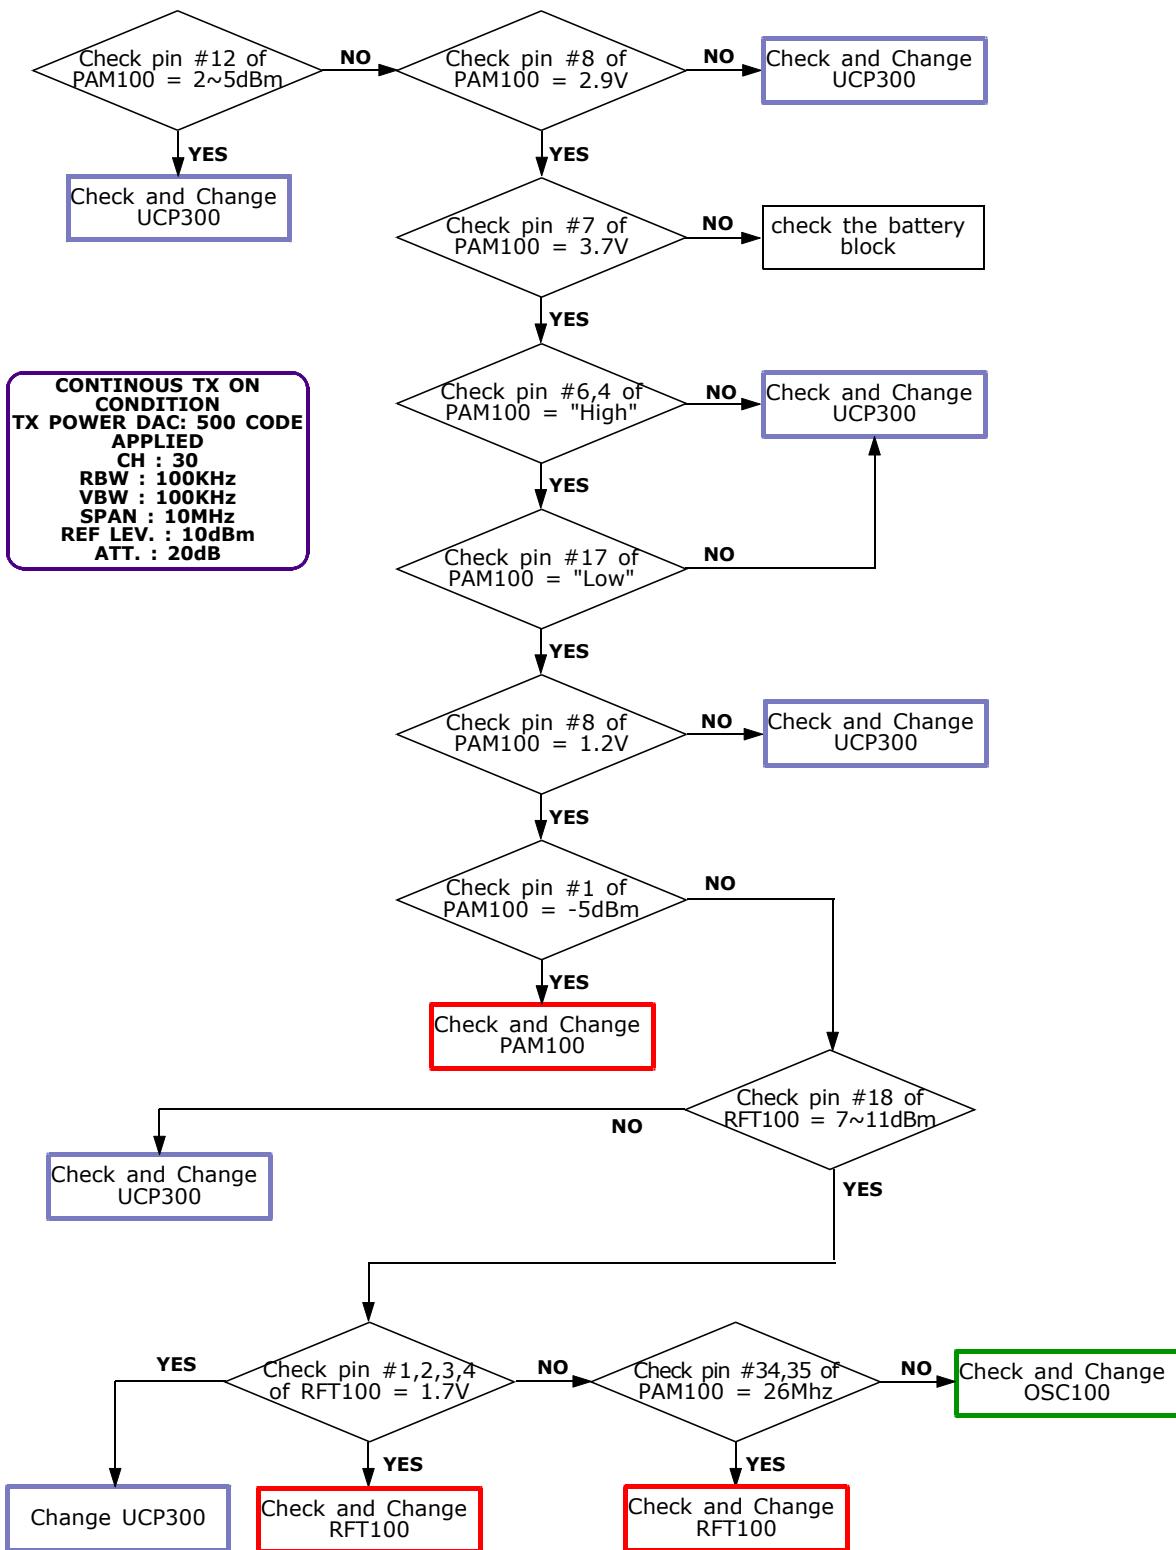

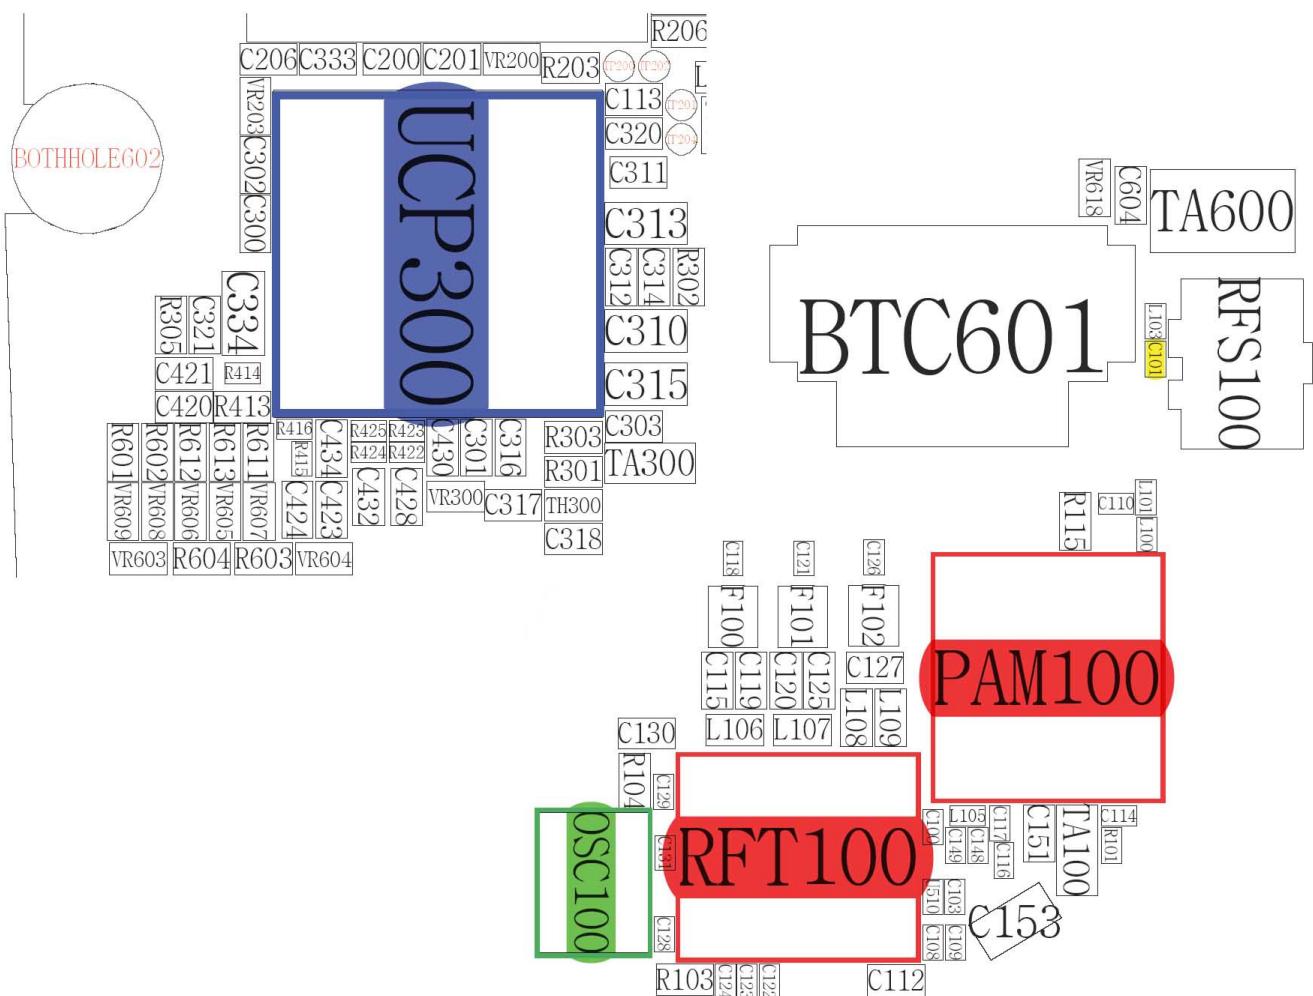

## 3-2-4. EGSM Tx

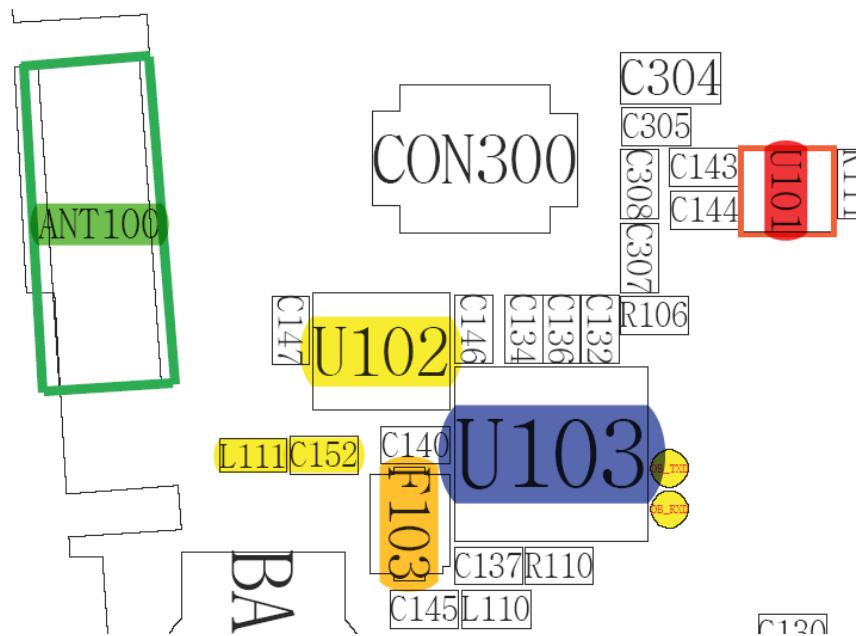

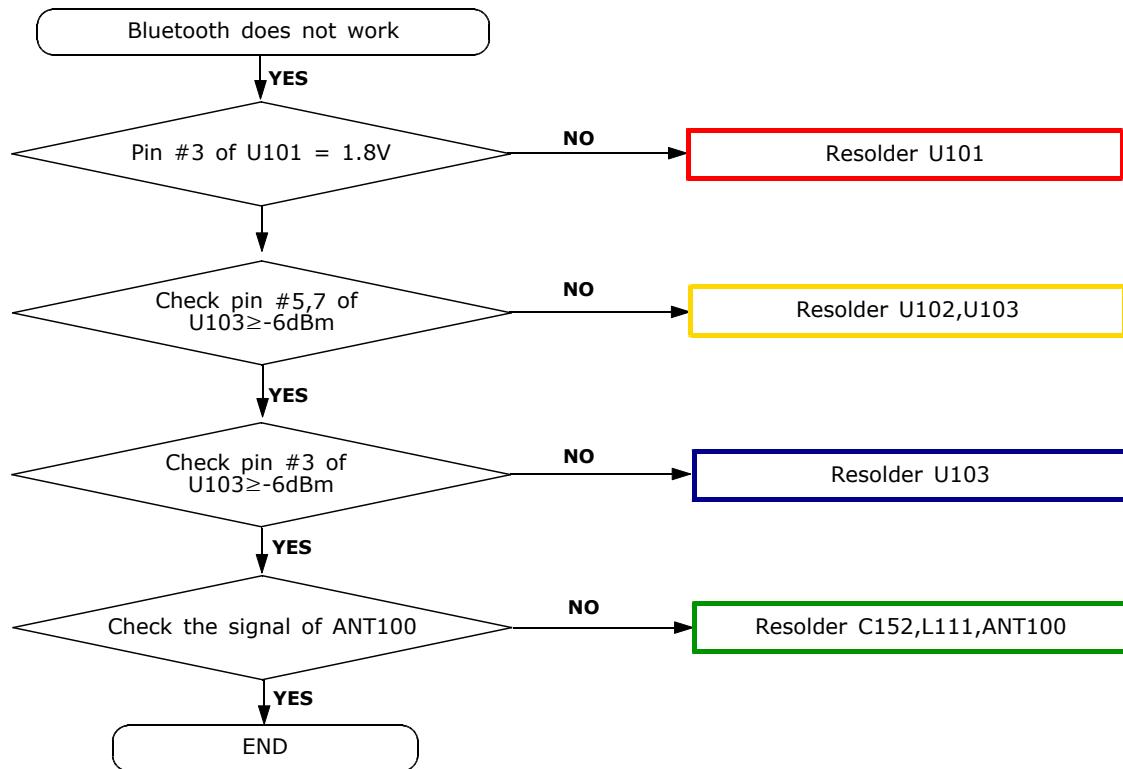

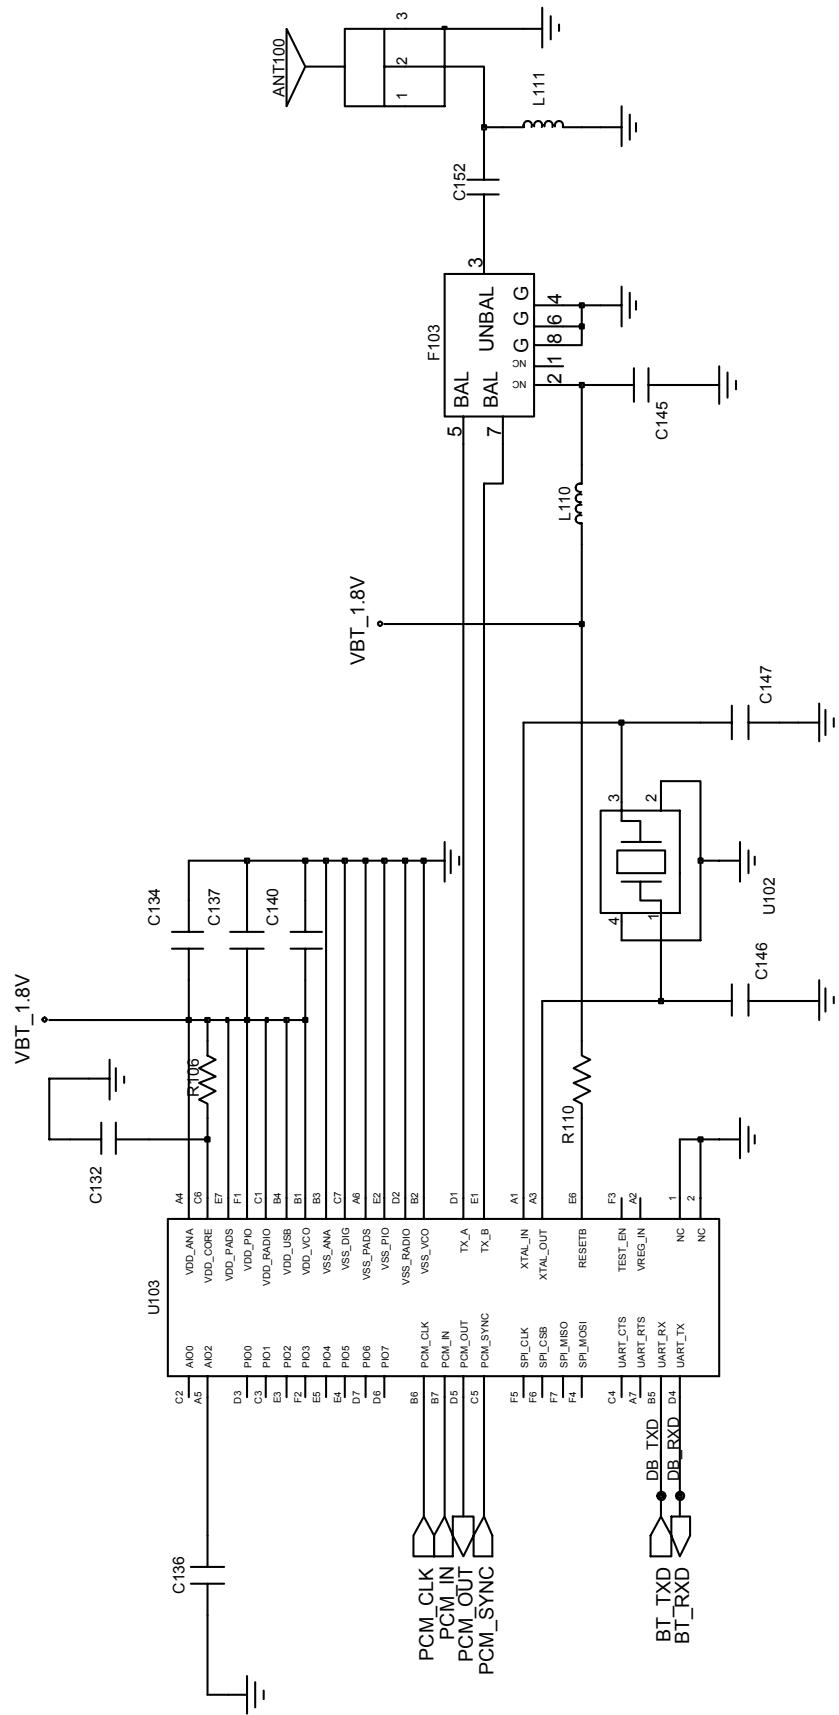

## 3-2-5. DCS &amp; PCS Tx

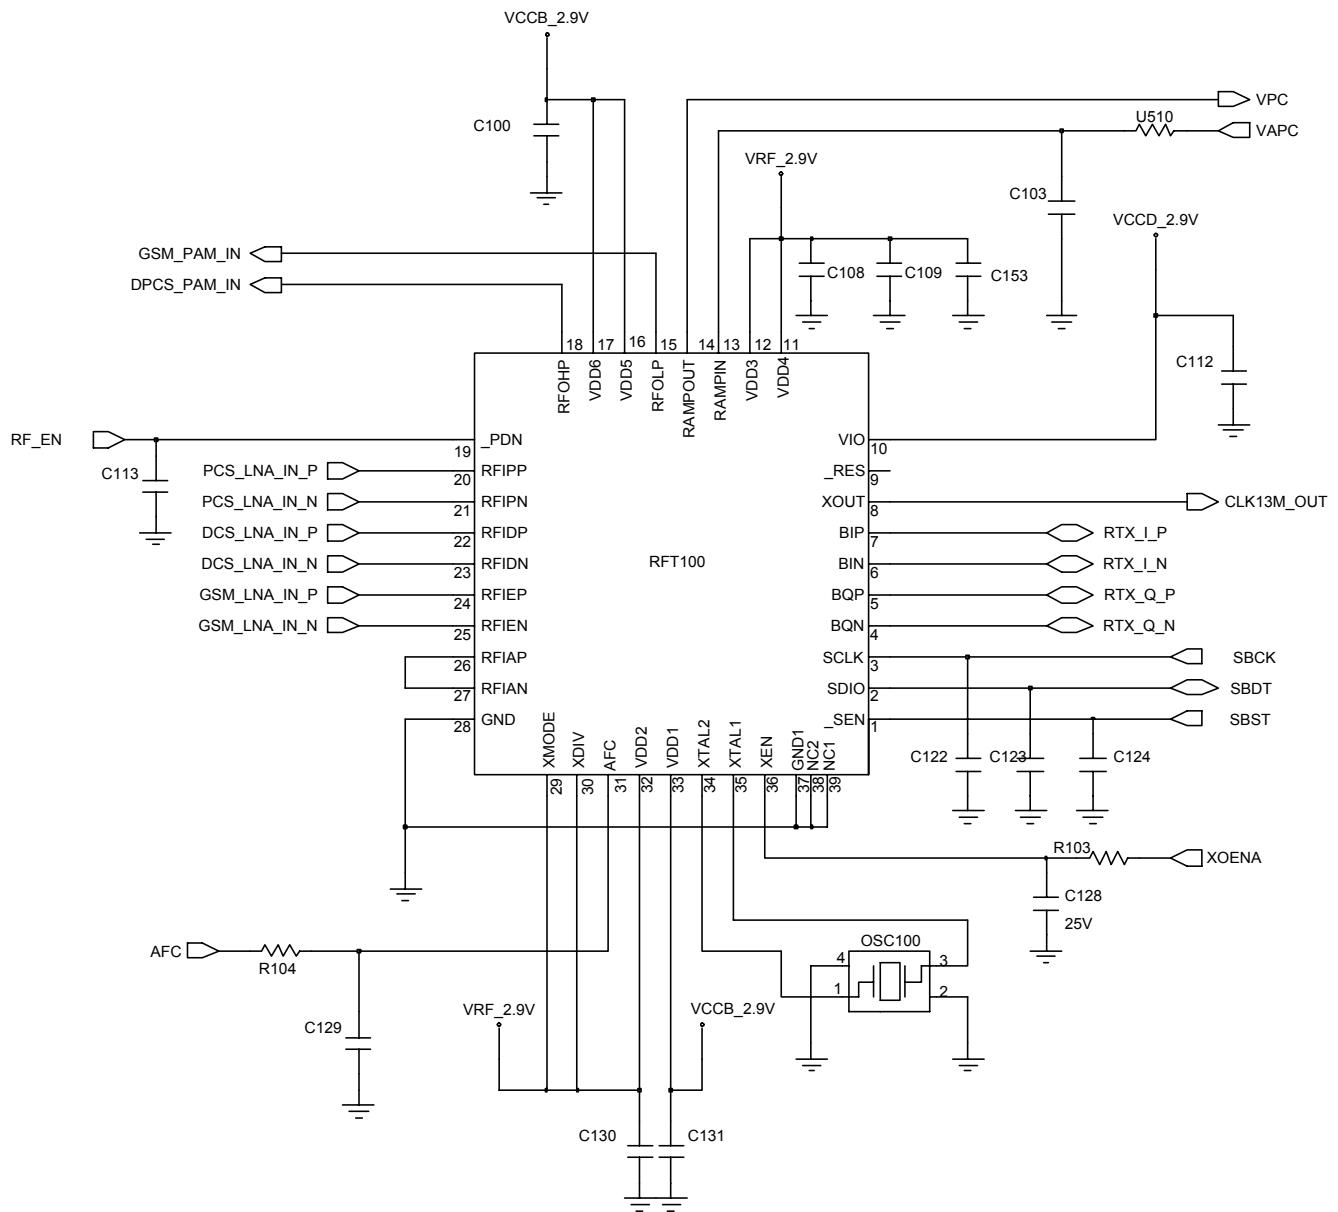

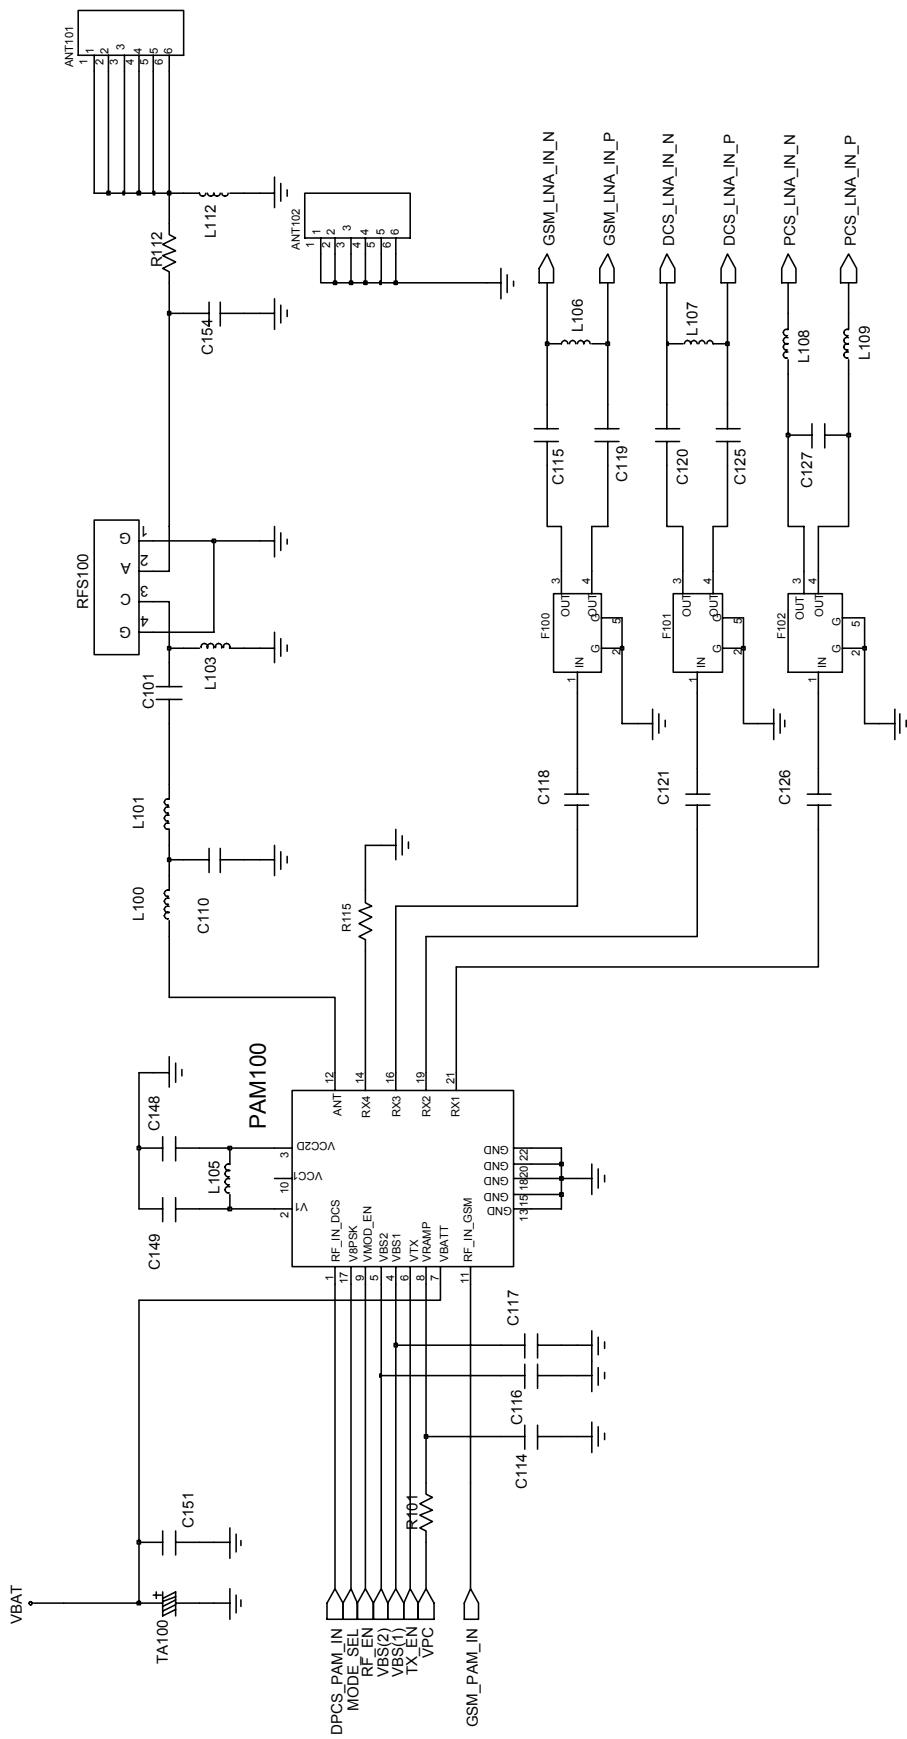

### 3-2-6. BLUETOOTH

## 4. Array course control

---

Test Jig (GH80-03307A)

Test Cable (GH39-00483A)

RF Test Cable (GH39-00397A)

## Software Downloading

### 4-1. Downloading Binary Files

1) Three binary files for S720i

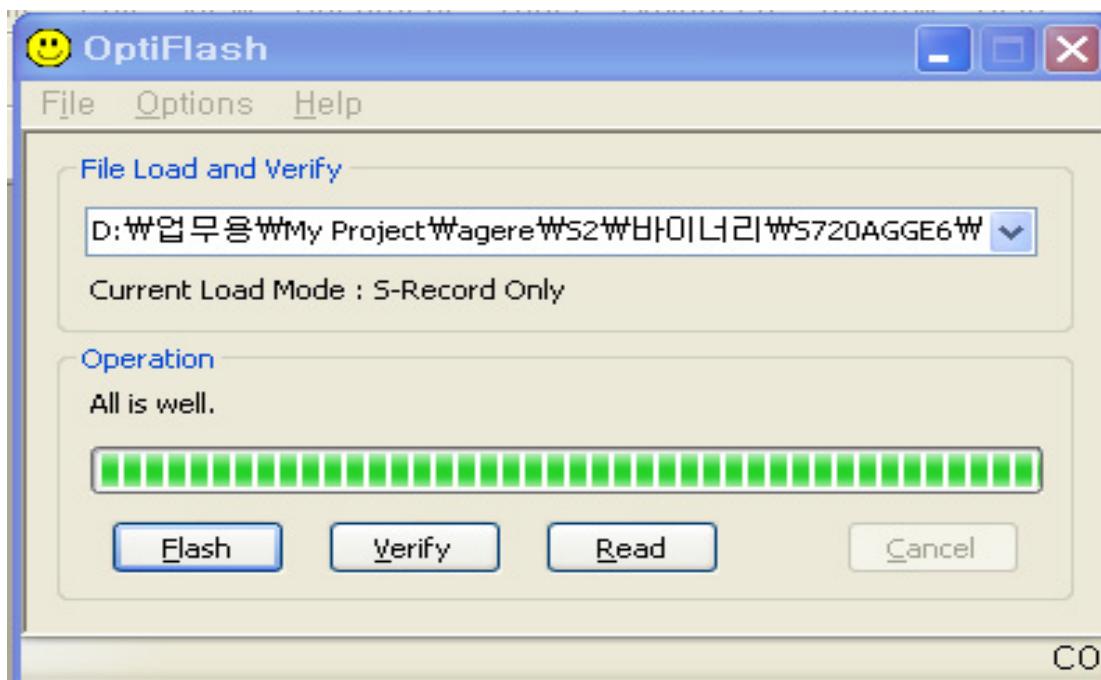

-S720XXYY.s3

### 4-2. Pre-requisite for Downloading

- Downloader Program (OptiFlash.exe)
- S720i Mobile Phone
- Data Cable
- Binary files

#### 4-3. S/W Downloader Program

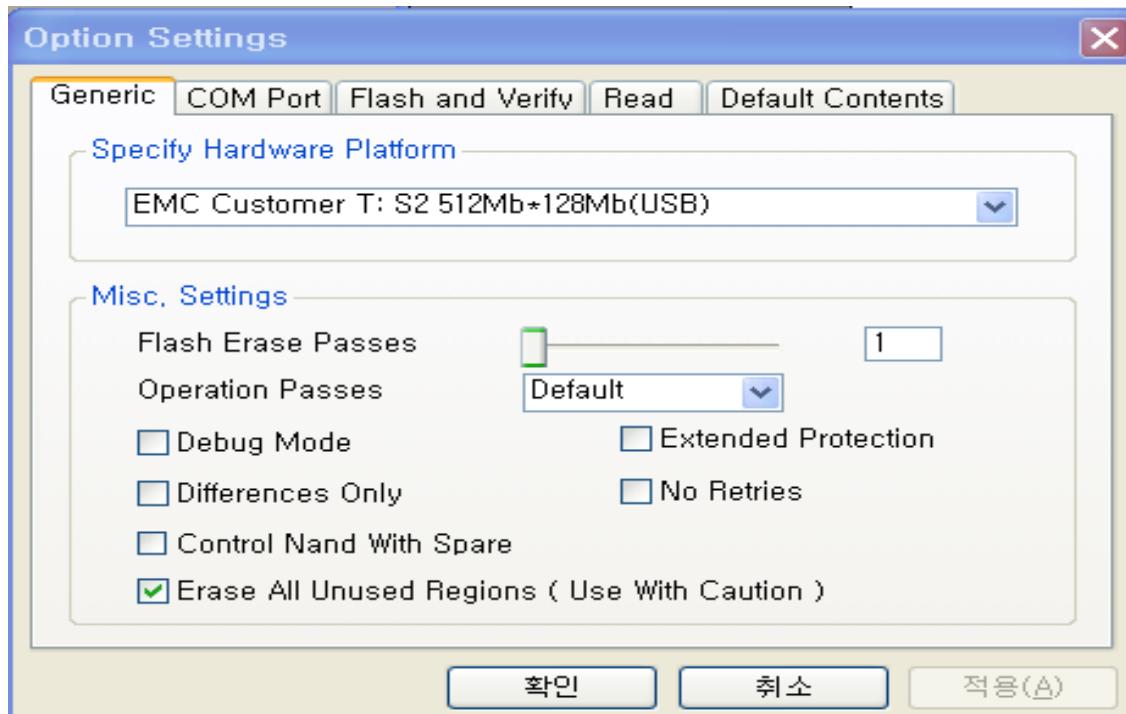

- Load the binary download program by executing the "[OptiFlash.exe](#)"

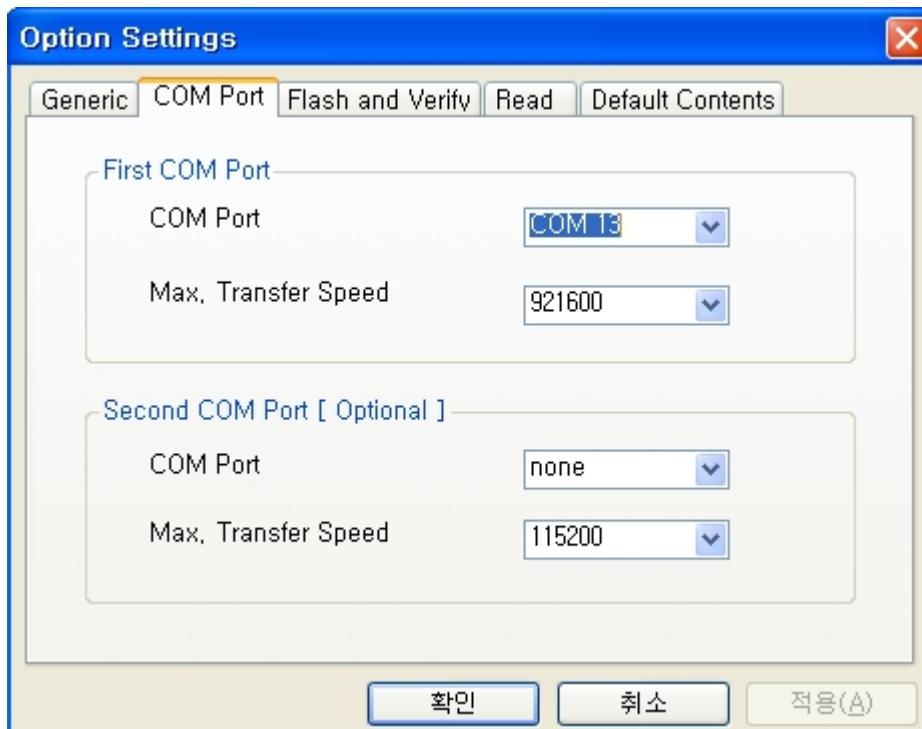

- Select the **Options** -> **Settings** -> **Generic** -> **Specify hardware platform**.

Choose hardware platform for the downloader file setting.

Set the everything else as the default values which are shown below

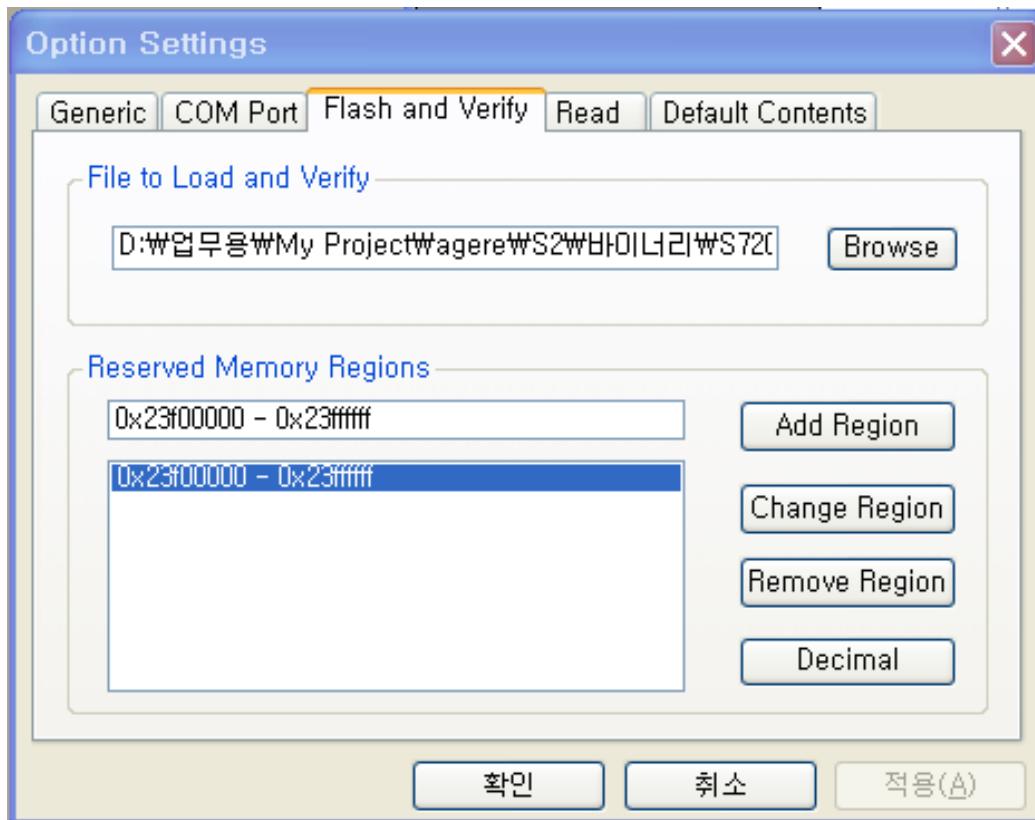

3. Select the **COM port** when the download cable is connected

Up to twelve ports are supported. Additionally you can select the maximum transfer speed OptiFlash will use to communicate with the phone. However, OptiFlash will use a slower speed if either the PC's or the phone's serial hardware is incapable of handling the selected speed

4. Select the **Flash&Verify** -> **Browse** Set the directory path and choose the latest s/w binary, for example S720XXYY.s3 for the downloader binary setting.

**Make sure that not to change the reserved memory regions.**

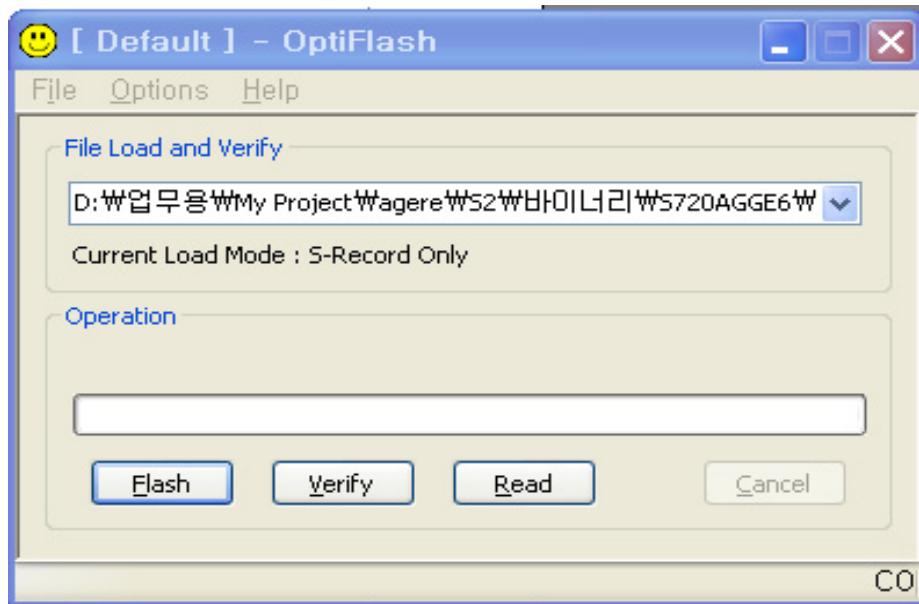

In case of S720i the reserved regions are :

-0x23f00000 - 0x23fffff

5. Click "OK" button then press "Flash"

(Before pressing "Flash" button, push the button "\*" and "END" at the same time. Then press "Flash".)

Downloader will upload the binary file as below for the downloading.

6. When downloading is finished successfully, there is a "All is well" message.

7. After finishing downloading, Certain memory resets should be done to guarantee the normal performance.

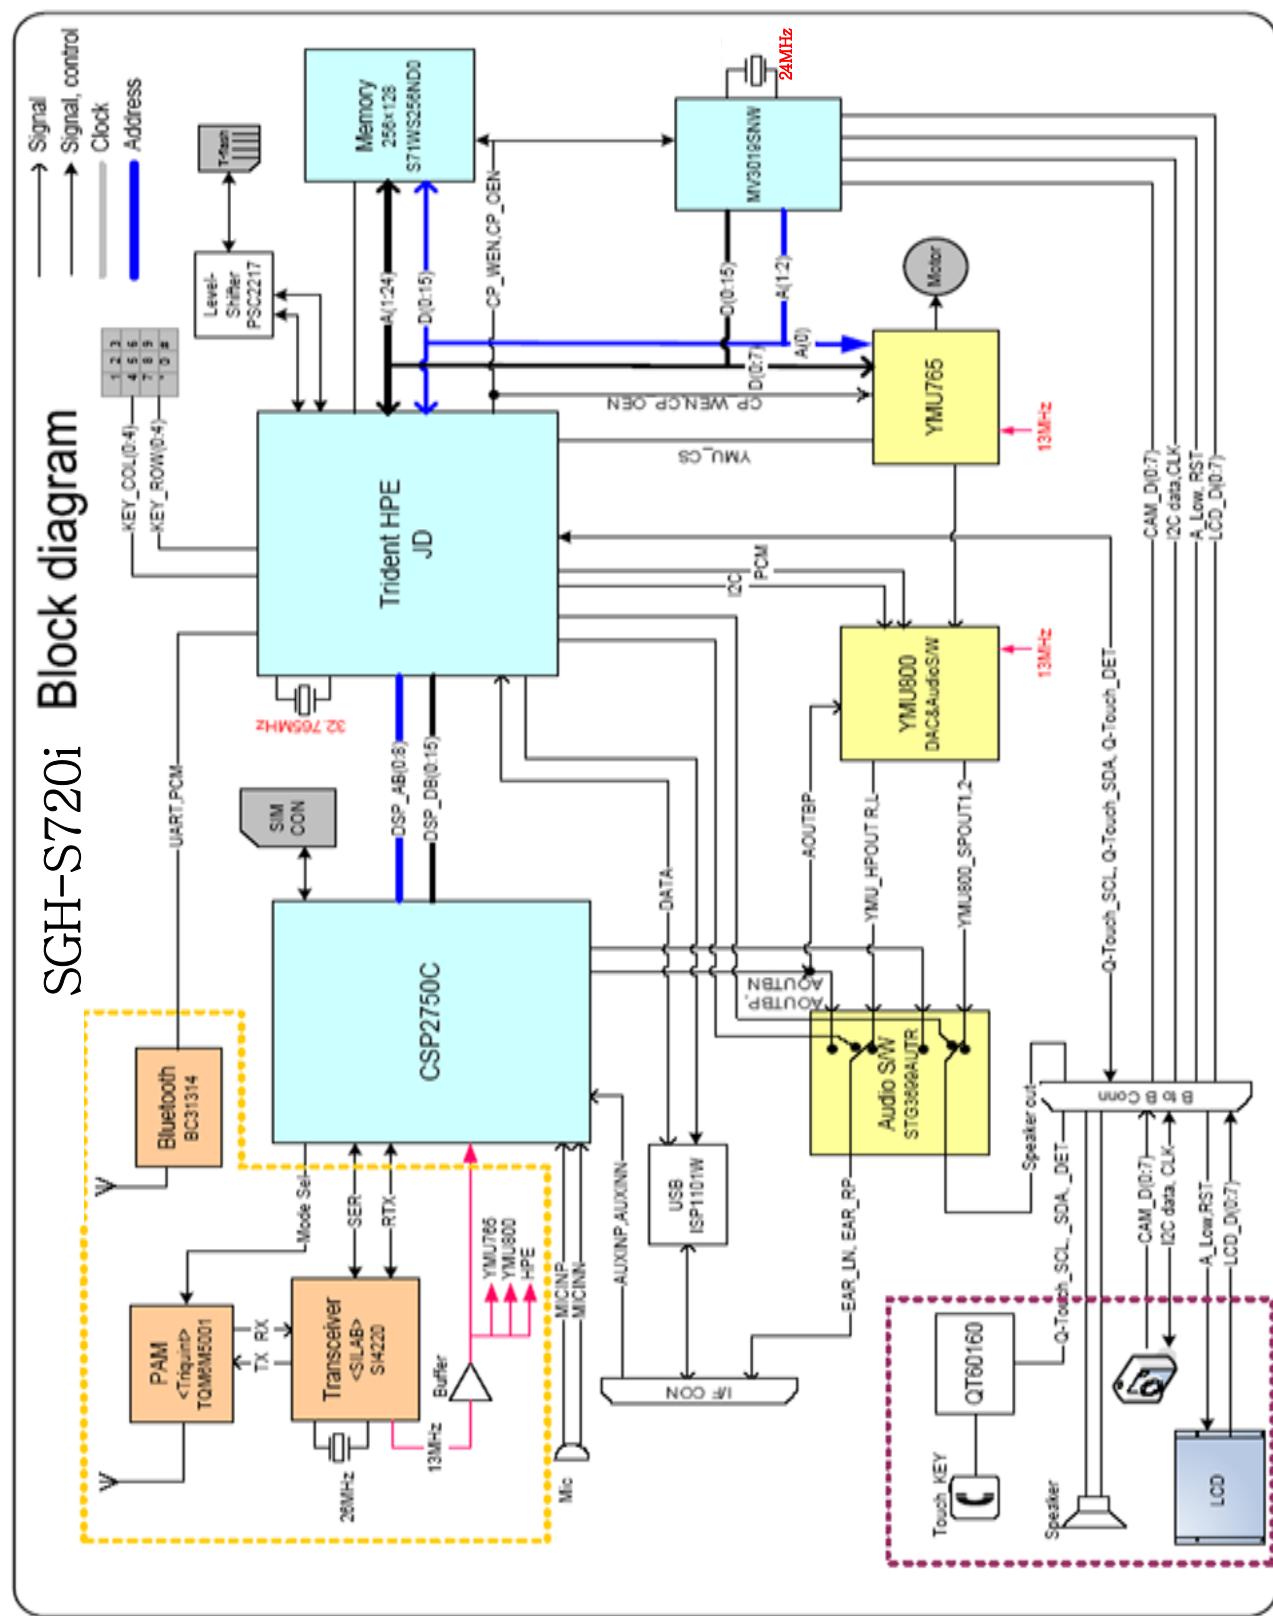

8. Confirm the downloaded version name and etc. :

**\*#1234#**

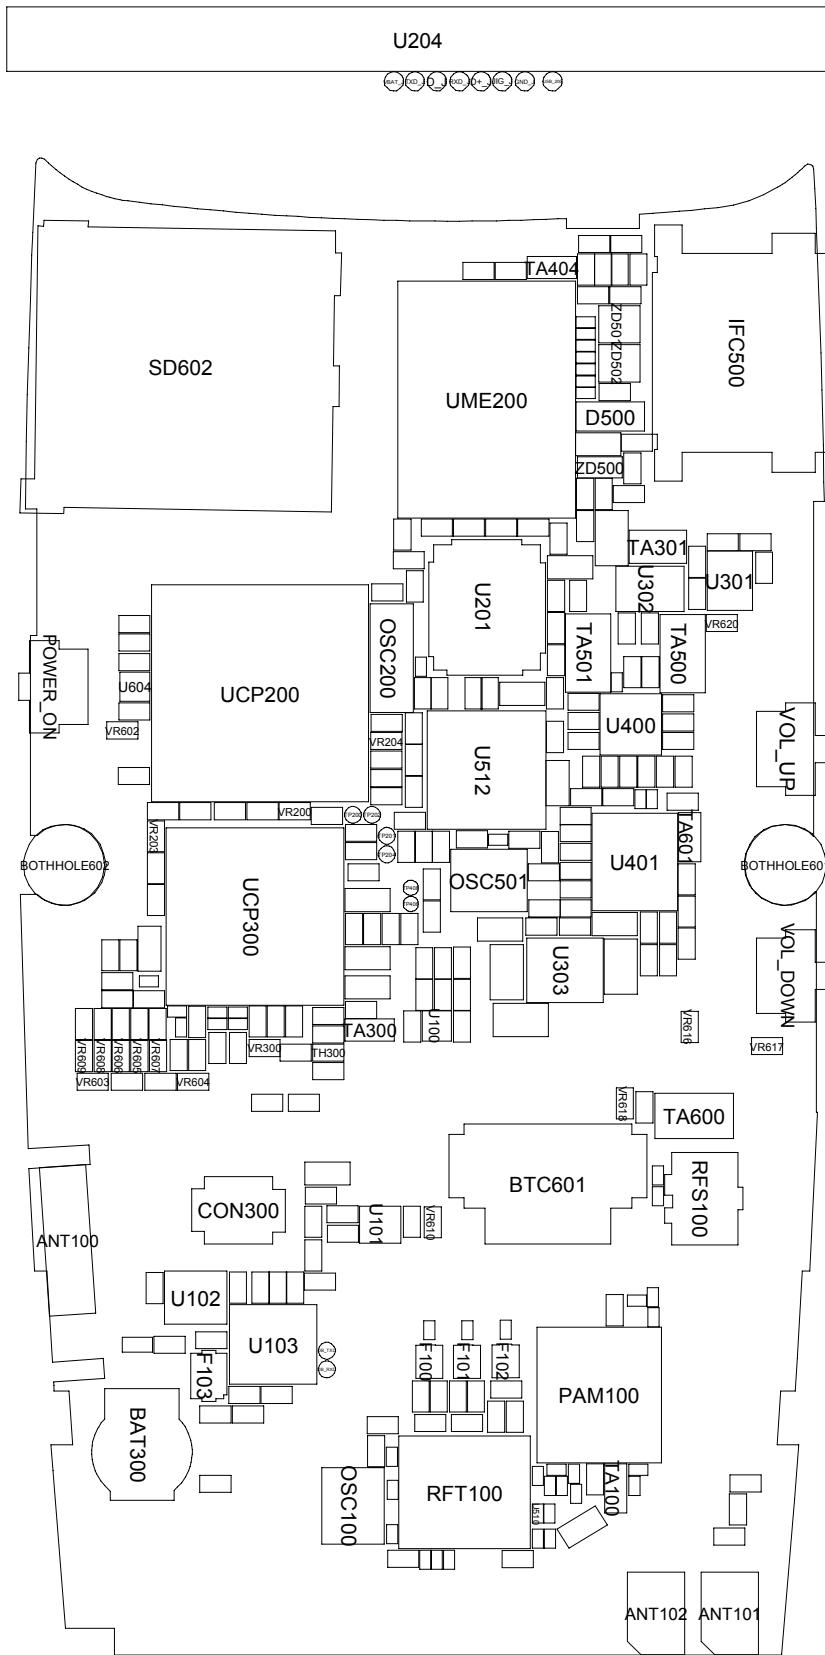

Full Reset :

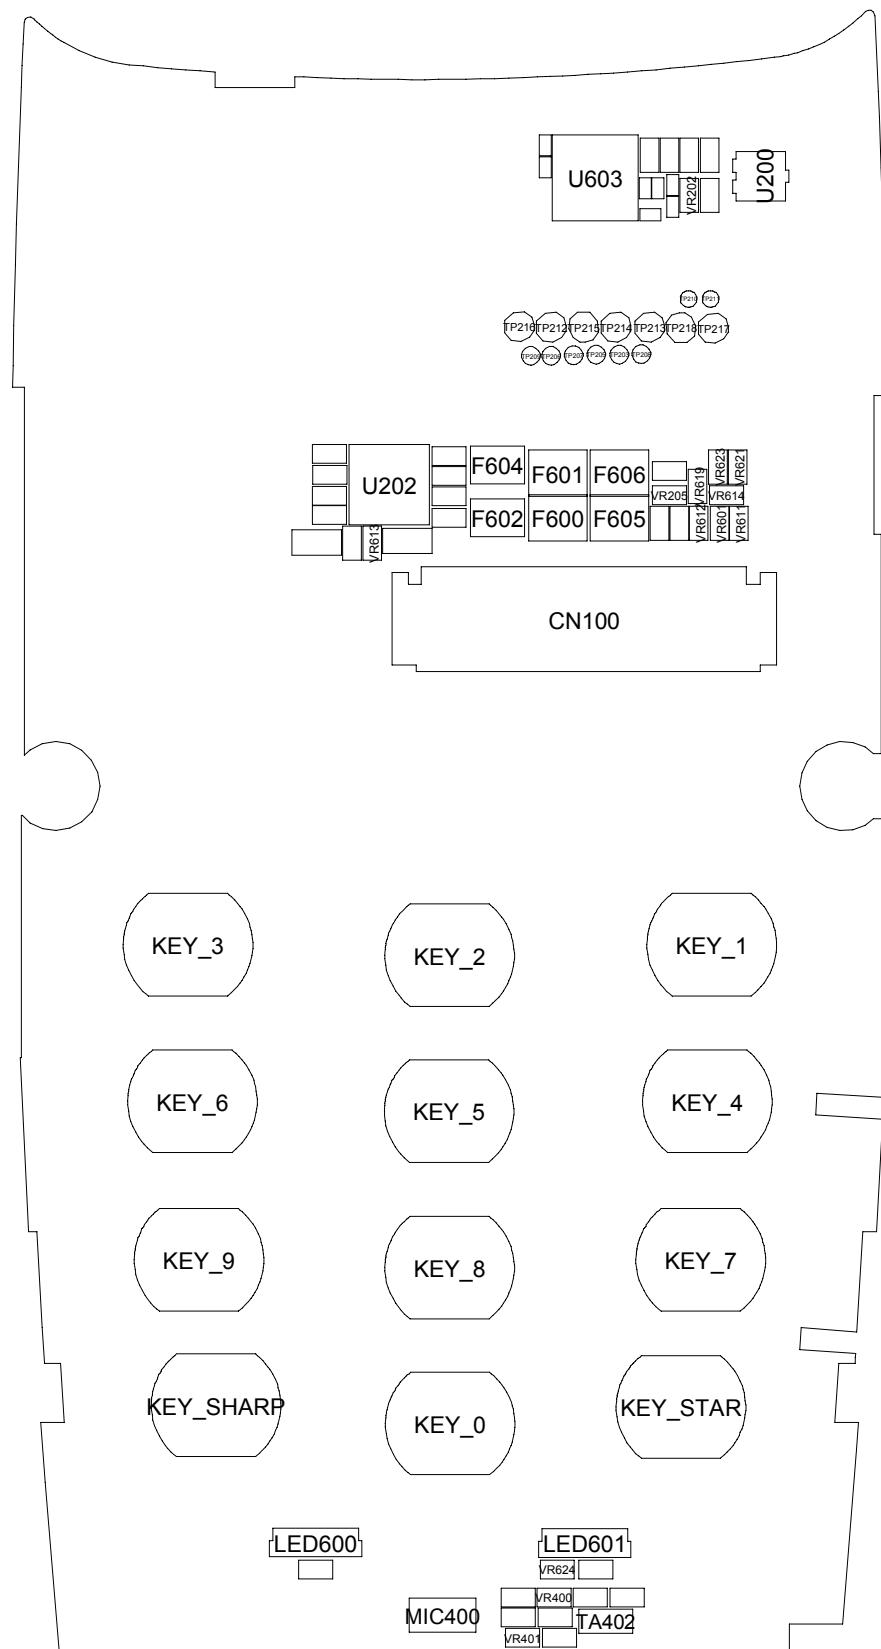

**\*2767\*3855#**

## 8. Reference data

---

### 8-1. Reference Abbreviate

**AAC**: Advanced Audio Coding.

**AVC** : Advanced Video Coding.

**BER** : Bit Error Rate

**BPSK**: Binary Phase Shift Keying

**CA** : Conditional Access

**CDM** : Code Division Multiplexing

**C/I** : Carrier to Interference

**DMB** : Digital Multimedia Broadcasting

**EN** : European Standard

**ES** : Elementary Stream

**ETSI**: European Telecommunications Standards Institute

**MPEG**: Moving Picture Experts Group

**PN** : Pseudo-random Noise

**PS** : Pilot Symbol

**QPSK**: Quadrature Phase Shift Keying

**RS** : Reed-Solomon

**SI** : Service Information

**TDM** : Time Division Multiplexing

**TS** : Transport Stream

---

## 9. Safety Precautions

---

### 9-1. Repair Precaution

- Repair in Shield Box, during detailed tuning.  
Take specially care of tuning or test,  
because specificity of cellular phone is sensitive for surrounding interference(RF noise).
- Be careful to use a kind of magnetic object or tool,  
because performance of parts is damaged by the influence of magnetic force.
- Surely use a standard screwdriver when you disassemble this product,  
otherwise screw will be worn away.
- Use a thick twisted wire when you measure level.  
A thick twisted wire has low resistance, therefore error of measurement is few.
- Repair after separate Test Pack and Set because for short danger (for example an overcurrent and furious flames of parts etc) when you repair board in condition of connecting Test Pack and tuning on.
- Take specially care of soldering, because Land of PCB is small and weak in heat.
- Surely tune on/off while using AC power plug, because a repair of battery charger is dangerous when tuning ON/OFF PBA and Connector after disassembling charger.
- Don't use as you pleases after change other material than replacement registered on SEC System. Otherwise engineer in charge isn't charged with problem that you don't keep this rules.

## 9-2. ESD(Electrostatically Sensitive Devices) Precaution

Several semiconductor may be damaged easily by static electricity. Such parts are called by ESD(Electrostatically Sensitive Devices), for example IC,BGA chip etc. Read Precaution below. You can prevent from ESD damage by static electricity.

- Remove static electricity remained your body before you touch semiconductor or parts with semiconductor. There are ways that you touch an earthed place or wear static electricity prevention string on wrist.
- Use earthed soldering steel when you connect or disconnect ESD.
- Use soldering removing tool to break static electricity. , otherwise ESD will be damaged by static electricity.
- Don't unpack until you set up ESD on product. Because most of ESD are packed by box and aluminum plate to have conductive power,they are prevented from static electricity.
- You must maintain electric contact between ESD and place due to be set up until ESD is connected completely to the proper place or a circuit board.

---

## 10. Product Function

---

### Main Function

- Camera and camcorder
- Music player
- Photo printing
- Bluetooth
- Offline mode
- SOS message
- i-mode browser
- Email (i-mail)
- Multimedea Message Service (i-mms)
- Phonebook
